

*Dedicated to Maa-Deuta*

## DECLARATION BY THE CANDIDATE

I, Pranjal Talukdar, hereby declare that the subject matter in this thesis entitled, *‘Contributions to identities for the Rogers-Ramanujan continued fraction, arithmetic properties of certain restricted partition functions, and the least  $r$ -gaps in partitions’* is the record of work done by me, that the contents of this thesis did not form basis of the award of any previous degree to me or to the best of my knowledge to anybody else, and that the thesis has not been submitted by me for any research degree in any other university/institute.

This thesis is being submitted to the Tezpur University for the degree of Doctor of Philosophy in Mathematical Sciences.

Date:

Place: Tezpur, Assam, India

## CERTIFICATE OF THE SUPERVISOR

This is to certify that the thesis entitled, ‘*Contributions to identities for the Rogers-Ramanujan continued fraction, arithmetic properties of certain restricted partition functions, and the least  $r$ -gaps in partitions*’ submitted to the School of Sciences of Tezpur University in partial fulfilment for the award of the degree of Doctor of Philosophy in Mathematical Sciences is a record of research work carried out by Mr. Pranjal Talukdar under my supervision and guidance. All the help received by him from various sources have been duly acknowledged. No part of this thesis has been submitted elsewhere for award of any other degree.

# Acknowledgements

First of all, I would like to convey my sincere gratitude to my supervisor, Prof. Nayandeep Deka Baruah for his constant guidance, enduring support, and endless encouragement. I feel privileged to have travelled to ‘Ramanujan’s garden of  $q$ -series’ with him. The stimulating discussions throughout my PhD years filled with his knowledge, experience, and insights, have helped me to become a better student of mathematics and life. This work would not have been possible without his continuous motivation and help. I am fortunate to have him as my advisor.

I am indebted to Prof. Rupam Barman for introducing me to the theory of modular forms and for many helpful comments and suggestions during my PhD period.

I am thankful to all my respected teachers at the Department of Mathematical Sciences, Tezpur University, especially my doctoral committee members for their suggestions and support.

I am indeed grateful to Prof. Bhaba Kumar Sarma, Dr. Sajal Kumar Das, and Prof. Shuvam Sen for their priceless advice and inspiring words, which have a significant role in shaping my career.

I would like to express my gratitude to my seniors Kuldeep Da and Hirak Da for the numerous things they have taught me regarding mathematics and research. Thanks to the other members of my research group: Subhajit Da, Abhishek, Pankaj, and Roktim.

I would like to thank Dr. Ajit Singh and Mr. Gurinder Singh for the classes of Modular forms in the summer of 2022 in IIT, Guwahati, and many fruitful discussions that followed.

I am grateful to Dr. Manjil P. Saikia for his collaboration on one of my works.

Thanks, also, to Hirak Da and Abhishek.

I have been lucky to meet many wonderful people on the campus as seniors, juniors, friends, and well-wishers: my fellow research scholars at the department, my junior friends from BSc and MSc courses, my fellow boarders at the hostel, my friends from other departments... the list would be a long one to mention here. But all their names are carefully stored in my memory. Their presence and encouragement has been a vital part of the ‘Tezpur University’ chapter of my life. My heartfelt appreciation to all of them.

Special thanks to Moucham Da, Padum Da, and Ajitabh Da for their genuine care and crucial advice since my MSc days till this date, and my friends Ridip and Pranab for keeping me inspired through this journey. My thanks are also due to Debarun Da, Momit Da, Bibek Da, Ipsita, Abhilash, Dipankar, Monuj, Surajit, Ibrahim, Biplop, Biki, Karabee, Mitali, Risha, Dimlee, and Animesh.

I sincerely acknowledge the financial support provided by the Council of Scientific and Industrial Research (CSIR), Government of India (Grant No. 09/0796(12991)/2021-EMR-I) and the facilities provided by Tezpur University, especially the Department of Mathematical Sciences, Tezpur University.

I am also thankful to all the journal referees who carefully read our manuscripts and advised us in improving the contents of the chapters in the thesis.

I take the opportunity to thank Rupam Da (Dr. Rupam Boro) for his clinical suggestions and concerns since the day I joined the university. I thank the hostel staff and the menial team of Saraighat C. V. Raman Men’s Hostel for providing me with a comfortable stay at Tezpur University.

My deepest gratitude to Maa-Deuta for their infinite love, support, and blessings; for providing me a sky to dream, and to Baxonti for bringing me back to light and hope every time I encountered the ‘minima’s of the journey.

Finally, I want to thank each and everyone who have taught me something in life and all those people who have contributed in various ways in my academic journey.
