Abstract	i-iv
Declaration by the candidate	v
Certificate of the supervisor	vi
Certificate of the co-supervisor	vii
Certificate of the external examiner and ODEC	viii
Acknowledgement	ix-x
Contents	xi
Abbreviations and symbols used	xiii
List of Figures	xix
List of Scheme	xxiii
List of Tables	xxiii
Chapter 1	
General Introduction	
1.1 Current energy resources and related issues	1.1-1.4
1.2 Hydrogen evolution <i>via</i> water splitting reaction	1.4-1.8
1.3 Mechanism involved in hydrogen evolution reaction	1.8-1.20
1.4 Supercapacitor	1.20-1.24
1.5 Objectives	1.25-1.26
1.6 Plan of Research	1.26-1.27
1.7 References	1.27-1.40
Chapter 2	
Modulation of electronic density states of carbon in Expanded Graphite via multifaceted Cu doped Co₂P particle for electrocatalytic hydrogen evolution reaction in aqueous acidic medium	
2.1 Introduction	2.1-2.4
2.2 Materials and methods	2.4-2.7
2.3 Results and discussion	2.7-2.23
2.4 Conclusion	2.24
2.5 References	2.24-2.30
Chapter 3	
Iron doped titania/multiwalled carbon nanotube nanocomposite: a robust electrocatalyst for hydrogen evolution reaction in aqueous acidic medium	
3.1 Introduction	3.1-3.3
3.2 Materials and methods	3.3-3.5
3.3 Results and discussion	3.6-3.15
3.4 Conclusion	3.15-3.16
3.5 References	3.16-3.20

Chapter 4

Iron doped titania/ Polyaniline composite: an efficient electrocatalyst for hydrogen evolution reaction in acidic medium

4.1	Introduction	4.1-4.2
4.2	Materials and methods	4.2-4.4
4.3	Results and discussion	4.4-4.12
4.4	Conclusion	4.13
4.5	References	4.13-4.16

Chapter 5: Bi-functional hierarchically porous N, P co-doped reduced graphene oxide aerogel as a symmetric supercapacitor material and a robust hydrogen evolution reaction electrocatalyst

5.1	Introduction	5.1-5.3
	Materials and methods	5.3-5.5
	Results and discussion	5.5-5.22
	Conclusion	5.22
	References	5.23-5.28

Chapter 6: Conclusion and future scope

	Conclusion	6.1-6.2
	Future scope	6.2
