CHAPTER 1: INTRODUCTION	1-33
1.1. Outline of the thesis	1
1.2. Manuscripts	1-2
1.2.1. History of Manuscripts	2
1.2.2. Different types of ancient and medieval manuscripts	2-3
1.2.3. Materials used in writing	3-7
<i>1.2.3.1. Writing base</i>	3-6
<i>1.2.3.2. Ancient Ink</i>	6-7
1.2.4. <i>Sāncipāt</i> Manuscript writing	7-13
<i>1.2.4.1. Preparation of Sāncipāt</i>	8-11
<i>1.2.4.2. Pigments and herbal materials used in the preparation of Sāncipāt</i>	11-13
1.2.5. Cellulose and lignin extracted from <i>Sāncipāt</i>	13-15
1.2.6. Conservation of Manuscripts	15-23
<i>1.2.6.1. Different process</i>	15-18
<i>1.2.6.2. Sāncipāt conservation</i>	19-23
1.3. Heritage Woodcarvings	23-31
1.3.1. Various types of woodcarvings	23-25

1.3.1.1. <i>History of woodcarvings</i>	25-26
1.3.1.2. <i>Woodcarvings in medieval Assam</i>	26-27
1.3.1.3. <i>Traditional science in the tradition of woodcarving of Assam</i>	27-30
1.3.1.4. <i>Proposed method of restoration of woodcarvings</i>	30-31
1.4. Aim of the present work	31
1.5. Objectives	31
1.6. Plan of research	32-33
CHAPTER 2: MATERIALS AND METHOD	34-48
2.1 Materials	34-37
2.2 Methods	37-48
2.2.1. Preparation of <i>Sāncipāt</i>	37-38
2.2.2. Preparation of solutions	38
2.2.3. Preparation of shades of pigments with binders	38-39
2.2.4. Degumming	39
2.2.5. Antimicrobial assay	39-40
2.2.6. Extraction of cellulose	40-41
2.2.6.1. <i>Preparation of modified cellulose</i>	40
2.2.6.2. <i>Preparation of Neat PVA films</i>	41
2.2.6.3. <i>Preparation of PVA/Cellulose film</i>	41
2.2.7. Extraction of lignin	41-43
2.2.7.1. <i>Preparation of modified lignin</i>	42
2.2.7.2. <i>Preparation of PVA/lignin film</i>	43
2.2.8. Instrumental analysis	43-47
2.2.9. Color co-ordinate study by CIELAB-1986	48
CHAPTER 3: RESULTS AND DISCUSSION	49-134
3.1. Section-1: Structure and properties of <i>Sāncipāt</i>*	49-80
3.1.1. Preparation of <i>Sāncipāt</i>	49
3.1.2. Physicochemical measurements at various stages of preparation of <i>Sāncipāt</i>	50-61

3.1.2.1. <i>Weight loss during degumming</i>	50-51
3.1.2.2. <i>FTIR analysis of Sāncipāt</i>	51-53
3.1.2.3. <i>Evidence from CHN analysis</i>	53
3.1.2.4. <i>Evidence from p-XRD analysis</i>	53-54
3.1.2.5. <i>Evidence from Gloss index analysis</i>	54-55
3.1.2.6. <i>Evidence from Mechanical properties</i>	55-56
3.1.2.7. <i>Evidence from image and elemental analysis</i>	56-57
3.1.2.8. <i>Microbial Essay</i>	57-61
3.1.3. <i>Investigation of different structural and mechanical properties of cellulose and lignin extracted from Sānci bark</i>	61-78
3.1.3.1. <i>Study on moisture content</i>	61-62
3.1.3.2. <i>Evidence from UV-visible spectra</i>	62-63
3.1.3.3. <i>Evidence from FTIR spectra</i>	63-65
3.1.3.4. <i>Evidence from TGA-DTG spectra</i>	65-67
3.1.3.5. <i>Evidence from DSC spectra</i>	67-69
3.1.3.6. <i>Evidence from CHN spectra</i>	69-70
3.1.3.7. <i>Evidence from SEM images</i>	70
3.1.3.8. <i>Evidence from EDXA spectra</i>	70-71
3.1.3.9. <i>Evidence from TEM images</i>	71
3.1.3.10. <i>Evidence from p-XRD spectra</i>	72-73
3.1.3.11. <i>Evidence from GPC analysis</i>	73-74
3.1.3.12. <i>Evidence from Dynamic Light Scattering (DLS) analysis</i>	75-76
3.1.3.13. <i>Investigation of mechanical properties by UTM</i>	77-78
3.1.4. <i>Summary of the section</i>	78-80
3.2. Section-2: Restoration and conservation of Sāncipāt manuscripts*	81-103
3.2.1. <i>Effects of conservative chemicals on old Sāncipāt</i>	81-87
3.2.1.1. <i>Evidence from FTIR</i>	81-82

3.2.1.2. Evidence from XRD	82-83
3.2.1.3. Evidence from image and elemental analysis	84
3.2.1.4. Weight loss after treatment	84
3.2.1.5. Changes in mechanical properties	84-86
3.2.1.6. Leaching of material into solvent	86
3.2.1.7. Effect of solvents on Mahī	87
3.2.2. Effects of conservative chemicals on fresh Sāncipāt	87-93
3.2.2.1. Evidence from UV Visible spectra	87-88
3.2.2.2. Evidence from FTIR spectra	88-89
3.2.2.3. Evidence from p-XRD spectra	89-90
3.2.2.4. Morphological study	90-91
3.2.2.5. Elemental analysis	91
3.2.2.6. Weight loss percentage during degumming	91-92
3.2.2.7. Analysis of mechanical properties	93
3.2.3. Conservation based on traditional recipe of Sāncipāt	93-98
3.2.3.1 Physical cleaning	94-95
3.2.3.2. Mending with freshly prepared Sāncipāt	95
3.2.3.3. Application of Hengul-Hāitāl	96-98
3.2.3.4. Application of Lā-coating	98
3.2.4. Results of piloting of the proposed method of conservation	98-101
3.2.4.1. Comparison of thermal properties	100-101
3.2.4.2. Comparison of C, H and N proportion	101
3.2.5. Summary of the section	101-103
3.3. Section-3: Traditional Science in pigments and recipe of Hengul-Hāitāl painting*	104-119
3.3.1. Physicochemical characterization of the pigments	103-112
3.3.1.1. Morphological and elemental analysis	104-106
3.3.1.2. FTIR Analysis	107-108
3.3.1.3. Raman analysis	108-109
3.3.1.4. XRD analysis	109-110
3.3.1.5. Thermal analysis	110-111
3.3.1.6. Impurities in the pigments	112

3.3.2. Analysis of paints of different shades prepared from the pigments	112-115
3.3.2.1. <i>Zeta potential</i>	112
3.3.2.2. <i>Particle size analysis</i>	112-113
3.3.2.3. <i>Hunter color analysis</i>	113-114
3.3.2.4. <i>Hiding power of the paint formulations</i>	114-115
3.3.3. Traditional science in the painting tradition	115-117
3.3.3.1. <i>Selection of primary color pigments</i>	115
3.3.3.2. <i>Antifungal and insect-repellant component in paint formulations</i>	115-116
3.3.3.3. <i>Avoiding natural erosion and contact by Lā-coating</i>	116
3.3.3.4. <i>Selection of a non-staining natural gum</i>	117
3.3.3.5. <i>Use of primer coating</i>	117
3.3.3.6. <i>Blending pigments with binders to create different shades</i>	117
3.3.4. Summary of the section	118-119
3.4. Section-4: Restoration of heritage woodcarving with Hengul-Hāitāl painting	120-128
3.4.1. Proposed method of restoration	120-121
3.4.2. Results of restoration	121-127
3.4.2.1. <i>Restoration of a Garud Pakhi woodcarving at Bardowā Than, Nagaon</i>	122-124
3.4.2.2. <i>Restoration of heritage woodcarving at Kaliabor College Museum, Nagaon</i>	124
3.4.2.3. <i>Restoration of 24 heritage woodcarvings at Boralimora Satra, Tezpur</i>	124-125
3.4.2.4. <i>Restoration of a larger-than-life size woodcarving at Auniati Satra, Majuli</i>	125-126
3.4.2.5. <i>Glossiness of the traditional paints</i>	127
3.4.3. Social acceptability of the restoration method	127-128
3.4.4. Summary of the section	128

CHAPTER 4: CONCLUSIONS AND FUTURE SCOPES	129-134
4.1. Conclusions	129-130
4.1.1. Structure and properties of <i>Sāncipāt</i>	129-130
4.1.2. Restoration and conservation of <i>Sāncipāt</i> Manuscripts	130-131
4.1.3. Traditional Science in pigments and recipe of Hengul-Hāitāl painting	132-133
4.1.4. Restoration of heritage woodcarving with Hengul-Hāitāl painting	133
4.2. Final Statement	133-134
4.3. Future Scopes	134
