

Abstract	iii
Keywords	ix
Declaration	xi
Certificate of Principal Supervisor	xiii
Certificate of External Examiner and ODEC	xv
Acknowledgement	xvii
Dedication	xxi
List of abbreviations	xxxii
1 Introduction	1
1.1 The need for molecular sensing	1
1.2 Raman scattering	1
1.2.1 Origin of the Raman spectra	2
1.3 Surface-enhanced Raman scattering (SERS)	4
1.3.1 SERS enhancement mechanisms	5
1.3.2 SERS substrate	7
1.3.3 Enhancement factor (EF)	7
1.3.4 Reproducibility	8
1.3.5 SERS probes	8
1.4 Statement of the research problem and research motivation	9
1.5 Scope and contribution of the thesis	9

2	Review of SERS substrate fabrication	17
2.1	Metallic nanoparticles in a dispersion medium	17
2.2	Lithographic SERS substrates	18
2.3	Metal nanoparticles immobilized on solid substrates	19
2.3.1	Using plant-based components	19
2.3.2	Paper-based SERS substrates	19
2.3.3	Flexible SERS substrates	20
2.4	Semiconductor-based SERS substrates	20
2.4.1	Inorganic semiconductor-based SERS substrates	20
2.4.2	Metal-semiconductor composite SERS substrates	20
2.4.3	Organic semiconductor-based SERS substrates	21
3	Compact SERS detection instrumentation	25
3.1	Raman spectrometer	25
3.2	Compact Raman spectrometers	27
3.2.1	Modular Raman instruments	27
3.2.2	Handheld Raman instruments	27
3.3	Summary	28
4	Plastic-based SERS substrate for the detection of pesticides in water samples	31
4.1	Introduction	31
4.2	Materials and methods	33
4.2.1	Materials	33
4.2.2	SERS substrate fabrication process	33
4.2.3	COMSOL simulation for the fabricated SERS substrates	34
4.3	Results and discussions	35
4.3.1	SERS performance of the fabricated substrate	35
4.3.2	SERS spectra of pesticide sample	38
4.4	Summary	39
5	Design of Blu-ray DVD-based SERS substrate for detection and analysis of rotavirus RNA	41
5.1	Introduction	41
5.2	Materials and methods	42
5.2.1	Materials	42
5.2.2	RNA extraction from rotavirus	42
5.2.3	Electromagnetic simulation study	44
5.2.4	Fabrication of the SERS substrate	45
5.3	Results and discussions	46

5.3.1	Electromagnetic simulation	46
5.3.2	SERS performance of the fabricated substrate	46
5.3.3	SERS spectra of rotavirus RNA	49
5.3.4	SERS spectra of rotavirus RNA collected from the SERSitive SERS substrate	51
5.4	Summary	52
6	Paper-based SERS substrate for the detection and analysis of ro- tavirus particles	55
6.1	Introduction	55
6.2	Materials and methods	58
6.2.1	Materials	58
6.2.2	SERS substrate fabrication process	58
6.2.3	COMSOL simulation for the fabricated SERS substrates	58
6.2.4	Rotavirus extraction from stool samples and confirmation through ELISA and PCR	60
6.3	Results and discussions	64
6.3.1	SERS performance of the fabricated substrate	64
6.3.2	SERS spectra of rotavirus particles in solution	68
6.3.3	SERS spectra of rotavirus particles collected from the SERSitive SERS substrate	70
6.4	Summary	70
7	Conclusions and future prospects of the thesis work	75
7.1	Conclusions	75
7.2	Limitations	77
7.3	Future prospects	77
	Appendix 1: Instrumentation and characterization techniques	79
	Appendix 2: Electromagnetic simulation using COMSOL Multiphysics software	84
