List of Tables	xxxiii
List of Abbreviations	xxxviii
List of Publications	xli
Conference Proceedings	xlii

CHAPTER 1	Introduction and review of literature	1-37
1.1	DNA and repair pathways	2
1.1.1	DNA damaging substrates	2-3
1.2	Types of DNA repair pathway	4
1.2.1	Base excision repair (BER) pathway	4-5
1.2.2	Mismatch repair (MMR) pathway	5-6
1.2.3	Double-strand break (DSB) repair	7
1.2.4	Nucleotide excision repair (NER) pathway in brief	8
1.3	Nucleotide excision repair (NER) pathway	8-16
1.4	NER deficiency outcomes	16-17
1.4.1	Xeroderma pigmentosum (XP)	17-20
1.4.2	Cockayne syndrome (CS)	20-21
1.4.3	Trichothiodystrophy (TTD)	21
1.5	Xeroderma pigmentosum complementation group A (XPA) protein	22

TABLE OF CONTENTS

1.5.2	XPA and its structure	22-25
1.5.3	Positioning of XPA with DNA in the NER bubble.	25-27
1.5.4	XPA and its interactome with other NER member proteins	27
1.5.4.1	PPIs of XPA with NER members	28-30
1.5.4.2	Sidekicks of XPA not involved in NER directly	30-31
1.5.5	The complacency of XPA and disease outcomes	31-35
1.5.6	Therapeutic aspects of XPA in cisplatin-resistant cancer patients	36-37
1.6	Scope of our present work	37
1.7	Main objectives of this thesis	38
CHAPTER 2	Computational Methods	39-66
2.1	Molecular dynamics (MD) simulations	40
2.1.1	Brief historical background	40
2.1.2	Theory of molecular dynamics (MD) simulation	40-43
2.1.3	Force field	43-45
2.1.4	Periodic boundary conditions	45-46
2.1.5	Long range interactions Ewald sum	46-47
2.1.6	SHAKE algorithm	47-48
2.1.7	Temperature and pressure computation	48
2.1.8	Water molecule models	49
2.2	Simulation methodology in AMBER	49-50
2.2.1	Simulation environment	50-51
2.2.2	Energy minimization	51-53
2.2.3	Heating the system	54
2.2.4	Equilibration	54
2.2.5	Production	54

TABLE OF CONTENTS

2.2.6	Analysis	54-55
	Binding free energy calculation using Molecular Mechanics energies combined with the Poisson-Boltzmann or Generalized Born and Surface Area continuum solvation method (MM-PBSA and MM-GBSA)	
2.3	Free energy calculation using MM-PBSA/GBSA.pl script, and Python MMPSA.py script	56
2.3.1	Molecular docking	56-59
2.4	Docking methodologies	59-65
2.4.1	HexDock software	60-61
2.4.1.1	SymmDock web server	61
2.4.1.2	ClusPro web server	61-62
2.4.1.3	Result analysis tools	63
2.5	PDBsum web server	63-66
2.5.1	Protein-protein interactions (PPIs)	63-64
2.5.1.1	DNAproDB web server	64
2.6	3D visualization Tools	64-65
2.7	Visual molecular dynamics (VMD)	65-66
2.7.1	University of California San Francisco (UCSF) Chimera	65
2.7.2		66
<hr/>		
CHAPTER 3	To study the salient structural features of the DNA binding domain (DBD) of XPA and the determination of a better homodimer model for the DNA binding domain of XPA	67-99
<hr/>		
3.1	Abstract	68
3.2	Introduction	68-71
3.3	Systems and methodology	72-77
3.3.1	Preparation of the initial structures for the	72-73

TABLE OF CONTENTS

	DNA binding domain of XPA	
3.3.2	MD simulation of XPA _{98-210/239} monomer and dimer systems	73-75
3.3.3	MD analyses	75
3.3.4	Determination of interface residues	75
3.3.5	BFE calculations of the homodimers	75-77
3.4	Results and Discussions	77-98
3.4.1	Prediction of the extended DNA binding region of XPA and the selection of good fit dimer models for XPA _{98-210/239} systems	77-80
3.4.2	Interpretations of the MD trajectories for the XPA _{98-210/239} monomers and homodimer	81-88
3.4.3	Determination of the interface interactions of the XPA homo-dimers	89-94
3.4.4	BFE estimation of XPA _{98-210/239} homodimers	95-98
3.5	Conclusion	98-99
<hr/>		
CHAPTER 4	To study the structural dynamics and molecular interactions of XPA with the DNA	100-159
<hr/>		
CHAPTER 4A	To study the structural dynamics and interactions of XPA with the damaged DNA	101-124
<hr/>		
4A.1	Abstract	102
4A.2	Introduction	102-104
4A.3	Systems and methodology	104-107
4A.3.1	Computational model	104
4A.3.2	Docking studies	105
4A.3.3	Inter-molecular nucleotide-residues interaction	105-106
4A.3.4	Molecular dynamics simulation of XPA ₉₈₋	106-107

TABLE OF CONTENTS

	$_{210}$ -DNA bound and DNA-free systems	
4A.4	Results and discussions	107-123
4A.4.1	XPA ₉₈₋₂₁₀ binding mechanism with the damaged DNA using Hex Dock software 8.0.0.	107
4A.4.2	XPA ₉₈₋₂₁₀ -DNA interaction study.	108-116
4A.4.3	MD simulation study on the XPA ₉₈₋₂₁₀ : DNA Free and DNA bound state.	117-123
4A.5	Conclusion	123-124
<hr/>		
CHAPTER 4B	To study the binding mechanism of XPA homodimer with the DNA	125-159
<hr/>		
4B.1	Abstract	126
4B.2	Introduction	126-128
4B.3	Systems and methodology	128-134
4B.3.1	Molecular models	128-130
4B.3.2	Preparation of DNA-protein complex	130-131
4B.3.3	Preparation of topology and coordinate file of the complex using Leap	131
4B.3.4	Molecular dynamics simulation	131-132
4B.3.5	MD analysis	132
4B.3.6	Intermolecular interaction study of XPA homodimer-DNA complex	132-133
4B.3.7	Free energy analysis of DNA-protein complex	133-134
4B.4	Results and discussions	134-158
4B.4.1	Molecular docking results	134-135
4B.4.2	Molecular dynamics and simulation study of XPA homodimer-DNA complex	135-136
4B.4.3	Stability analysis of the XPA homodimer-DNA complex	136-137
4B.4.3.1	Comparing the RMSD, Rg, and SASA of XPA homodimer in DNA bound and DNA	137-138

TABLE OF CONTENTS

	unbound states	
4B.4.4	Structural flexibility of DPC	138-139
4B.4.5	DNA-protein interaction study of XPA homodimer and DNA	139-151
4B.4.6	Partner attraction effect of XPA homodimer with DNA; comparisons of XPA homodimer in B and U states	152-155
4B.4.6	Energetics of DNA binding to XPA homodimer using MM-PBSA approach	156-157
4B.4.7	Free energy decomposition	157-158
4B.5	Conclusion	159
<hr/>		
CHAPTER 5	Investigating the role of XPE in modulating the functioning of XPA	160-236
<hr/>		
CHAPTER 5A	To study and characterize the protein-protein interactions between the DNA binding proteins, XPA and XPE	161-211
<hr/>		
5A.1	Abstract	162
5A.2	Introduction	162-164
5A.3	Materials and methodology	164-168
5A.3.1	Molecular docking and the preparation of initial structures	164-166
5A.3.2	MD simulation of XPA ₁₈₅₋₂₂₆ -XPE complex	166
5A.3.3	MD analyses	166
5A.3.4	Determination of the interface residues	166-167
5A.3.5	PRED and BFE analysis of XPA ₁₈₅₋₂₂₆ -XPE complex	167-168
5A.4	Results and discussions	168-211
5A.4.1	Structural modeling and the validation of XPA ₁₈₅₋₂₂₆ peptide, and the selection of an ideal docked model for XPA ₁₈₅₋₂₂₆ -XPE	168-172

TABLE OF CONTENTS

	complex	
5A.4.2	Interpretations of the MD trajectories for the XPA ₁₈₅₋₂₂₆ -XPE complex	173-180
4A.4.3	Protein-protein interface characterization	180-205
5A.4.4	Decomposing the free energy contributions to the binding free energy of XPA ₁₈₅₋₂₂₆ and XPE on a per-residue basis	205-211
5A.5	Conclusion	211-212
<hr/>		
CHAPTER 5B	To study the effect of XPA's R207G mutation on its binding affinity with XPE in a dynamic system	213-236
<hr/>		
5B.1	Abstract	214
5B.2	Introduction	214-217
5B.3	Systems and methodology	218-221
5B.3.1	Protein systems	218
5B.3.2	Setup for MD simulations	219-220
5B.3.3	Binding free energy (BFE) analyses for WT-XPE and R207G-XPE systems	220-221
5B.4	Results and discussion	222-235
5B.4.1	Modeling and the validation of XPA ₁₈₅₋₂₇₃ , and the selection of the best-docked complex for XPA _{WT/R207G} -XPE complex	222- 227
5B.4.2	Analysis of trajectories of WT-XPE and R207G-XPE complexes	228
5B.4.3	Overall stability of the WT-XPE and R207G-XPE systems	228-230
5B.4.4	Residue flexibility	230-231
5B.4.5	Secondary structural changes	231-233
5B.4.5	Binding free energy (BFE) analyses of the WT-XPE and R207G-XPE complexes	233-235
5B.5	Conclusions	235-236
<hr/>		

TABLE OF CONTENTS

CHAPTER 6	To study the protein-protein interaction between the members of the pre-incision complex (PIC)	237-251
6.1	Abstract	238
6.2	Introduction	238-241
6.3	Systems and methodology	241-243
6.3.1	Structure modeling of full-length XPA	241
6.3.2	Energy minimization and structural validation of XPA	241
6.3.3	Sequential molecular docking of the PIC	241-243
6.3.4	PPI study using PDBsum server	243
6.4	Results and Discussion	243-253
6.4.1	Structural modeling and the validation of XPA protein, and the selection of an ideal XPA	243-246
6.4.2	Understanding the docked nature of PIC and determination of PPIs between PIC	247-253
6.5	Conclusion	254
CHAPTER 7	Summary and Future prospects	255-258
7.1	Overview of results	256-257
7.2	Future prospects	257-258
