Abstract	ii - v
Declaration	vi
Certificate of the Supervisor	vii
Acknowledgement	viii
Table of Contents	ix - xiv
List of Tables	xv - xvi
List of Figures	xvii - xix
List of Abbreviations	xx - xxiii
List of Symbols and Units	xxiv - xxv

Name of the Chapters and the sections under each chapter		Page No.
Chapter 1: Introduction		1 - 15
1.1	Background of the work	2
1.2	Objectives	7
1.3	Bibliography	7
Chapter 2: Review of Literature		16 - 75
2.1	Isolation of yam starch	19
2.2	Composition of yam starch	20
2.3	Morphology of yam starch	23
2.4	Properties of yam starch	25
2.4.1	Water and oil absorption capacity	25
2.4.2	Swelling power and solubility	25
2.4.3	Amylose leaching	29
2.4.4	Thermal properties	29
2.4.5	Pasting properties	32
2.4.6	Freeze thaw stability	37
2.4.7	Rheological properties	38
2.4.8	Digestibility	41
2.5	Modifications of yam starch	45
2.5.1	Physical modification	46

2.5.2	Chemical modifications	53
2.6	Applications	57
2.7	Bibliography	61
Chapter 3: Materials and methods		76 - 101
3.1	Introduction	77
3.2	Materials	77
3.2.1	Collection of yam species	77
3.2.2	Chemicals and reagents	78
3.3	Preparation of yam flours	78
3.4	Extraction of almond protein isolate	79
3.5	Preparation of blends of yam flour and API	80
3.6	Characterization of yam flours, and blends of yam flour and API	80
3.6.1	Proximate analysis of flours and API	80
3.6.2	Antioxidant properties of flours	80
3.6.3	Functional properties of flours	81
3.6.4	Pasting properties of flours	82
3.6.5	ATR-FTIR spectra of flours	82
3.7	Preparation of cookie dough and cookies	82
3.7.1	Rheological characteristics of cookie dough	83
3.8	Characteristics of cookies	83
3.8.1	Proximate analysis of cookies	83
3.8.2	Antioxidant properties of cookies	83
3.8.3	Physical characteristics of cookies	83
3.8.4	Texture analysis (hardness) of cookies	83
3.8.5	Color analysis of cookies	84
3.9	Sensory evaluation of cookies	84
3.10	Isolation of native starch from yam species	84
3.11	Hydrothermal modifications of yam starch	85
3.12	Properties of native and hydrothermally treated starch	85
3.12.1	Proximate analysis of native starch	85
3.12.2	Total amylose content, amylose leaching, water and oil absorption capacity	85
3.12.3	Scanning electron microscopy	86

3.12.4	ATR-FTIR spectroscopy	86
3.12.5	Swelling power and solubility	87
3.12.6	Thermal properties	87
3.12.7	Pasting properties	87
3.12.8	Static and dynamic rheological parameters	87
3.12.9	<i>In vitro</i> starch digestibility	88
3.13	Chemical modifications of yam starch	89
3.13.1	Hydroxypropylation, hydroxypropyl group and molar substitution (MS)	89
3.13.2	Cross-linking modification, phosphorus content and degree of substitution (DS)	90
3.14	Properties of chemically modified starch	92
3.14.1	Scanning electron microscopy	92
3.14.2	ATR-FTIR spectroscopy	92
3.14.3	Swelling power and solubility	92
3.14.4	Paste clarity and freeze thaw stability	92
3.14.5	Static and dynamic rheological parameters	92
3.15	Preparation of films	93
3.16	Properties of films	93
3.16.1	Thickness, moisture content, swelling index and solubility of films	93
3.16.2	Transparency of films	94
3.16.3	Color of films	94
3.16.4	SEM morphology of films	95
3.16.5	FTIR spectra of films	95
3.16.6	XRD spectra of films	95
3.16.7	Tensile strength of films	95
3.16.8	Water vapor permeability (WVP) of films	96
3.17	Shelf life study of grapes	96
3.17.1	Weight loss, pH and TSS	97
3.17.2	Titrateable acidity	97
3.17.3	Total phenolic content and antioxidant activity	97
3.17.4	Total monomeric anthocyanin content	97

3.18	Statistical analysis	98
3.19	Bibliography	98
Chapter 4: Results and discussion		102 - 187
Chapter 4A: Characterization of flours from underutilized <i>Dioscorea</i> species and its utilization in cookies enriched with almond protein isolate		102 - 125
4A.1	Introduction	103
4A.2	Flour characteristics	103
4A.2.1	Proximate analysis and antioxidant properties of almond protein isolate and flours	103
4A.2.2	Functional properties of flours	105
4A.2.3	Pasting properties of flours	106
4A.2.4	ATR-FTIR spectra of flours	109
4A.3	Cookie characteristics	111
4A.3.1	Rheological characteristics of cookie dough	111
4A.3.2	Proximate analysis and antioxidant properties of cookies	113
4A.3.3	Physical characteristics of cookies	116
4A.3.4	Texture analysis of cookies	116
4A.3.5	Color analysis of cookies	117
4A.4	Sensory evaluation of cookies	118
4A.5	Bibliography	119
Chapter 4B: Native and physically modified starches of underutilized yam species, and their functional, thermal, pasting, morphological and rheological properties		126 - 152
4B.1	Introduction	126
4B.2	Proximate composition (on dry basis) of native starches	126
4B.3	Total amylose content, amylose leaching, water and oil absorption capacity	127
4B.4	Scanning electron microscopy	129
4B.5	ATR-FTIR spectroscopy	131
4B.6	Swelling power and solubility	132
4B.7	Thermal properties	134
4B.8	Pasting properties	136

4B.9	Steady shear testing	141
4B.10	Oscillatory testing	142
4B.11	<i>In vitro</i> starch digestibility	146
4B.12	Bibliography	147
Chapter 4C: Hydroxypropylation and cross-linking of underutilized yam starches and their physical and rheological properties		153 - 166
4C.1	Introduction	153
4C.2	Molar substitution and Degree of substitution	153
4C.3	Scanning electron microscopy	154
4C.4	ATR-FTIR spectroscopy	157
4C.5	Swelling power and solubility	157
4C.6	Paste clarity and freeze thaw stability	159
4C.7	Steady shear testing	160
4C.8	Oscillatory testing	162
4C.9	Bibliography	165
Chapter 4D: Native and hydrothermally treated yam starch-based edible film incorporated with walnut oil and its coating to study the shelf life of grapes		167 - 187
4D.1	Introduction	167
4D.2	Properties of films	167
4D.2.1	Thickness, moisture content, swelling index and solubility of films	167
4D.2.2	Transparency and color of films	170
4D.2.3	SEM morphology of films	171
4D.2.4	FTIR spectra of films	173
4D.2.5	XRD spectra of films	174
4D.2.6	Tensile strength of films	175
4D.2.7	Water vapor permeability (WVP) of films	176
4D.3	Shelf life study of grapes	177
4D.3.1	Weight loss, pH and TSS	177
4D.3.2	Titrateable acidity	181
4D.3.3	Total phenolic content and antioxidant activity	181

4D.3.4	Total monomeric anthocyanin content	183
4D.4	Bibliography	184
Chapter 5: Conclusion		188 - 193
5.1	Salient findings of the study	189
5.1.1	Characterization of flours from underutilized <i>Dioscorea</i> species and its utilization in cookies enriched with almond protein isolate	189
5.1.2	Native and physically modified starches of underutilized yam species, and their functional, thermal, pasting, morphological and rheological properties	190
5.1.3	Hydroxypropylation and cross-linking of underutilized yam starches and their physical and rheological properties	191
5.1.4	Native and hydrothermally treated yam starch-based edible film incorporated with walnut oil and its coating to study the shelf life of grapes	192
5.2	Future scope	193
List of Publications and Conferences		194
