Abstract		i-vi
Declaration		vii
Certificate of Supervisor		viii
Acknowledgment		ix-xi
Table of Content		xii-xviii
List of Tables		xix-xxi
List of Figures		xxii-xxiv
List of Abbreviations		xxv-xxviii
Chapter 1		1-4
Introduction		
1.1	Objective of the current study	3-4
Chapter 2		5-19
Review of literature		
2.1.	“Green Remedies: The Role of Medicinal Plants in Modern Healthcare”	5-6
2.2.	Unveiling the Power of Plant Secondary Metabolites	6
2.3.	The Antioxidant Power of Medicinal Plants in Disease Prevention	6-8
2.4.	Cardiovascular diseases	8-11
2.4.1.	Unravelling the Impact of Hypertension on Cardiovascular Health	8-9
2.4.2.	Exploring the Anti-inflammatory Efficacy of Medicinal Plants	9-10
2.4.3.	The Role of Angiotensin-converting enzyme (ACE) Inhibitors in Hypertension Management	10-11
2.5.	Extraction of bioactive compound	11-16
2.5.1	Essential Steps in the Extraction of Medicinal Plant Compounds	11-12
2.5.2.	The Role of Non-Thermal Advanced Extraction in Unveiling Therapeutic Potential	13
2.5.3.	Green Extraction Techniques: A Path to Cleaner and More Efficient Processes	13-14
2.5.4.	Eco-Friendly Extraction: The Advantages of Green Solvents in the Food Industry	15-16
2.6	The Efficiency of Response Surface Methodology (RSM)	16-17
2.7	Novel plant extracts in food product development	17-18
2.8	Advancing Oral Bioavailability of Natural Antioxidants through Encapsulation	18-19

CHAPTER 3	20-65
Survey on ethnomedicinal uses of traditional medicinal plant used by the indigenous inhabitants of southern Manipur	
3.1. Introduction	20-21
3.2. Materials and methods	21-25
3.2.1. Study Area	21-22
3.2.2. About the selected tribes	22-23
3.2.3. Methods of study	23-24
3.2.3.1. Informants	23
3.2.3.2. Field Survey and Data collection	23-24
3.2.4. Quantitative data analysis	24-25
3.3. Results and discussions	25-50
3.3.1. Demographic profile of the respondents	25-26
3.3.2. Characteristics of the ethnomedicinal plants	26-38
3.3.3. Habitat	39
3.3.4. Parts Used	39-40
3.3.5. Cultivated and wild medicinal plants	41
3.3.6. Mode of preparations	41-43
3.3.7. Route of administrations	44
3.3.8. Incensus Conformus Factor (ICF)	44-45
3.3.9. Fidelity Level	46-50
3.4. Conclusion	50-51
CHAPTER 4 (a)	66-87
Proximate, elemental composition, qualitative phytochemical and antimicrobial analysis of six selected ethnomedicinal plants found in Churachandpur district, Manipur, India	
4a.1. Introduction	66-68
4a.2. Materials and methods	68-71
4a.2.1. Collection and Identification of the plants	68-69
4a.2.2. Preparation of Plant Extract	69-70
4a.2.3. Proximate Analysis	70
4a.2.4. Scanning Electron Microscope and Energy Dispersive X-ray Spectroscopy (SEM-EDX)	70-71

4a.2.5. Preliminary phytochemical screening	71
4a.2.6. Antimicrobial screening	71-72
4a.2.6.1. Determination of zone of inhibition	71
4a.2.6.2. Test microorganisms	71-72
4a.2.7. Statistical analysis	72
4a.3. Results and Discussion	72-86
4a.3.1. Proximate composition	72-75
4a.3.2. Elemental composition	76-82
4a.3.3. Phytochemical analysis	82-84
4a.3.4. Antimicrobial analysis	84-86
4a.4. Conclusion	87
CHAPTER 4 (b)	88-121
Quantitative phytochemicals analysis of the selected six herbal extracts and establishing their antihypertensive potentiality	
4b.1. Introduction	88-90
4b.2. Materials and methods	90-95
4b.2.1. Selected plants	90
4b.2.2. Chemicals	90-91
4b.2.3. Extraction of the six selected plant samples	91-92
4b.2.3.1. Solvent extraction method	91
4b.2.3.2. Ultrasound assisted extraction method	91
4b.2.3.3. Supercritical fluid extraction method	92
4b.2.4. Determination of total phenolic content	92
4b.2.5. Determination of total flavonoid content	92
4b.2.6. Determination of free radical scavenging activity	92-93
4b.2.6.1. DPPH radical scavenging activity	92-93
4b.2.7. Fourier transform infrared (FT-IR) spectra of different plant extracts	93
4b.2.8. Determination of ACE inhibitory activity	93-94
4b.2.9. HP-HPLC study of the polyphenols	94-95
4b.3. Results and discussion	95-120
4b.3.1. Phytochemical properties of the selected plant samples	95-97
4b.3.2. FTIR spectral analysis of the six different plant extracts	98-100

4b.3.3.	RP-HPLC study of the polyphenols	100-115
4b.3.4.	In vitro antihypertensive study of six different plants in three different extraction techniques	116-120
4b.4.	Conclusion	121
CHAPTER 5		122-163
Optimization of processing parameters of phytochemicals extraction from targeted plant material using physical and chemical treatments and study their anti-inflammatory properties		
5.1.	Introduction	122-124
5.2.	Materials and methods	124-131
5.2.1.	Plant materials	124
5.2.2.	Chemicals	124
5.2.3.	Experimental Design	125-127
5.2.4.	Validation of the model	127
5.2.5.	Total Phenolic content	127-128
5.2.6.	Radical scavenging activity (DPPH)	128
5.2.7.	Determination of ACE inhibitory activity	128-129
5.2.8.	FT-IR Spectroscopy	129
5.2.9.	Cell lines and culture conditions	129
5.2.10.	Cytotoxicity assay	129-130
5.2.11.	Effect of <i>Clerodendrum glandulosum</i> Lindl. extract on pro-inflammatory marker	130-131
5.2.11.1.	Cell Treatments	130
5.2.11.2.	RNA isolation and Semi Quantitative-PCR	130-131
5.2.12.	Microstructure analysis of treated samples	131
5.2.13.	Statistical analysis	131
5.3.	Results and Discussion	131-162
5.3.1.	Fitting the Response Surface Models for UAE process	131-134
5.3.1.1.	Effect of UAE Parameters on Total Phenolic Content (TPC)	134-136
5.3.1.2.	Effect of UAE Parameters on DPPH radical scavenging Activity	136-138
5.3.1.3.	Effect of UAE Parameters on Angiotensin	139-140

	converting enzyme (ACE) Activity	
5.3.2.	Fitting the Response Surface Models for SFE process	141-145
5.3.2.1.	Effect of SFE Parameters on Total Phenolic Content (TPC)	145-147
5.3.2.2.	Effect of SFE Parameters on DPPH radical scavenging activity	147-150
5.3.2.3.	Effect of SFE Parameters on Angiotensin converting enzyme (ACE) Activity	150-152
5.3.2.4.	FT-IR spectroscopic analysis	152-154
5.3.2.5.	Optimization and model verification	154-156
5.3.3.	Measurement of cell viability by MTT assay	156
5.3.4.	Effect of <i>Clerodendrum glandulosum</i> Lindl. extract on pro-inflammatory genes	157-161
5.3.5.	Microstructure analysis of treated samples	161-162
5.4.	Conclusions	162-163
CHAPTER 6		164-188
	<i>Clerodendrum glandulosum</i> Lindl. incorporated functional pasta: phytochemical, textual, structural and sensory studies	
6.1.	Introduction	164-166
6.2.	Materials and methods	166-172
6.2.1.	Procurement of raw material	166
6.2.2.	Chemicals and reagents	166
6.2.3.	Leaf powder and extracts preparation	166-167
6.2.4.	Pasta formulation and dough preparation	167
6.2.5.	Phytochemical analysis	168
6.2.6.	Cooking attributes	168-169
6.2.6.1.	Moisture content of the pasta	168
6.2.6.2.	Optimum cooking time (OCT)	168
6.2.6.3.	Cooking loss (CL)	168
6.2.6.4.	Swelling index and water absorption index	169
6.2.7.	Texture profile analysis of cooked pasta	169
6.2.8.	Colour	170
6.2.9.	Sensory evaluation of cooked pasta	170

6.2.10.	Thermal gravimetric analysis (TGA)	170
6.2.11.	Differential scanning calorimetry (DSC)	170
6.2.12.	FT-IR Spectroscopy	171
6.2.13.	X-Ray diffraction analysis (XRD)	171
6.2.14.	SEM analysis	171
6.2.15.	Statistical analysis	172
6.3.	Results and discussion	172-188
6.3.1.	Phytochemical analysis	172-173
6.3.2.	Cooking attributes of pasta	173-174
6.3.2.1.	Texture Profile Analysis of pasta	174-175
6.3.4.	Colour evaluation of different formulated pasta	175-177
6.3.5.	Sensory Evaluations	177-180
6.3.6.	Differential scanning calorimetry (DSC)	181-182
6.3.7.	Thermogravimetric analysis (TGA)	182
6.3.8.	FT-IR spectroscopy	183-184
6.3.9.	XRD and its crystallinity	184-185
6.3.10.	SEM micrographs	185-188
6.3.11.	Conclusions	188
CHAPTER 7		189-206
	Encapsulation efficiency of polyphenol extracts within polysaccharides-based beads and to evaluate the feasibility of the incorporation in the food product	
7.1.	Introduction	189-191
7.2.	Materials and methods	191-196
7.2.1.	Materials and plant extract preparation	191
7.2.2.	Preparation of core shell polymer-based formulations	192
7.2.3.	Pasta formulation and dough preparation	192-193
7.2.4.	Cooking quality of fortified pasta	193-194
7.2.4.1.	Optimum cooking time (OCT)	193
7.2.4.2.	Cooking loss (CL)	193-194
7.2.4.3.	Moisture content of the pasta	194
7.2.5.	Total phenolic content	194
7.2.6.	DPPH radical scavenging activity assay	195

Table of Content

7.2.7.	FT-IR Spectroscopic analysis	195
7.2.8.	Color analysis	195-196
7.2.9.	SEM analysis	196
7.2.10.	Statistical analysis	196
7.3.	Results and discussion	196-205
7.3.1.	Cooking characteristics of cooked pasta	196-197
7.3.2.	Total phenolic content	198-199
7.3.3.	DPPH Analysis	199-200
7.3.4.	Fourier transform infrared spectroscopy (FT-IR) analysis	200-201
7.3.5.	Color analysis	202-203
7.3.6.	Scanning electron microscopic (SEM) studies of pasta samples	204-205
7.3.7.	Conclusions	205-206
CHAPTER 8		207-209
Summary, Conclusions and Future Scop		
8.1.	Summary, Conclusions and Future Scope	207-208
8.2.	Future scope	209
Reference		210-259
List of Publications		260
