## List of Tables and Figures

## List of Abbreviations and Symbols

### Chapter I: Introduction

1.1.	Nanosystems: An Introduction .....	1
1.1.1.	Rare earth based nanostructures .....	2
1.1.1.1.	Gd based oxide and vanadate nanosystems.....	4
1.1.1.2.	Doped RE nanostructures.....	7
1.2.	Impact of $\gamma$ -radiation on RE based nanomaterials.....	9
1.3.	RE nanosystems as photocatalytic agents.....	11
1.4.	Biophysical viewpoints of RE based nanosystems.....	13
1.5.	Thesis objective and structure.....	19
	Bibliography.....	21

## Chapter II: Synthesis of nanoscale Gd<sub>2</sub>O<sub>3</sub> and GdVO<sub>4</sub> systems

- 2.1. Gd<sub>2</sub>O<sub>3</sub> nanoparticles and nanorods: Citrate-gel and Hydrothermal route
  - 2.1.1. Processing of Gd<sub>2</sub>O<sub>3</sub> nanophosphors via citrate-gel route
  - 2.1.2. Processing of Gd<sub>2</sub>O<sub>3</sub> nanophosphors via hydrothermal route
- 2.2. Inclusion of Eu<sup>3+</sup> as dopant and Na<sup>+</sup>, K<sup>+</sup> as co-dopants.
- 2.3. Basic characterization of Gd<sub>2</sub>O<sub>3</sub> nanoparticles (GNP) and nanorods (GNR)
  - 2.3.1 XRD analysis
  - 2.3.2 Morphological analysis
  - 2.3.3 Optical band gap determination
  - 2.3.4 XPS based revelations
- 2.4 GdVO<sub>4</sub> nanosystem and Eu<sup>3+</sup> doping
- 2.5 Basic characterization GdVO<sub>4</sub> nanoparticles (GdV) and GdVO<sub>4</sub>:Eu<sup>3+</sup> (EuGdV) nanoparticles
  - 2.5.1 XRD analysis
  - 2.5.2 Morphological analysis
  - 2.5.3 Optical band gap determination

#### 2.5.4 XPS based revelations

#### 2.6 Concluding remarks

Bibliography

### **Chapter III: Influence of dopants and $\gamma$ irradiation on radiative events of $\text{Eu}^{3+}:\text{Gd}_2\text{O}_3$ nanosystems**

3.1. Identifying relevant *D-F* transitions in the PL spectra of the nanosystems

3.2. Concentration quenching effect with varying dopant variation

3.3. Effect of  $\gamma$ -irradiation on steady state and time-resolved photoluminescence features

3.4. Manifested luminescence features upon inclusion of co-dopants ( $\text{Na}^+$ ,  $\text{K}^+$ )

3.4.1. Effect of co-doping on local symmetry

3.4.2. Effect of morphology on luminescence response

3.4.3. Cause of anomalous trend in EuGNR with  $\text{Na}^+$  co-doping

3.5. Concluding remarks

Bibliography

## **Chapter IV: $\gamma$ irradiation induced PL quenching in $\text{GdVO}_4:\text{Eu}^{3+}$ nanosystems and related phosphorescence decay dynamics**

- 4.1. Identifying important *D-F* transitions in the emission spectra of the  $\text{GdVO}_4:\text{Eu}^{3+}$  nanosystems
- 4.2. Effect of varying dopant concentration on emission spectra
- 4.3. Effect of Irradiation of  $\text{EuGdV}$  nanosystems and impact on lifetime features

## **Chapter V: Raman characteristics of $\text{GdVO}_4:\text{Eu}^{3+}$ nanosystems**

- 5.1. Manifestation of Raman active modes
- 5.2. Effect of dopant concentration on Raman spectra of  $\text{EuGNP}$
- 5.3. Partial phase transition from Zircon to *Scheelite* type in  $\text{EuGdV}$
- 5.4. Concluding remarks

### Bibliography

## **Chapter VI: Photocatalytic activity of $\text{GdVO}_4:\text{Eu}^{3+}$ on Congo Red (CR) dye**

- 6.1. Characteristic absorbance spectra of CR dye
- 6.2. Dye removal efficiency of  $\text{EuGdV}$  under white light and UV light illumination against CR dye
- 6.3. Concluding remarks

Bibliography

**Chapter VII: Cytotoxic aspects of nanoscale  $Gd_2O_3:Eu^{3+}$  and  $GdVO_4:Eu^{3+}$**

- 7.1. Determination of haemolytic activity
- 7.2. Plasma recalcification time based studies
- 7.3. Morphological features of haemolysed RBCs
- 7.4. Concluding remarks

Bibliography

**Chapter VIII: Conclusions and future directions**

**List of Publications and Conferences**

**Addenda**
