

Declaration

hereby declare that the thesis entitled "**Development of conducting polymer, 2D layered material nanocomposite based enzymatic and non-enzymatic electrochemical sensors, and ion irradiation effects**", submitted to the School of Sciences, Tezpur University in partial fulfillment of the requirements for the award- of the Doctor of Philosophy in Physics, is a record of original research work carried out by me. Any text, figures, theories, results or designs that are not of my own creation are appropriately referenced in order to give owing credit to the original author(s). All the sources of assist have been assigned due acknowledgement. I also declare that neither this work as a whole nor a part of it has been submitted to any other University or institute for any degree, diploma, fellowship or any other similar title or recognition.

Date: 10-06-24

Certificate

This is to certify that the thesis entitled "**Development of conducting polymer, 2D layered material nanocomposite based enzymatic and non-enzymatic electrochemical sensors, and ion irradiation effects**", submitted to the School of Sciences, Tezpur University in partial fulfilment of the requirements for the award of the Doctor of Philosophy in Physics, is a record of original research work carried out by **Mr. Ankush Medhi** under my supervision and guidance.

All help received by him from various sources have been duly acknowledged.

No part of the thesis has been submitted elsewhere for award of any other degree.

Dedication

*I dedicate this thesis to my
beloved parents*

ACKNOWLEDGEMENTS

First and foremost, I want to convey my deep gratitude to my former supervisor, Late Prof. Ashok Kumar. Throughout my journey as a Ph.D. candidate, Prof. Kumar had been a constant source of intellectual stimulation, invaluable guidance and encouragement. His extensive expertise and keen insights into electrochemistry, coupled with his unyielding commitment to rigorous research, have left an indelible mark on my academic journey. It goes without saying that I am immensely indebted to him for his unwavering support and guidance.

It gives me immense pleasure to convey my profound appreciation to my esteemed supervisor, Prof. Dambarudhar Mohanta, for his dynamic and meticulous guidance, motivation, and boundless inspiration throughout my Ph.D. journey. Without his persistent involvement, thoughtfulness, and relentless commitment, completing this thesis on schedule would have been a greater challenge. I will forever value the mentorship provided by Prof. Mohanta, as it has consistently propelled me towards the realization of my long-cherished academic goals.

I extend my heartfelt thanks to the members of my DRC committee, Prof. Pritam Deb and Prof. Pabitra Nath, from the Department of Physics, Tezpur University, for their inspiration, motivation and enriched discussions throughout my Ph.D. journey. My profound appreciation also goes to all the dedicated faculty members of the Department of Physics for their active engagement and timely assistance, which have been instrumental in facilitating my research endeavors.

I extend my sincere appreciation to Dr. C. A. Betty, Scientist, BARC, for granting me the opportunity to work in her lab during the critical phase of my Ph.D. I consider myself truly fortunate to have her mentorship which played a pivotal role to enrich my understanding and experimental expertise.

I am truly grateful for the remarkable opportunities afforded to me at Tezpur University. The outstanding facilities at Tezpur University have played a significant role in this journey. I would like to appreciate the technical and administrative staff of Department of Physics for their prompt assistance in various aspects of my work. I am beholden to all the technical staff of SAIC, Tezpur University for their co-operation in characterization of the samples.

I am thankful to Inter University Accelerator Center (IUAC), New Delhi for their financial support through the project (BTR-66303). I would like to convey thanks to the past and present members of GPS laboratory, Nanoscience and Soft-Matter Laboratory and Material Research Laboratory, Department of Physics, Tezpur University, for all the support, help and motivations. I am fortunate enough to have labmates like them who have cheered me on during both the highs and lows of the research journey. I would like to express my heartfelt gratitude to all my friends specially Sritam, Sunny, Mahesh and Biswa who have been an integral part of my academic and personal life during this journey. The support, encouragement, stimulating discussions and the countless moments of laughter and relaxation have helped me to navigate the challenges of this endeavor. Their presence has made this academic pursuit more enjoyable.

I would like to express my deepest gratitude to Maa, Deuta, Priyanka and Dada for their constant support, encouragement, and sacrifices that have made this academic achievement possible. Their belief in my abilities have been my guiding lights throughout this journey. I could not have reached this milestone without their love, guidance, and support.

Ankush Medhi

Figure 6.12	(a) DPV response with inset ΔI vs $[C]$ plot, and corresponding (b) $1/\Delta I$ vs $1/[C]$ plot, for MPy:2 system	137

Abbreviation	Meaning
W.E.	Working electrode
R.E.	Reference electrode
C.E.	Counter electrode
CP	Conducting polymer
HOMO	Highest occupied molecular orbital
LUMO	Lowest unoccupied molecular orbital
LOD	Limit of detection
MO	Metal oxide
SHI	Swift heavy ion
AuNPs	Gold nanoparticles
TMDC	Transition metal di-chalcogenide
GO	Graphene oxide
EDOT	Ethylene-dioxy thiophene
PPy	Poly-pyrrole
PSS	Polystyrene sulfonate
ITO	Indium-tin-oxide
PBS	Phosphate buffer saline
BSA	Bovine serum albumin
CV	Cyclic voltammetry
EIS	Electrochemical impedance spectroscopy
DPV	Differential pulse voltammetry
EDX	Energy dispersive X-ray
NS	Nanosheet
M-S	Mott-Schottky
kD	Kilo-Dalton
ORS	Oral rehydration solution
NMP	N-Methyl-2-Pyrrolidone
PVDF	poly-vinylidene fluoride
PVP	polyvinylpyrrolidone
EG	Ethylene glycol
SEI	Solid-electrolyte interface
UA	Uric acid

Symbol	Meaning
I_g	Immunoglobulin
D	Diffusion constant
A	Electroactive area
k_s	Rate constant
R_s	Solution resistance
C_{dl}	Double layer capacitance
R_{ct}	Charge transfer resistance
W_z	Warburg impedance
CPE	Constant phase element
v	Scan rate
I_p	Peak current
E_p	Peak potential
Z'	Real part of impedance
$-Z''$	Imaginary part of impedance
F	Faraday's constant
Ab	Antibody
An	Antigen
