

# CONTENTS

ABSTRACT .....	i-iii
DECLARATION.....	iv
CERTIFICATE.....	v
ACKNOWLEDGMENTS .....	vi-viii
LIST OF FIGURES .....	viii-xv
LIST OF TABLES .....	xvi-xviii
LIST OF ABBREVIATIONS .....	xix-xx
<b>CHAPTER 1: Introduction.....</b>	<b>1-8</b>
1.1. Gastroenteritis and rotavirus .....	1
1.2. History of rotavirus discovery .....	1
1.3. Burden of rotavirus diarrhoea: hospitalization, mortality, and economic burden ...	2
1.4. Global rotavirus strains distribution .....	2
1.5. Rotavirus vaccine in universal immunization program (UIP) .....	3
1.6. Lack of rotavirus surveillance studies in North-eastern states (NER) of India .....	3
1.7. Objectives .....	4
1.8. Bibliography .....	4-8
<b>CHAPTER 2: Review of Literature .....</b>	<b>9-52</b>
2.1 Genome organization .....	9
2.2. Structure of rotavirus .....	12
2.3. Classification .....	13
2.3.1 Group .....	13
2.3.2. Subgroup .....	13
2.3.3. Serotype .....	14
2.3.4. Genotype .....	14
2.3.5. Electropherotype .....	15
2.4. Life cycle .....	15

2.4.1. Rotavirus entry into the cell; attachment, penetration or internalization and vesicular trafficking .....	18
2.4.2. Virus particle uncoating and release of plus strand RNA .....	19
2.4.3. Translation of viral proteins and formation of viroplasm .....	19
2.4.4. Synthesis of RV genome .....	20
2.4.5. Packaging of new virion particle .....	21
2.4.6. Maturation and release from the host cell .....	21
2.5. Pathogenesis and pathology .....	22
2.6. Epidemiology .....	22
2.6.1. Occurrence, reservoir, and transmission of rotavirus-incubation period ....	22
2.6.2. Seasonality and geographical distribution of rotavirus infection .....	23
2.7. Symptoms .....	23
2.8. Diagnosis .....	25
2.9. Treatment .....	26
2.10. Control and prevention .....	26
2.11. Bibliography .....	28-52
2.12. Book chapter manuscript .....	52
<b>CHAPTER 3: Molecular characterization of Group A Rotaviruses (RVAs) in children under five-year-old in Imphal, Manipur, India (Objective 1a) .....</b>	<b>53-93</b>
3.1. Introduction .....	53
3.2. Materials and Methods .....	54-60
3.2.1. Enrolment and data collection .....	56
3.2.2. Study samples .....	57
3.2.3. Rotavirus detection in stool specimens .....	57
3.2.4. Rotavirus viral RNA extraction and polyacrylamide gel electrophoresis ..	58
3.2.5. Co-infection of rotavirus, adenovirus, astrovirus and norovirus .....	58
3.2.6. Genotyping of rotavirus isolates .....	58
3.2.7. PCR for adenovirus, astrovirus and norovirus genes .....	59

3.2.8. Sanger sequencing of VP7, VP4 and VP6 genes and phylogenetic analysis .....	59
3.2.9. Statistical analysis .....	60
3.3. Result ... ..	60-84
3.3.1. Detection of rotavirus antigen .....	60
3.3.2. Seasonality and Clinical manifestations .....	61
3.3.3. Genotype Distribution .....	66
3.3.4. Phylogenetic analysis .....	73
3.3.5. Co-infection of rotavirus with other enteric viruses .....	79
3.4. Discussion .....	84-86
3.5. Conclusion .....	86-87
3.6. Bibliography .....	87
3.7. Manuscript of the chapter .....	93

**CHAPTER 4: Genetic analyses reveal differences in the VP7 And VP4 antigenic epitopes between human rotaviruses circulating in Imphal and rotaviruses in Rotarix And Rotateq (Objective 1b) ..... 94-118**

4.1. Introduction .....	94
4.2. Materials and Methods .....	95-97
4.2.1. Study samples .....	95
4.2.2. RNA extraction and RT-PCR .....	96
4.2.3. Nucleic acid sequencing and sequence analyses .....	96
4.2.4. Glycolation site prediction .....	96
4.2.5. Analysis of the antigenic epitopes of capsid VP7 and VP4 proteins .....	96
4.2.6. Mutation effect analysis .....	96
4.2.7. Data Availability .....	97
4.3. Result .....	97-108

4.3.1. Comparative sequence analysis of VP7 (G1-G4 and G9) and VP4 (P[6] and P[8]) genes of rotavirus strains from Manipur and vaccines strains .....	97
4.3.2. Glycosylation site prediction .....	104
4.3.3. Comparison of the VP7 (G1-G4 and G9) and VP4 (P[6] and P[8]) antigenic epitopes strains from Manipur and vaccines strains .....	104
4.3.4. Mutation effect analysis .....	104
4.4. Discussion .....	109-112
4.5. Conclusion .....	112
4.6. Bibliography .....	112-118
4.7. Manuscript of the chapter .....	118

**CHAPTER 5: Characterization of unusual/untypable rotavirus isolates by electropherotyping and whole genome sequencing (Objective 2) ..... 119-154**

5.1. Introduction .....	119
5.2. Materials and Methods .....	120-124
5.2.1. Electropherotyping (E-types) using Native-PAGE .....	120
5.2.2. Detection of group B and C rotaviruses .....	122
5.2.3. Clinical details of RVA isolate (RM251122016) and sample preparation for whole genome sequencing ... ..	123
5.2.4. Whole genome sequencing (WGS) and phylogenetic analysis .....	124
5.3. Result and Discussion ... ..	127-146
5.3.1. Electropherotyping of ELISA positive and negative stool specimens .....	127
5.3.2. Detection of group B and group C rotaviruses by PCR .....	129
5.3.3. Whole genome sequencing ... ..	129
5.3.4. Genetic distances .....	131
5.3.5. Phylogenetic analyses .....	131
5.3.6. Comparative sequence analysis of VP7, VP4 and VP6 genes of rotavirus strains from Manipur and vaccines strains .....	142
5.4. Conclusion .....	147
5.5. Bibliography .....	147-153

5.6. Publication and manuscript under preparation for the chapter .....	154
<b>CHAPTER 6: Identification of B- and T-cell epitopes of rotavirus proteome and development of chimeric antigen for diagnosis of rotavirus (Objective 3) .....</b>	<b>155-245</b>
6.1. Introduction .....	155
6.2. Materials and methods .....	157
6.2.1. Rotavirus protein sequence and selection of antigenic protein ... ..	158
6.2.2. B-cell epitope prediction .....	159
6.2.3. Prediction of cytotoxic T lymphocytes and helper T-cell epitope .....	159
6.2.4. Epitope immunogenicity, conservancy analysis and allergenicity assessment .....	160
6.2.5. Molecular docking and CTL/HTL mediated immunogenicity prediction	160
6.2.6. Designing epitope-based vaccine constructs .....	161
6.2.7. Structure prediction and validation .....	161
6.2.8. Molecular dynamics simulation of epitope-based vaccine .....	161
6.2.9. Codon optimization, synthesis, expression, and affinity purification of chimeric constructs in E. coli .....	162
6.3. Result & Discussion .....	162
6.3.1. Sequence retrieval and selection of antigenic rotavirus proteins ... ..	162
6.3.2. B-cell epitope mapping .....	164
6.3.3. Computational mapping of T-cell epitopes .....	172
6.3.4. Docking of predicted T-cell epitope .....	179
6.3.5. Designing of multi-epitope subunit vaccine .....	196
6.3.6. Allergenicity, antigenicity and physicochemical parameters of the vaccine constructs .....	202
6.3.7. Prediction of secondary and tertiary structure .....	204
6.3.8. Molecular dynamics simulation and tertiary structure validation .....	208
6.3.9. Surface accessibility and verification of conformational B-cell epitopes in the vaccine construct .....	211
6.3.10. Docking of vaccine constructs with receptor.....	220

6.3.11. Functional validations of predicted B- and T-cell epitopes based on published literature .....	223
6.3.12. Codon optimization, synthesis, expression, and affinity purification of chimeric constructs in E. coli .....	225
6.4. Conclusion .....	229
6.5. Bibliography .....	229-241
6.6. Publication of the chapter .....	242
<b>CHAPTER 7: Overall summary and future prospects .....</b>	<b>243</b>
7.1. Overall summary .....	243
7.2. Future prospects .....	243
