<b>Abstract</b>	i
<b>Declaration</b>	v
<b>Certificate</b>	vi
<b>Acknowledgment</b>	vii
<b>1 Introduction</b>	1
1.1 A brief introduction to plasma: . . . . .	2
1.2 A review of dusty plasma: . . . . .	3
1.2.1 Basic characteristics of dusty plasma: . . . . .	3
1.3 Some key aspects of dusty plasmas: . . . . .	6
1.3.1 Astrophysical relevance of dusty plasma: . . . . .	7
1.3.2 Dusty plasmas in laboratories: . . . . .	10
1.4 Dynamics of dust particles in plasmas: . . . . .	12
1.5 Waves in dusty plasma: . . . . .	15
1.5.1 Dust Acoustic (DA) wave: . . . . .	16
1.5.2 Dust Ion Acoustic (DIA) wave: . . . . .	17
1.5.3 Electrostatic Dust Cyclotron wave (EDC): . . . . .	18
1.5.4 Electrostatic Dust Ion Cyclotron wave (EDIC): . . . . .	18
1.5.5 Electromagnetic waves in dusty plasma . . . . .	19
1.6 Strongly coupled dusty plasmas: . . . . .	21
1.7 Interaction mechanism in complex plasma: . . . . .	25
1.8 Complex plasma—the plasma state of soft matter: . . . . .	29
<b>2 Methodology</b>	33
2.1 Fluid equations: . . . . .	34

2.2	Molecular Dynamics (MD) Simulation: . . . . .	35
2.2.1	Background: . . . . .	35
2.2.2	Theoretical foundations of Molecular Dynamics Simulation: .	36
2.2.3	Data Analysis: . . . . .	47
2.3	Brownian Dynamics Simulation: . . . . .	51
2.3.1	Introduction to Brownian Dynamics Simulations (BD): . . . . .	51
2.3.2	The Langevin equation: . . . . .	52
2.4	Green-Kubo Formalism: Underlying Principles and Applications in Molecular Systems: . . . . .	53
2.4.1	The Fluctuation-Dissipation Theorem: . . . . .	54
2.4.2	Viscosity Measurement Using Green-Kubo Formalism: . . . . .	55
<b>3</b>	<b>Influence of a transverse magnetic field on wakefield oscillations around a charged dust grain in complex plasma</b>	<b>57</b>
3.1	Introduction: . . . . .	58
3.2	Theoretical Model: . . . . .	60
3.3	Interaction potential: . . . . .	63
3.4	Results and discussions: . . . . .	64
3.4.1	The variation of wake potential with Mach numbers: . . . . .	64
3.4.2	Effect of ion-neutral collisions on wake profile: . . . . .	68
3.5	Comparison with experiments: . . . . .	73
3.6	Conclusions: . . . . .	75
<b>4</b>	<b>Self-diffusion of complex plasma in the presence of magnetized wake potential</b>	<b>77</b>
4.1	Introduction: . . . . .	78
4.1.1	Diffusion in complex plasma: . . . . .	79
4.2	Theoretical Model: . . . . .	81
4.3	Langevin dynamics simulation: . . . . .	83
4.4	Results and Discussions: . . . . .	84
4.5	Conclusions: . . . . .	95

<b>5 Tunable rheological behavior of magnetized complex plasma</b>	<b>97</b>
5.1 Introduction: . . . . .	98
5.1.1 Viscosity in complex plasma: . . . . .	99
5.2 Description of the model: . . . . .	100
5.3 Langevin dynamics simulation: . . . . .	101
5.4 Results and discussions: . . . . .	105
5.5 Conclusions: . . . . .	111
<b>6 Conclusion and future prospects</b>	<b>115</b>
