<b>1 Introduction and preliminaries</b>	1
1.1 Notations and results from Graph Theory . . . . .	4
1.2 Notations and results from Group Theory . . . . .	7
1.2.1 Commuting probability of finite groups . . . . .	9
1.3 Notations and results from Ring Theory . . . . .	11
1.3.1 Commuting probability of finite rings . . . . .	12
1.4 Non-commuting graph and its generalizations . . . . .	15
1.4.1 Non-commuting graph of a finite group . . . . .	15
1.4.2 Relative non-commuting graph and $g$ -noncommuting graph of a fi- nite group . . . . .	19
1.4.3 Non-commuting graph of a finite ring . . . . .	21
<b>2 Various energies of non-commuting graphs of finite groups</b>	24
2.1 $\frac{G}{Z(G)}$ is isomorphic to $D_{2m}$ . . . . .	25
2.1.1 The dihedral groups, $D_{2m}$ . . . . .	25
2.1.2 The Quasidihedral groups, $QD_{2^n}$ . . . . .	32
2.1.3 The groups $M_{2rs}$ . . . . .	36

2.1.4	The dicyclic groups, $Q_{4n}$	45
2.1.5	The groups $U_{6n}$	48
2.2	$\frac{G}{Z(G)}$ is isomorphic to $\mathbb{Z}_p \times \mathbb{Z}_p$	55
2.3	$\frac{G}{Z(G)}$ is isomorphic to $Sz(2)$	57
2.4	Some more classes of groups	59
2.4.1	The Hanaki groups	59
2.4.2	The semi-dihedral groups, $SD_{8n}$	62
2.4.3	The groups, $V_{8n}$	69
2.4.4	The Frobenious groups of order $pq$	77
2.5	Some implications of the preceding findings	79
2.6	Conclusion	86
<b>3</b>	<b>Relative <math>g</math>-noncommuting graph of a finite group</b>	<b>87</b>
3.1	Preliminary observations	87
3.2	Vertex degree and other properties	88
3.3	Relation between $\Gamma_{H,G}^g$ and $\text{Pr}_g(H,G)$	93
3.4	Bounds for $ e(\Gamma_{H,G}^g) $	99
3.5	Conclusion	104
<b>4</b>	<b>An induced subgraph of relative <math>g</math>-noncommuting graph of a finite group</b>	<b>105</b>
4.1	Vertex degree and a consequence	107
4.2	Connectivity and diameter	113
4.3	Conclusion	122
<b>5</b>	<b>Various spectra and energies of non-commuting graphs of finite rings</b>	<b>123</b>
5.1	Various spectra and energies	123
5.2	Some consequences	143
5.3	Conclusion	148
<b>6</b>	<b>On <math>r</math>-noncommuting graphs of finite rings</b>	<b>149</b>
6.1	Some properties of $\Gamma_R^r$	150
6.2	An induced subgraph of $r$ -noncommuting graph	154

6.3 Conclusion . . . . .	168
<b>7 Relative <math>r</math>-noncommuting graphs of finite rings</b>	<b>169</b>
7.1 Preliminary observations . . . . .	170
7.2 Vertex degree and consequences . . . . .	170
7.3 $\Gamma_{S,R}^r$ of isoclinic pairs . . . . .	175
7.4 Connecting $\Gamma_{S,R}^r$ with $\text{Pr}_r(S, R)$ . . . . .	176
7.5 An induced subgraph of $\Gamma_{S,R}^r$ . . . . .	184
7.6 Conclusion . . . . .	188
<b>8 Conclusion and problems for future research</b>	<b>189</b>
8.1 Problems for future research . . . . .	191
<b>Bibliography</b>	<b>193</b>
<b>Index</b>	<b>203</b>
<b>List of published/communicated papers</b>	
<b>List of conferences attended</b>
