

CONTENTS OF THE THESIS

<i>Content</i>	<i>Page No.</i>
Abstract.....	i
Declaration.....	iii
Certificate of Supervisor.....	iv
Certificate of Examiners.....	v
Preface.....	vi
Acknowledgements.....	vii
Contents of the Thesis.....	ix
List of Abbreviations and Symbols.....	xiv
List of Schemes.....	xviii
List of Figures	xix
List of Tables.....	xxiv

Chapter One

General Introduction

Highlights	1-1
1.1. Introduction.....	1-2
1.2. Background.....	1-4
1.3. Materials and methods	1-7
1.3.1. Materials	1-7
1.3.1.1. Epoxy.....	1-7
1.3.1.2. Micro and nano-reinforcing agents	1-13
1.3.2. Preparation methods	1-18
1.3.2.1. Preparation of epoxy	1-18
1.3.2.2 Preparation of reinforcing agents	1-19
1.3.2.3. Insights into fabrication of epoxy composites.....	1-20
1.4. Characterization and analytical techniques	1-23
1.4.1. Spectroscopic techniques.....	1-23
1.4.2. Diffraction and scattering techniques	1-26
1.4.3. Microscopic techniques	1-27
1.4.4. Testing methods.....	1-29

1.5. Properties	1-32
1.5.1. Physical properties	1-33
1.5.2. Mechanical properties	1-33
1.5.3. Thermal properties	1-34
1.5.4. Weathering resistance	1-35
1.5.5. Biological properties	1-35
1.5.6. Barrier properties	1-37
1.5.7. Fire resistance	1-37
1.6. Applications	1-37
1.7. Scopes and objectives of the present study	1-39
1.8. Plan of research	1-40
References	1-41

Chapter Two

Synthesis, characterization, and properties evaluation of tannic acid-based epoxy and its thermoset

Highlights.....	2-1
2.1. Introduction.....	2-2
2.2. Experimental	2-3
2.2.1. Materials	2-3
2.2.2. Instrumentation	2-6
2.2.3. Methods.....	2-7
2.2.3.1. Preparation of the epoxy	2-7
2.2.3.2. Curing of the epoxy	2-8
2.2.3.3. Determination of physical properties	2-8
2.2.3.4. Determination of antioxidant activity	2-9
2.2.3.5. Biodegradation study	2-9
2.3. Results and discussion	2-10
2.3.1. Synthesis and inspection of the resin	2-10
2.3.2. Physical properties of the resin and the thermoset.....	2-13
2.3.3. Curing study.....	2-15
2.3.4. Mechanical properties and adhesive strength	2-17
2.3.5. Thermal properties	2-20
2.3.6. Chemical resistance	2-21
2.3.7. Transparency.....	2-21

2.3.8. Antioxidant activity	2-23
2.3.9. Biodegradation study	2-23
2.4. Conclusion	2-25
References.....	2-26

Chapter Three

Thermosetting biocomposites of waste tea fibers and tannic acid-based epoxy

Highlights	3-1
3.1. Introduction.....	3-2
3.2. Experimental.....	3-3
3.2.1. Materials	3-3
3.2.2. Instrumentation	3-4
3.2.3. Methods	3-4
3.2.3.1. Fiber isolation and modification	3-4
3.2.3.2. Functionalization of MTF with MAH	3-4
3.2.3.3. Preparation of bio-based epoxy	3-5
3.2.3.4. Fabrication of the biocomposite	3-5
3.2.3.5. Aging tests	3-6
3.2.3.6. Water absorption capacity	3-8
3.2.3.7 Soil burial test	3-8
3.3. Results and discussion	3-8
3.3.1. FTIR spectral study.....	3-9
3.3.2 Thermal analysis.....	3-11
3.3.3. Mechanical properties.....	3-13
3.3.4. Morphology	3-15
3.3.5. Aging tests	3-16
3.3.5.1. Chemical aging	3-16
3.3.5.2. UV and heat aging	3-18
3.3.5.3 Solvent aging	3-20
3.3.6. Water absorption.....	3-21
3.3.7. Soil degradation	3-23
3.4. Conclusion	3-24
References.....	3-25

Chapter Four

Sustainable nanocomposite thermoset of tannic acid-based epoxy and waste tea derived modified cellulose nanofibers

Highlights.....	4-1
4.1. Introduction.....	4-2
4.2. Experimental.....	4-3
4.2.1. Materials.....	4-3
4.2.2. Instrumentation.....	4-4
4.2.3. Methods.....	4-5
4.2.3.1. Extraction of CNFs from factory tea waste.....	4-5
4.2.3.2. Functionalization of CNFs.....	4-6
4.2.3.3. Preparation of TAE.....	4-6
4.2.3.4. Fabrication of epoxy nanocomposite.....	4-6
4.2.3.5. Anticorrosion study.....	4-7
4.3. Results and discussion.....	4-7
4.3.1. Chemical and morphological characterization of CNFs and <i>f</i> -CNFs.....	4-8
4.3.2. Fabrication and characterization of nanocomposite.....	4-12
4.3.3. Mechanical properties.....	4-15
4.3.4. Thermal properties.....	4-17
4.3.5. Anticorrosion study.....	4-20
4.3.6. Chemical resistance.....	4-24
4.3.7. Biodegradation behavior.....	4-24
4.4. Conclusion.....	4-26
References.....	4-27

Chapter Five

Nanocomposite thermoset of tannic acid-based epoxy and iron oxide nanoparticle decorated cellulose nanofibers

Highlights.....	5-1
5.1. Introduction.....	5-2
5.2. Experimental.....	5-3
5.2.1. Materials.....	5-3
5.2.2. Instrumentation.....	5-4
5.2.3. Methods.....	5-5
5.2.3.1. Preparation of tea extract (TE).....	5-5

5.2.3.2. Extraction of CNFs from WTFs	5-5
5.2.3.3. Preparation of the IONP@CNF nanohybrid.....	5-5
5.2.3.4. Fabrication of the epoxy nanocomposite	5-5
5.2.3.5. Determination of total phenolic content	5-6
5.2.3.6. Hemolytic activity study	5-6
5.2.3.7. <i>In vitro</i> biocompatibility assessment	5-7
5.2.3.8. Ampicillin (AC) loading into the nanocomposites.....	5-7
5.2.3.9. Ampicillin (AC) release and kinetic study	5-8
5.2.3.10. Antimicrobial activity study	5-8
5.3. Results and discussion	5-9
5.3.1. Biogenic synthesis of IONP@CNFs.....	5-9
5.3.2. Characterization of the nanohybrid	5-10
5.3.3. Morphology study of the nanohybrid	5-14
5.3.4. Fabrication and characterization of the nanocomposites.....	5-15
5.3.5. Thermal properties.....	5-17
5.3.6. Mechanical properties.....	5-19
5.3.7. Ampicillin encapsulation and release study	5-22
5.3.7.1. Effect of pH on ampicillin release	5-23
5.3.7.2. Kinetic study	5-23
5.3.8. Antibacterial study of the drug-loaded nanocomposites	5-25
5.3.9. Hemolysis study.....	5-27
5.3.10. <i>In vitro</i> biocompatibility study	5-29
5.3.11. Biodegradation study	5-30
5.4. Conclusion	5-31
References.....	5-32

Chapter Six

Summary, conclusions and future avenues

Highlights	6-1
6.1. Summary and conclusions	6-2
6.2. Future avenues	6-5
List of Publications	A-1
