Chapter 1: A detailed introduction on application of N-heterocyclic carbene in organocatalysis, heterogenization of NHC catalysts, zirconium phosphate/phosphonate layered material as catalyst support and semiconductor based photocatalytic oxidation reactions	
1.1. General Introduction	2
1.2. N-heterocyclic carbene: A versatile ligand for catalyst design	2-4
1.3. NHC in catalysis	4-5
<i>1.3.1. NHC based Organocatalysis</i>	6-8
<i>1.3.2. NHC catalysed direct aerobic esterification of benzaldehyde</i>	9-15
<i>1.3.3. Functionalised N-heterocyclic carbene</i>	16-17
1.4. Heterogeneous NHC organocatalysts	17-20
1.5. Metal organic frameworks supported NHCs	20-21
1.6. Metal phosphonates: A suitable alternative to MOFs	21-22
<i>1.6.1. Layered zirconium(IV) phosphate/phosphonate (ZrP) Framework as support</i>	22-24
<i>1.6.2. Heterogeneous catalyst in photochemical reaction</i>	24-25
<i>1.6.3. Semiconductor quantum dots as photocatalyst</i>	25
<i>1.6.4. Semiconductor quantum dots supported on 2D materials as photocatalyst</i>	26-31
1.7. Objectives of present work	31-32
1.8. References	32-47

Chapter 2: Phosphonate ester functionalized imidazolium salts and their application in organocatalytic aerobic esterification of benzaldehyde

2.1. Introduction	49-51
2.2. Materials and methods	52
2.2.1. Crystallography.....	52
2.2.2. Computational Details.....	52-53
2.3. Experimental	53
2.3.1. Synthesis of 1-mesityl-1H-imidazole (1).....	53
2.3.2. Synthesis of 1-(4-chlorophenyl)-1H-imidazole (2).....	53-54
2.3.3. Synthesis of 1-(4-bromophenyl)-1H-imidazole (3).....	54
2.3.4. Synthesis of 1-(4-nitrophenyl)-1H-imidazole (4).....	54
2.3.5. Synthesis of 3-(2-(diethoxyphosphoryl)ethyl)-1-mesityl-1H-imidazol-3-ium-bromide (5).....	55
2.3.6. Synthesis of 1-(4-chlorophenyl)-3-(2-(diethoxyphosphoryl)ethyl)-1H-imidazol-3-ium bromide (6).....	55-56
2.3.7. Synthesis of 1-(4-bromophenyl)-3-(2-(diethoxyphosphoryl)ethyl)-1H-imidazol-3-ium bromide (7).....	56
2.3.8. Synthesis of 3-(2-(diethoxyphosphoryl)ethyl)-1-(4-nitrophenyl)-1H-imidazol-3-ium bromide (8).....	56-57
2.3.9. Typical procedure for oxidation of aromatic aldehydes to aryl esters using boronic acid.....	57
2.3.10. Typical procedure for oxidation of aromatic aldehydes to aryl esters using alcohols.....	57
2.4. Results and discussion	57
2.4.1. Synthesis and characterization of N-substituted imidazoles (1-4).....	57-60
2.4.2. Single crystal X-ray structures of N-substituted imidazole's (1-3).....	60-63
2.4.3. Synthesis of phosphonate ester functionalized imidazolium salts (5-8).....	63-68
2.4.4. Phosphonate functionalized NHC catalysed esterification of benzaldehydes.....	69-73
2.4.5. Computational studies on NHCs derived from (5-8).....	73-75

2.4.6. <i>Electronic Structures and Frequency analysis of the species involved in the NHC catalysed aerobic esterification of benzaldehyde with aryl boronic acid</i>	76-79
2.4.7. <i>Thermochemistry and PES analysis</i>	79-81
2.5. Conclusions	81-82
2.6. References	82-87

Chapter 3: Imidazolium functionalized zirconium(IV) organophosphate framework: An efficient heterogenous organocatalyst for aerobic esterification of aldehydes

3.1. Introduction	89-90
3.2. Materials and Methods	90-91
3.3. Experimental Section	91
3.3.1. <i>Synthesis of 1-mesityl-3-(2-phosphonoethyl)-1H-imidazol-3-ium chloride (9)</i>	91
3.3.2. <i>Synthesis of $[Zr(RPO_3)_{1.32}(OH)_{1.36}]Cl_{1.32}.nH_2O$ (10)</i>	91
3.3.3. <i>Aerobic oxidation of aromatic aldehydes to aryl esters using boronic acid</i>	92
3.3.4. <i>Aerobic oxidation of aromatic aldehydes to aryl esters using alcohols</i>	92
3.3.5. <i>Catalyst recyclability test</i>	92
3.4. Results and Discussion	93
3.4.1. <i>Synthesis and characterization of imidazolium functionalized phosphonic acid (9)</i>	93-98
3.4.2. <i>Synthesis and characterization of zirconium phosphonate framework (10)</i>	99-106
3.4.3. <i>Catalytic esterification of benzaldehyde with aryl boronic acid or alcohols</i>	106-111
3.5. Conclusions	111
3.6. References	112-117

Chapter 4: α -ZrP Supported CdS Quantum Dot Composite Material: An Efficient and Recyclable Photocatalyst for Selective Oxidation of Benzyl Alcohols

4.1. Introduction.....	119-120
4.2. Materials and methods.....	120
4.3. Experimental.....	121
4.3.1.Synthesis of α -Zirconium phosphate(α -ZrP).....	121
4.3.2.Synthesis of CdS quantum dot supported over α -ZrP.....	121
4.3.3.Photocatalytic oxidation of benzyl alcohols.....	121
4.3.4.Catalyst reusability test.....	121-122
4.4. Results and discussion.....	122
4.4.1.Synthesis and characterization of CdS QD@ α -ZrP(12).....	122-130
4.4.2.Photocatalytic activity of CdS@ α -ZrP	131-136
4.5. Conclusions.....	136
4.6. References.....	137-141

Chapter 5: Summary

5.1. Summary.....	143-148
5.2. Future scope.....	148
Appendix A: HPLC and GC-MS data.....	149-222
Appendix A: List of publications.....	223
Appendix B: List of Conferences, Seminars, Workshops attended and Posters presented.....	224
