Contents

1 Introduction **1**

1.1 Motivation 3

1.2 Objectives 5

1.3 Scope of Research 6

1.4 Materials and Methods 7

1.4.1 Computational Methods 8

1.5 Conceptual Framework 9

1.5.1 Single Layered RGC SNN in Primate Visual Cortex for Multi-resolution Feature Extraction and Scene Segmentation 9

1.5.2 Multi-layer SNN in Primate Visual Cortex 10

1.6 Organization of the Thesis 10

2 Literature Survey **13**

2.1 Introduction 13

2.2 Morphological Significance 15

2.2.1 Morphogenesis and Type-Specificity of Neuron Morphology . 17

2.2.2 Morphology and Structure-Function Relationship 18

2.2.3 Localized Active Ion Channels and Non-linearity 19

2.3 Summary 20

3 Mathematical Modeling and Simulation 21

3.1 Introduction 21

3.2 Approach 23

3.2.1 Contribution 23

3.3 Cable Theory and The Cable Model 23

3.3.1 Membrane Dynamics 25

3.3.2 Tapered and Flared Passive Fibers 33

3.3.3 Tapered/flared 2D Cable 35

3.4 Cell-field Interaction and Inter-fiber Interference 38

3.4.1 Bundled Nerve Fiber and Cable Model 38

3.5 Summary and Future Remarks 44

4 Edge Detection in Primate Visual Cortex 46

4.1 Introduction 46

4.1.1 Research Gap 47

4.1.2 Related Works 47

4.1.3 Aim 48

4.1.4 Contribution 49

4.2 Striate Cortex of the Primate Visual Cortex 49

4.3 Model Architecture 51

4.3.1 The Input Layer 52

4.3.2 The Processing Layer 55

4.3.3 The Rate Encoder 62

4.4 Orientation Selectivity & Edge Map Extraction 63

4.4.1 Simulation Results for Scotopic & Color Vision 69

4.5 Coupled Orientation Selectivity & Bandwidth Tuning 72

4.5.1 Implemenation of fiber coupling in primary visual cortex . . 74

4.5.2 RGC Dendritic Input Coupling: 75

4.5.3 Orienation Selectivity Bandwidth Representation 76

4.5.4 Simulation Results 77

4.6 Summary and Future Remarks 81

5 Multi-resolution Feature Extraction and Visual Scene Segmentation of Primate Visual Cortex 83

5.1 Introduction 83

5.2 Related Works 84

5.2.1 Approach 85

5.2.2 Contribution 85

5.3 Multi-resolution Model Architecture 85

5.3.1 Midget and Parasol Cells 86

5.3.2 Connectivity, Receptive Fields Sizes and Resolution 88

5.3.3 Orientation-Selectivity, Dendritic Spread & Spike Triggers . 90

5.3.4 Simulation Results 94

5.4 Segmentation & Boundary Estimation Framework 97

5.4.1 Model Architecture 98

5.4.2 The Morphology 98

5.4.3 Connectome Specificity 100

5.4.4 Simulation Results 101

5.5 Summary and Future Remarks 104

6 Multi layer SNN in Primates' Visual Cortex 105

6.1 Introduction 105

6.1.1 Contribution 107

6.2 Hubel and Wiesel Type Network 107

6.2.1 Simple Cell Layer 108

6.2.2 Complex Cell Layer 109

6.3 Modeling and Simulation 110

6.4 Population Feature 113

6.5 Result and Discussion 113

6.6 Summary 115

7 Conclusion and Future Directions 117

7.1 Conclusion 117

7.2 Dissertation Contributions 119

7.2.1 Mathematical Modeling and Simulation of Neuronal Assemblies 119

7.2.2 Single Layered Retinal Ganglion Cell Spiking Neural Network in Primate Visual Cortex and Edge Detection 119

7.3 Future Directions 120

Publications based on the Thesis Works
