Abstract	i-iv
Declaration by the candidate	v
Certificate of the Supervisor	vi
Acknowledgement	vii-ix
Table of Contents	x-xvi
List of Tables	xvii-xviii
List of Figures	xix-xxii
Glossary of terms, symbols and units	xxiii-xxviii

Name of the Chapters and the sections under each chapter		Page No.
Chapter 1: Introduction		1-8
1.1	Background	1
1.2	Objectives of the Thesis	4
	Bibliography	4
Chapter 2: Review of Literature		9-52
2.1	Rice in India and Assam	9
2.2	Broken rice	10
2.3	Rice noodles	12
2.3.1	Rice varieties used for rice noodles	13
2.3.2	Raw materials functionality for rice noodles	13
2.3.3	Effect of particle size of rice flour	15
2.3.4	Characteristics of rice noodles	16
2.3.4.1	Cooking quality	16
2.3.4.2	Texture quality	17
2.3.4.3	Sensory quality	17
2.3.5	Improvement of rice noodle quality	18
2.4	Rice starch	18

2.5	Modification of starch	19
2.5.1	Heat moisture treatment (HMT)	19
2.5.1.1	Effect of HMT on swelling power and solubility	21
2.5.1.2	Effect of HMT on pasting properties and gel hardness	21
2.5.1.3	Effect of HMT on X-RAY pattern (XRD) and relative crystallinity (RC)	22
2.5.1.4	Effect of HMT on morphology	22
2.5.1.5	Effect of HMT on gelatinization properties	23
2.5.1.6	Effect of HMT on enzyme hydrolysis	23
2.5.1.7	HMT on rice starches	24
2.5.2	Osmotic pressure treatment (OPT)	26
2.5.3	Dual modification of starch	30
2.5.4	Utilization of physically modified flour/starch in rice noodle making	36
	Bibliography	38
<hr/> Chapter 3		53-117
<hr/> Chapter 3A: Comparative analysis of chemical composition, functional, morphological and pasting characteristics of head rice and broken rice		53
<hr/>		
3A.1	Introduction	53
3A.2	Materials and methods	54
3A.2.1	Materials	54
3A.2.2	Physical characteristics of head rice (HR)	55
3A.2.3	Chemicals and reagents	55
3A.2.4	Classification of broken rice	55
3A.2.5	Preparation of rice flours	55
3A.2.6	Chemical composition of rice flours	55
3A.2.6.1	Moisture content	55
3A.2.6.2	Protein content	56
3A.2.6.3	Fat content	56
3A.2.6.4	Ash content	56

3A.2.6.5	Starch content	57
3A.2.6.6	Amylose content	57
3A.2.7	Functional properties of rice flours	58
3A.2.7.1	Loose bulk density (LBD) and packed bulk density (PBD)	58
3A.2.7.2	Water absorption capacity (WAC) and oil absorption capacity (OAC)	58
3A.2.7.3	Swelling power (SP) and solubility (SOL)	59
3A.2.8	Pasting properties and gel hardness	59
3A.2.9	Scanning electron microscopy (SEM)	60
3A.2.10	Statistical analysis	60
3A.3	Results and discussion	60
3A.3.1	Physical properties of HR	60
3A.3.2	Classification of broken rice	60
3A.3.3	Chemical composition	61
3A.3.4	Functional properties	63
3A.3.5	Pasting properties and gel hardness	64
3A.3.6	Morphological studies	66
3A.4	Conclusion	69
Chapter 3B: The effect of varied particle size of medium broken rice flour on the cooking, textural and sensory qualities of gluten free rice noodles		70
3B.1	Introduction	70
3B.2	Materials and methods	71
3B.2.1	Materials	71
3B.2.2	Preparation of rice flours of different particle size	72
3B.2.3	Loose bulk density (LBD) and packed bulk density (PBD)	72
3B.2.4	Water absorption capacity (WAC) and oil absorption capacity (OAC)	72
3B.2.5	Swelling power (SP) and solubility (SOL)	72
3B.2.6	Pasting properties and gel hardness	72
3B.2.7	Preparation of noodles	72
3B.2.7.1	Cooking quality	73

3B.2.7.2	Texture measurement	73
3B.2.7.3	Sensory evaluation	74
3B.2.8	Statistical analysis	74
3B.3	Results and discussion	74
3B.3.1	Functional properties of rice flours	74
3B.3.2	Pasting properties and gel hardness	76
3B.3.3	Cooking properties of rice noodles	78
3B.3.4	Textural properties	81
3B.3.5	Sensory quality	81
3B.4	Conclusion	83

Chapter 3C: Process optimization of osmotic pressure treatment and heat moisture treatment for rice starch isolated from medium broken rice 84

3C.1	Introduction	84
3C.2	Materials and methods	85
3C.2.1	Starch extraction	85
3C.2.2	Proximate analysis	86
3C.2.3	Experimental design for optimization	86
3C.2.3.1	Preparation of OPT starch	88
3C.2.3.2	Preparation of HMT starch	88
3C.2.3.3	Pasting properties	88
3C.2.3.4	Gel hardness	88
3C.2.3.5	Swelling power and solubility	89
3C.3	Results and discussion	89
3C.3.1	Proximate composition and sodium content	89
3C.3.2	Optimization of OPT and HMT processes	89
3C.3.2.1	Fitting models	89
3C.3.3	Analysis of the model	93
3C.3.3.1	Pasting properties	93
3C.3.3.2	Gel hardness	99
3C.3.3.3	Swelling power and Solubility	100
3C.3.4	Optimization and validation of results	105

3C.4	Conclusion	105
	Bibliography	106
Chapter 4: Characteristics of rice starches modified by single and dual heat moisture and osmotic pressure treatments		118-147
4.1	Introduction	118
4.2	Materials and methods	119
4.2.1	Starch isolation	119
4.2.2.	Single modified starches	119
4.2.2.1	Heat moisture treatment of starch	119
4.2.2.2	Osmotic pressure treatment of starch	119
4.2.3	Dual modified starches	119
4.2.3.1	HMT-OPT starch	119
4.2.3.2	OPT-HMT starch	120
4.2.4.	Chemical composition and functional properties	120
4.2.5	Pasting properties and gel texture	120
4.2.6	Morphological observations	120
4.2.6.1	Polarized light microscopy	120
4.2.6.2	Scanning electron microscopy (SEM)	120
4.2.7	Fourier Transform Infrared Spectroscopy (FTIR)	120
4.2.8	Wide-angle X-ray Diffraction (XRD)	121
4.2.9	Thermal properties	121
4.2.10	Rheological properties	121
4.2.11	<i>In vitro</i> starch digestibility	122
4.2.12	Statistical analysis	122
4.3	Results and discussion	123
4.3.1	Chemical composition and functional properties	123
4.3.2	Pasting properties and gel texture	125
4.3.3	Morphological characteristics	128
4.3.3.1	Polarized light microscopy	128
4.3.3.2	Scanning electron microscopy	129
4.3.4	Fourier Transform Infrared Spectroscopy	131
4.3.5	Wide-angle X-ray Diffraction and relative crystallinity	132
4.3.6	Thermal properties	134

4.3.7	Viscoelastic characteristics of native and modified starches	136
4.3.8	<i>In vitro</i> starch digestibility	138
4.4	Conclusion	140
	Bibliography	141
Chapter 5: Quality evaluation of rice noodles developed from blends of medium broken rice flour and rice starches subjected to single and dual heat moisture and osmotic pressure treatments		148-166
5.1	Introduction	148
5.2	Materials and methods	149
5.2.1	Preparation of rice flour	149
5.2.2	Isolation of Starch	149
5.2.3	Heat moisture treatment of starch	149
5.2.4	Osmotic pressure treatment of starch	149
5.2.5	Preparation of dual modified starch	149
5.2.6	Preparation of rice noodle	150
5.2.7	Physical properties of dry noodles	151
5.2.8	Cooking quality	151
5.2.9	Texture measurement	151
5.2.10	Sensory evaluation	151
5.2.11	<i>In vitro</i> digestibility of rice noodles	151
	5.2.11.1 Preparation of enzymes	151
	5.2.11.2 Determination of free glucose (FG), G ₂₀ , G ₁₂₀ and total glucose (TG)	152
5.2.12	Statistical analysis	153
5.3	Results and discussion	153
5.3.1	Physical properties of dry noodles	153
5.3.2	Cooking properties	155
5.3.3	Texture measurement	157
5.3.4	Sensory evaluation	160
5.3.5	<i>In vitro</i> starch digestibility of rice noodles	161
5.4	Conclusion	163
	Bibliography	164

Chapter 6: Conclusions and future work	167-173	
6.1	Conclusions	167
6.1.1	Conclusions of Chapter 3A	167
6.1.2	Conclusions of Chapter 3B	168
6.1.3	Conclusions of Chapter 3C	168
6.1.4	Conclusions of Chapter 4	169
6.1.5	Conclusions of Chapter 5	170
6.2	Future scope of the present study	173
	List of publication	174
	List of poster and papers presented in conferences	174
