

## Appendix I

### Phylogenetic tree construction of N4T strain using MEGA7 tool

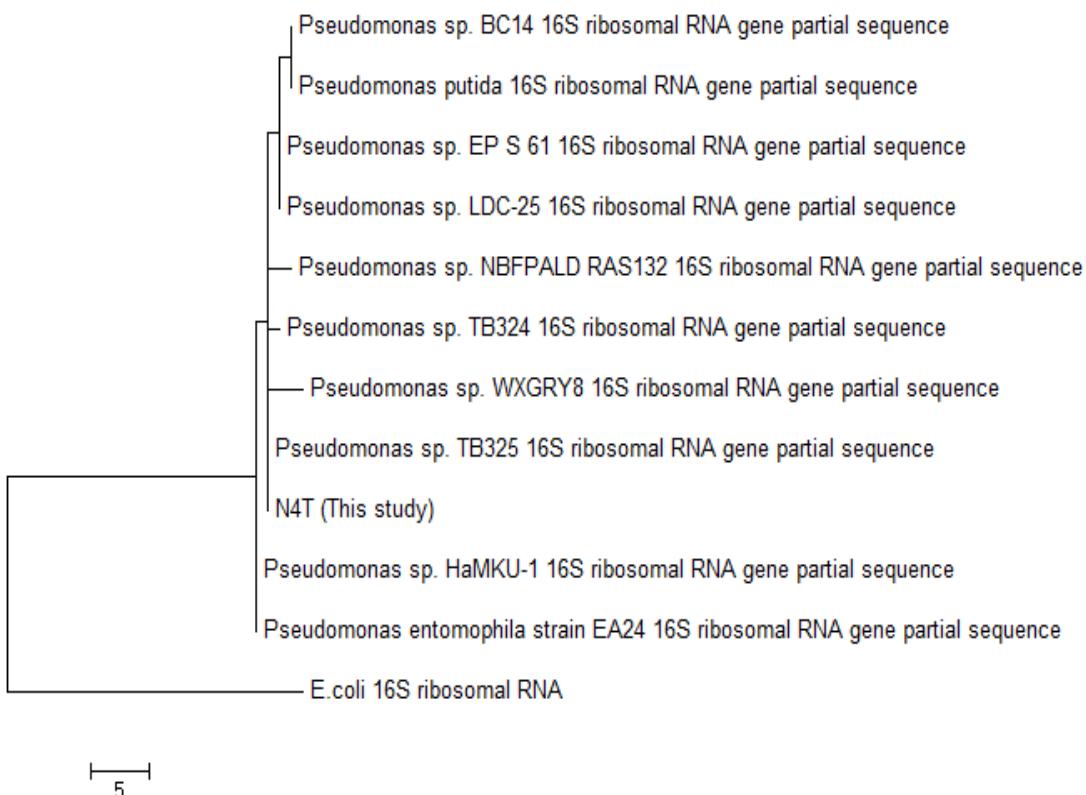

Fig: Phylogenetic tree of N4T by neighbor joining method, indicating the genus belongs to *Pseudomonas* spp. The phylogenetic tree was constructed using MEGA 7 tool.

## Appendix II

**Association study of *P. putida* N4T and *Enterobacter* C10 with tomato seedling by GUS assay**

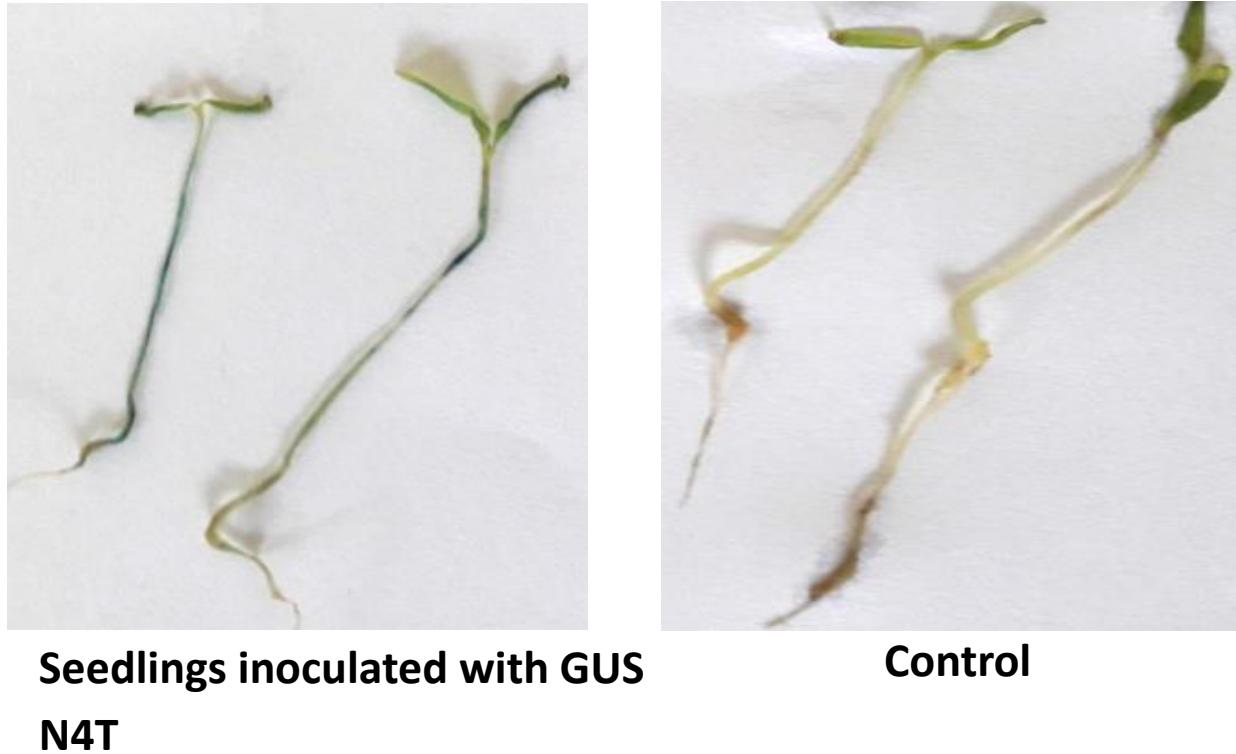

Fig: The colonization of *P. putida* N4T in tomato seedling was confirmed by inoculating of N4T in the seedlings by root dip inoculation method. The *gus* gene carrying plasmid TP003 was conjugated with wild type N4T strain and the transconjugate strain was taken for the study.

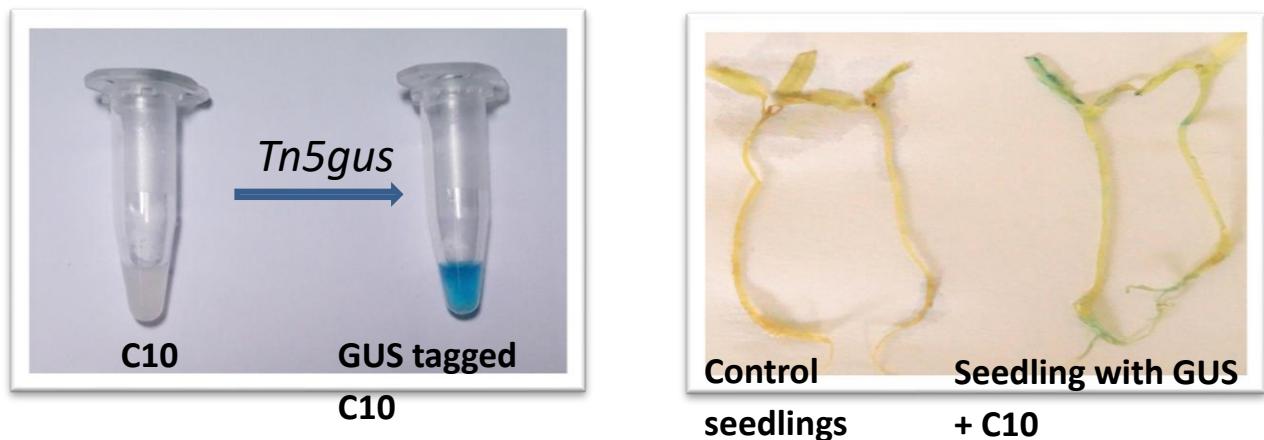

Fig: The colonization of *Enterobacter* C10 in tomato seedling was confirmed by inoculating of C10 in the seedlings by root dip inoculation method. The *gus* gene carrying plasmid TP003 was conjugated with wild type C10 strain and the transconjugate strain was taken for the study.

### Appendix III

#### Prediction of different genes associated with Plant growth promoting traits (PGPT) present in *P. putida* N4T strain

Table: Possible 3714 genes associated with plant growth promoting traits (PGPT) (by all blastp hits) present in the *P. putida* N4T genome. The genome o N4T was sequenced using Illumina platform and was annotated using different tool. The genome information of N4T was submitted in the PLaBAsE for the generation of the possible genes associated with PGPT.

## Appendix IV

### Multigenome synteny matrix of different *Pseudomonas* strains

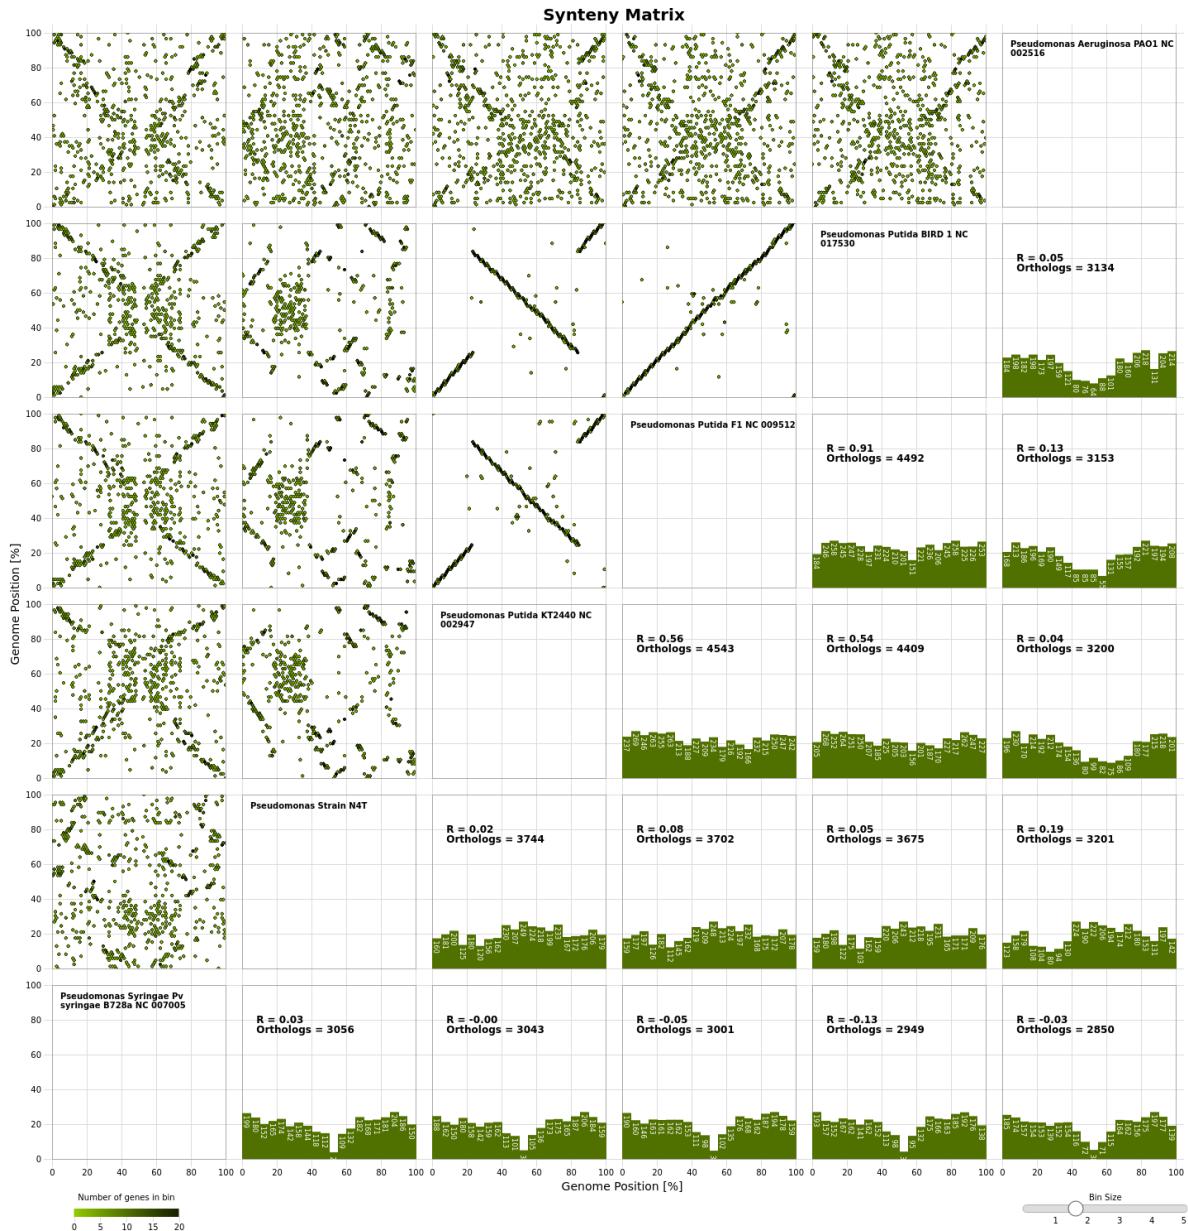

Fig: Synteny matrix. Synteny matrix for the six *Pseudomonas* strains, from top to bottom: *Pseudomonas aeruginosa* PAO1, *Pseudomonas putida* BIRD 1, *Pseudomonas putida* F1, *Pseudomonas putida* KT2440, *Pseudomonas putida* N4T and *Pseudomonas syringae* Pv. *Syringae* B728a. The upper triangular matrix shows synteny plots for every pair wise comparison of the six genomes. The low triangular matrix shows correlation parameters and a histogram of the number of gene pairs in different quantile of the synteny plot.

## List of Publications

### Published
