## TEZPUR UNIVERSITY

(A Central University established by an Act of Parliament)

Napaam-784028, Tezpur, Sonitpur, Assam, India

### DECLARATION BY THE CANDIDATE

I, Ms. Dikshita Dowerah, hereby, declare that the thesis entitled “**Studies on Structure and Dynamics of Bridged Nucleic Acid based ASOs Using Density Functional Theory and Molecular Dynamics Approach for Targeted RNA Therapeutics**” has been submitted to the Department of Chemical Sciences under the School of Sciences of Tezpur University, in partial fulfilment of the requirements for the award of the degree of **Doctor of Philosophy in Chemical Sciences**. This thesis is a record of original research work carried out by me under the guidance of **Prof. Ramesh Ch. Deka** and the contents of the thesis, in full or in part, has not been previously considered for the award of any degree, diploma, associateship, fellowship or any other similar title or recognition from any University, Institute or other Organization.

I further declare that; I have duly acknowledged all sources of assistance and any text, figures, results or design that are not of my own are appropriately referenced in order to give credit to the original author(s).

Date: ...28/12/2023

Place: Tezpur University

## CERTIFICATE FROM THE SUPERVISOR

This is to certify that the thesis entitled “**Studies on Structure and Dynamics of Bridged Nucleic Acid based ASOs Using Density Functional Theory and Molecular Dynamics Approach for Targeted RNA Therapeutics**” has been submitted by **Ms. Dikshita Dowerah** to the Department of Chemical Sciences under the School of Sciences of Tezpur University, in partial fulfilment of the requirements for the award of the degree of **Doctor of Philosophy in Chemical Sciences**. This thesis is a record of bona fide research work carried out by her under my supervision and guidance. She has been registered, completed her PhD course work and the thesis presented is worthy of consideration for the award of PhD degree.

All help received by her from various sources have been duly acknowledged.

The contents of this thesis, in full or in part, have not been submitted for the award of any degree, diploma, associateship, fellowship or any other similar title or recognition from any University, Institute or other Organization.

**Date:** 28.11.2023.

**Place:** Tezpur University

## ACKNOWLEDGEMENT

This work is not just the result of my comprehension of the subject; it is also the result of many people's counsel, encouragement, support, collaboration and cooperation, including my parents, relatives, friends, and well-wishers. I take the opportunity to express my gratitude to everyone who has helped me along the way, directly or indirectly, to successfully complete this wonderful journey.

At the onset, I deem it a privilege to express my deep sense of gratitude and heartfelt thanks to my research supervisor **Prof. Ramesh Ch. Deka Sir**, Department of Chemical Sciences, Tezpur University (currently Vice-Chancellor, Cotton University). I am highly grateful for his invaluable guidance and constant supervision from the beginning to the end of this research work. His dynamic personality, insightful nature and a positive approach towards life had a great deal of impact on my life and my life-choices.

I express my sincere thanks to my Doctoral Committee members **Prof. Panchanan Puzari Sir** and **Prof. Suvendra Kumar Ray Sir** for their guidance, support and suggestions from time to time without whom this thesis would have not seen the light of the day. I appreciate the considerable time and effort they have invested in clearing my doubts, that paved the way in deciding how I wanted my research to turn out.

I wholeheartedly thank **All the Faculty Members of the Department of Chemical Sciences**, Tezpur University for helping me overcome the obstacles that I faced throughout my research period. I owe special gratitude to all the **Research Scholars, Seniors** and **Juniors** of the entire Department of Chemical Sciences, **All the Technical and Non-technical Staff** of Tezpur University fraternity for their unprecedented help. I am thankful to **Prof. Panchanan Puzari**, HoD; and **Prof. Ashim Jyoti Thakur** (former HoD) and **Prof. Ruli Bora** (former HoD), Department of Chemical Science for their support in the department in all circumstances.

I express my gratitude to **Prof. S. N. Singh**, Vice-Chancellor; and **Prof. M. K. Chaudhuri** (former Vice-Chancellor) and **Prof. V. K. Jain** (former Vice-Chancellor) of Tezpur University for giving me the opportunity and facility to carry out my research work smoothly inside the campus.

At this juncture, it is pertinent to acknowledge **Dr. Uddhaves B. Sonavane, Dr. Rajendra R. Joshi** and **Mallikarjunachari V. N. Uppuladinne**, Medical & Bioinformatics Applications Group, Centre for Development of Advanced Computing (C-DAC), Pune, India. I am grateful for their suggestions, guidance and availability round the clock to help me out always. This research work was financially supported by Department of Biotechnology (DBT), Govt. of India (Project No. BT/PR16182/NER/95/92/2015). I also acknowledge Tezpur University computing facilities and the National Supercomputing Mission (NSM) & Ministry of Electronics and Information Technology (MeitY), Govt of India and the Bioinformatics Resources and Applications Facility (BRAAF) of C-DAC, Pune. I am thankful to **Prof. Nashreen S. Islam, Prof. Tarun K. Maji, Dr. Nima D. Namsa, Dr. Subrata Paul, Dr. Ajanta Deka, Gitasri Baa, Hiya, Anutee, Dama Devi, Udeshna** for collaborating with me at various stages of my doctoral research carrier. Also, to mention **Sanjeev Pran Mahanta Sir** and **Gaurangi Maitra Mam**. I have learnt a lot from the discussions I had with them and I am grateful for their help and co-operation.

I also express my gratitude to the **Reviewers** and **Referees** who accessed my work before the papers were published and offered insightful criticism and recommendations that were really helpful. Them being the greatest critics of my research; I learned a lot from them about many factors to take into account in order to strengthen and refine the research work.

I shall forever be indebted to my lab mates **Nand Bhaiya, Subrata Dada, Dharitri Baa, Rasna Baa, Pangkita Baa, Pakiza Baa, Debajyoti Dada, Snigdha Baa, Plaban Dada, Satya Dada, Saheen Baa, Julie Baa, Sudakshina, Nishant, Shilpa, Partha, Srutishree, Moumita, Priyanka, Ambalika, Gaurisankar, Najima Baa** and **Haimyapriya** for their constant encouragement and cooperation and who were always there in times of need. I thank each and every one of them for their incessant help. Because of them sitting in the lab and doing all the research work will forever remain a beautiful memory. **Champak Daa** deserves special mention for helping me immensely with all the Linux Bugs.

I consider myself lucky to have warm-hearted friends, seniors and juniors like **Bijoy, Debabrat, Debanga, Abhishek, Hridip, Nimi, Hiya, Prantika, Sangeeta, Sudhangshu, Suman, Shahtaz, Barsha, Tushmita, Sazida** to name a few from the Dept. of Chem. Sciences. I am extremely thankful to them for giving me a helping hand always and for making this journey a pleasant one.

I express my gratitude to the wardens, boarders, and staff of the **Pobitora Madam Curie Womens Hostel** for creating a hospitable and healthful environment to stay in. A special thanks to **Nimi, Hiya, Trishna Baa, Prarthana Baa, Hilly Baa, Bhaswati Baa, KD Baa, Nun Di, Anutee, Parveen** from Pobitora. People from my old hostel, **Prgajyotika Womens Hostel**, whom I would like to remember always include **Maidang, Duna, Tribeni, Luku Baa, Roktima, Banjita, Silpi, Sanjana & Deepmoni (my ex-roomies), Arundhati baa**. It is because of them hostel was home. I would also like to thank **Nayanmoni Gogoi Sir & family** for treating us with good meals on various happy occasions.

My Tezpur University memory is nothing without **Plaban Daa, Nishant, Malua, Babu, Tapu, Vishal, Surajit** with whom I have some of the most beautiful memories of the Campus. There are a ton of other friends who have supported me at all my good and bad times; it is impossible to name them all, but I am grateful to them. My future self will be aided by the life I have learned from them.

My pillars of strength **Hati, Gori, Pori** and **Suku**, who were always there for me whenever I needed them. Thank you, my loves, for staying with me in my darkest times. Also, to mention **Reema, Mandira, Mayuri, Richika, Joyshree, Neha** my friends from St. Mary's and Salt Brook. The journey would have not been this easy without their love, support and constant motivation.

I am thankful to **God** for giving me the strength to accomplish the journey and for giving me this beautiful life and that I got to know all of the amazing people mentioned above.

Lastly, my deepest acknowledgement to **Maa (Mrs. Rekha Jyoti Gogoi)** and **Papa (Mr. Putul Dowerah)** and my younger sister **Thunu (Kashyapi Dowerah)**. Thank you for everything!

“জীৱনত একোহৰে অভাৱ হবলৈ নিদি, আমাৰ সপোনবোৰক দিঠকত পৰিণত কৰিবলৈ আৰু জীৱনবাটত আগবাঢ়িবলৈ দিয়া সকলোখিনি স্বাধীনতাৰ বাবে তোমালোকৰ ওচৰত মই চিৰঋণী” – ধুনু।

Dikshita Dowerah (দীক্ষিতা দুৱৰা)

Figure 6.9	RMSF plots of the ASO/RNA duplexes (a) PS-DNA/RNA-RNaseH (b) PS-MOE/RNA-RNaseH (c) PS-LNA/RNA-RNaseH (d) PS-A1/RNA-RNaseH (e) PS-A2/RNA-RNaseH (f) PS-A3/RNA-RNaseH (g) PS-A4/RNA-RNaseH and (h) PS-A5/RNA-RNaseH of simulation trajectories from two data sets [Set-I & Set-II] each simulated for 1 $\mu$ s simulation time.	6.27

## Chapter 7: Conclusion and Future Prospects

Page No.

Scheme 7.1	Schematic representation of QM/MM domain of the modified ASO/RNA hybrid gapmer-type duplexes complexed with dimeric RNase H catalytic domain.	7.4
------------	---	-----

## LIST OF TABLES

Chapter 3: Bridged Nucleic Acid ASOs over Locked Nucleic Acid ASOs and their impact on the structure and stability of ASO/RNA duplexes	Page No.
Table 3.1 Modification details of LNA; N-MeO-amino-BNA; 2',4'-BNA <sup>NC</sup> [NH]; 2',4'-BNA <sup>NC</sup> [NMe]; N-Me-aminooxy-BNA antisense modifications holding normal phosphate backbone (Z1-Z5) and PS-LNA; PS-N-MeO-amino-BNA; PS-2',4'-BNA <sup>NC</sup> [NH]; PS-2',4'-BNA <sup>NC</sup> [NMe]; PS-N-Me-aminooxy-BNA antisense modifications holding phosphorothioate (PS) backbone (Z6-Z10) each containing nucleobases Adenine (A), Guanine (G), 5-Methylcytosine (C) and Thymine (T) along with the name codes used in the present work.	3.9
Table 3.2 The $E_{\text{HOMO}}$ , $E_{\text{LUMO}}$ , $\Delta E_{\text{gap}}$ , Global hardness ( $\eta$ ), Global softness (S), Chemical potential ( $\mu$ ) and Electrophilicity ( $\omega$ ) of pristine nucleotides Adenine (A), Guanine (G), Cytosine (C) and Thymine (T) calculated at the M06-2X/6-311G(d,p) level of theory.	3.11
Table 3.3 The chi ( $\chi$ ) torsion angle, $E_{\text{HOMO}}$ , $E_{\text{LUMO}}$ and $\Delta E_{\text{gap}}$ of LNA; N-MeO-amino-BNA; 2',4'-BNA <sup>NC</sup> [NH]; 2',4'-BNA <sup>NC</sup> [NMe]; N-Me-aminooxy-BNA monomer nucleotides (Z1-Z5) and PS-LNA; PS-N-MeO-amino-BNA; PS-2',4'-BNA <sup>NC</sup> [NH]; PS-2',4'-BNA <sup>NC</sup> [NMe]; PS-N-Me-aminooxy-BNA monomer nucleotides (Z6-Z10, S-conformers) with their respective nucleobases Adenine (A), Guanine (G), 5-Methylcytosine (C) and Thymine (T) calculated at the M06-2X/6-311G(d,p) level of theory.	3.14
Table 3.4 Global hardness ( $\eta$ ) Global softness (S) Chemical potential ( $\mu$ ) and Electrophilicity ( $\omega$ ) of LNA; N-MeO-amino-BNA; 2',4'-BNA <sup>NC</sup> [NH]; 2',4'-BNA <sup>NC</sup> [NMe] and N-Me-aminooxy-BNA monomer nucleotides holding normal phosphate backbone (Z1-Z5) each containing nucleobases Adenine (A), Guanine (G), 5-Methylcytosine (C) and Thymine (T) calculated at the M06-2X/6-311G(d,p) level of theory.	3.23
Table 3.5 Global hardness ( $\eta$ ), Global softness (S), Chemical potential ( $\mu$ ) and Electrophilicity ( $\omega$ ) of PS-LNA; PS-N-MeO-amino-BNA; PS-2',4'-BNA <sup>NC</sup> [NH]; PS-2',4'-BNA <sup>NC</sup> [NMe] and	3.25

PS-N-Me-aminooxy-BNA monomer nucleotides holding phosphorothioate (PS) backbone (Z6-Z10, S conformers) each containing nucleobases Adenine (A), Guanine (G), 5-Methylcytosine (C) and Thymine (T) calculated at the M06-2X/6-311G(d,p) level of theory.

Table 3.6	SASA and MM-GBSA free energies of 14-mer ASO/RNA duplexes (a) DNA/RNA (b) PS-LNA/RNA (c) PS-N-MeO-amino-BNA/RNA (d) PS-2',4'-BNA <sup>NC</sup> [NH]/RNA (e) PS-2',4'-BNA <sup>NC</sup> [NMe]/RNA (f) PS-N-Me-aminooxy-BNA/RNA presenting two data sets (Set-I & Set-II) each simulated for 1 $\mu$ s simulation time.	3.47
-----------	---	------

<b>Chapter 4: Design of LNA analogues using combined Density Functional Theory and Molecular Dynamics approach for RNA therapeutics</b>	<b>Page No.</b>
---	-----------------

Table 4.1	Modification details of the proposed LNA analogue antisense modifications A1, A2, A3, A4, A5 each containing nucleobases Adenine (A), Guanine (G), Cytosine (C), Thymine (T) and Uracil (U), respectively along with the name codes used in the present work.	4.4
-----------	---	-----

Table 4.2	The chi ( $\chi$ ) torsion angle, electronic energy, dipole moment, $E_{\text{HOMO}}$ , $E_{\text{LUMO}}$ and $\Delta E_{\text{gap}}$ of the proposed LNA analogue antisense modifications A1, A2, A3, A4, A5 with their respective nucleobases Adenine(A), Guanine(G), Cytosine(C), Thymine(T) and Uracil(U) calculated at the M06-2X/6-311G(d,p) level of theory.	4.13
-----------	---	------

Table 4.3	Global hardness ( $\eta$ ), Global softness (S), Chemical potential ( $\mu$ ) and Electrophilicity ( $\omega$ ) of the proposed LNA analogue antisense modifications A1, A2, A3, A4, A5 with their respective nucleobases Adenine(A), Guanine(G), Cytosine(C), Thymine(T) and Uracil(U) calculated at the M06-2X/6-311G(d,p) level of theory.	4.21
-----------	---	------

Table 4.4	SASA and MM-GBSA free energies of the 14-mer ASO/RNA duplexes (a) LNA/RNA (b) A1/RNA (c) A2/RNA (d) A3/RNA (e) A4/RNA and (f) A5/RNA for the entire simulation trajectory.	4.37
-----------	--	------

**Chapter 5: A Study on Structure and Dynamics of wild type DNA/DNA, RNA/DNA and RNA/RNA hybrid duplexes in complex with Human RNase H catalytic domain.** Page No.

Table 5.1 Participating residues of (d) DNA/DNA-RNaseH (e) RNA/DNA-RNaseH and (f) RNA/RNA-RNaseH complexes with HBond interactions > 50 % occupancies of simulation trajectories from two data sets [Set-I & Set-II] each simulated for 1  $\mu$ s simulation time. 5.24

Table 5.2 SASA of (a) DNA/DNA (b) RNA/DNA, (c) RNA/RNA, (d) DNA/DNA-RNaseH (e) RNA/DNA-RNaseH and (f) RNA/RNA-RNaseH of simulation trajectories from two data sets [Set-I & Set-II] each simulated for 1  $\mu$ s simulation time. 5.25

Table 5.3 MM-GBSA of (d) DNA/DNA-RNaseH (e) RNA/DNA-RNaseH and (f) RNA/RNA-RNaseH complexes of simulation trajectories from two data sets [Set-I & Set-II] each simulated for 1  $\mu$ s simulation time. 5.27

**Chapter 6: A Study on Structure and Dynamics of modified ASO/RNA hybrid gapmer type duplexes in complex with Human RNase H catalytic domain.** Page No.

Table 6.1 MM-GBSA of the ASO/RNA duplexes (a) PS-DNA/RNA-RNaseH (b) PS-MOE/RNA-RNaseH (c) PS-LNA/RNA-RNaseH (d) PS-A1/RNA-RNaseH (e) PS-A2/RNA-RNaseH (f) PS-A3/RNA-RNaseH (g) PS-A4/RNA-RNaseH and (h) PS-A5/RNA-RNaseH of simulation trajectories from data sets [Set-I & Set-II] each simulated for 1  $\mu$ s simulation time. 6.11

Table 6.2 Participating residues of the ASO/RNA duplexes (a) PS-DNA/RNA-RNaseH (b) PS-MOE/RNA-RNaseH (c) PS-LNA/RNA-RNaseH (d) PS-A1/RNA-RNaseH (e) PS-A2/RNA-RNaseH (f) PS-A3/RNA-RNaseH (g) PS-A4/RNA-RNaseH and (h) PS-A5/RNA-RNaseH with HBond interactions > 50 % occupancies of simulation trajectories from two data sets [Set-I & Set-II] each simulated for 1  $\mu$ s simulation time. 6.28-6.29

Table 6.3 SASA of the ASO/RNA duplexes (a) PS-DNA/RNA-RNaseH (b) PS-MOE/RNA-RNaseH (c) PS-LNA/RNA-RNaseH (d) PS-A1/RNA-RNaseH (e) PS-A2/RNA-RNaseH 6.30

(f) PS-A3/RNA-RNaseH (g) PS-A4/RNA-RNaseH and (h) PS-A5/RNA-RNaseH of simulation trajectories from two data sets [Set-I & Set-II] each simulated for 1  $\mu$ s simulation time.

---

## ABBREVIATIONS AND SYMBOLS

ALT	Alanine Transaminase
AMBER	Assisted Model Building with Energy Refinement
ASO	Antisense Oligonucleotide
AST	Aspartate Transferase
BNA	Bridged Nucleic Acid
CADD	Computer-Aided Drug Design
CeNA	Cyclohexene Nucleic Acids
cEt	Constrained Ethyl
CG	Coarse-Grained
CHARMM	Chemistry at Harvard Macromolecular Mechanics
CML	Chronic Myeloid Leukaemia
cMOE	Constrained Methoxyethyl
CPCM	Conductor-like Polarizable Continuum Model
CPP	Cell Penetrating Peptides
DFT	Density Functional Theory
DMD	Duchenne Muscular Dystrophy
DNA	Deoxyribonucleic Acid
ED <sub>50</sub>	Effective Dose 50
ENA	Ethylene Nucleic Acid
FANA	2'-Fluoro-Arabino Nucleic Acid
FDA	Food and Drug Administration
FF	Force-field
GGA	Generalized Gradient Approximations
GPU	Graphics Processing Unit
GROMACS	GRoningen MACHine for Chemical Simulation
HF	Hartree-Fock
HIV	Human Immunodeficiency Virus
HOMO	Highest Occupied Molecular Orbital
HPC	High Performance Computers
KS	Kohn Sham

LDA	Local Density Approximations
LJ	Lennard-Jones
LNA	Locked Nucleic Acid
LUMO	Lowest Unoccupied Molecular Orbital
MC	Monte Carlo
MD	Molecular Dynamics
MM	Molecular Mechanics
MM-GBSA	Molecular Mechanics with Generalised Born and Surface Area Solvation
MO	Molecular Orbital
MP	Møller-Plesset
mRNA	Messenger RNA
NBO	Natural Bond Orbital
NIH	National Institutes of Health
NMR	Nuclear Magnetic Resonance
NP	N3'-P5' phosphoramidates
NPT	Isobaric-Isothermal Ensemble
NVE	Microcanonical Ensemble
NVT	Canonical Ensemble
ODN	Oligodeoxynucleotide
ON	Oligonucleotide
ONIOM	Our own N-layered Integrated molecular Orbital and Molecular Mechanics
OPLS-AA	All-Atom Optimized Potentials for Liquid Simulations
PBC	Periodic Boundary Condition
PCA	Principal Component Analysis
PDB	Protein Data Bank
PES	Potential Energy Surface
PME	Particle Mesh Ewald
PMO	Phosphoramidate Morpholino Oligomer
PNA	Peptide Nucleic Acid
PS	Phosphothioate

PTEN	Phosphatase and Tensin homolog
QM	Quantum Mechanics
QM/MM	Quantum Mechanics/Molecular Mechanics
QSAR	Quantitative Structure-Activity Relationship
RCSB	Research Collaboratory for Structural Bioinformatics
RESP	Restrained electrostatic potential
RMSD	Root Mean Square Deviation
RMSF	Root Mean Square Fluctuation
RNA	Ribonucleic Acid
RNase H	Ribonucleases H
RoG	Radius of Gyration
RSV	Rous Sarcoma Virus
SASA	Solvent Accessible Surface Area
siRNA	Small-interfering RNA
SMA	Spinal Muscular Atrophy
ssRNA	Single-stranded RNA
tcDNA	Tricyclo-DNA
tRNA	Transfer RNA
vdW	van der Waals
VMD	Visual Molecular Dynamics
WC	Watson-Crick
