Abstract	<i>i - iii</i>
Declarations	<i>iv</i>
Certificates	<i>v</i>
Acknowledgements	<i>vi - vii</i>
Contents	<i>viii - x</i>
List of tables	<i>xi</i>
List of figures	<i>xii - xix</i>
List of abbreviations	<i>xx - xxi</i>

CHAPTER 1: Introduction	1
1.1 Importance of energy storage	1-2
1.2 Electrochemical ways to store energy	2-9
1.2.1 Battery	2-3
1.2.2 Electrochemical capacitor/Supercapacitor	3-9
1.2.2.1 Electric double layer capacitor (EDLC)	5-7
1.2.2.2 Pseudocapacitor	7-8
1.2.2.3 Hybrid Supercapacitor	8-9
1.3 Importance of aluminum-ion based energy storage devices	9-10
1.4 Al-ion supercapacitor	10-11
1.5 Aqueous electrolytes	11-12
1.6 Gel electrolytes	12-13
1.7 Molybdenum Oxide	13-14
1.8 Conducting polymers	14-15
1.9 Graphene	16
1.10 Vanadium based materials	17-18
1.11 Objectives of the thesis	18
1.12 References	18-33

CHAPTER 2: Gel electrolyte assisted Al³⁺ ion capacitor with electrospun MoO₃	
2.1 Introduction	34-35
2.2 Experimental Section	35-38
2.2.1 Materials	35

2.2.2 Synthesis	35-37
2.2.2.1 Synthesis of PVA/ammonium molybdate solution	35
2.2.2.2 Synthesis of reduced graphene oxide	35-36
2.2.2.3 Synthesis of rGO/PVA/ammonium molybdate solution	36
2.2.2.4 Electrospinning of MoO ₃ and rGO/MoO ₃	36-37
2.2.3 Characterizations	37
2.2.4 Electrochemical measurements	37-38
2.3 Results and discussion	38-54
2.4 Conclusion	55
2.5 References	55-59

CHAPTER 3: Al³⁺ ion capacitor with vanadium oxy-acetylacetonate and polyaniline

3.1 Introduction	60
3.2 Experimental Section	60-62
3.2.1 Materials	60
3.2.2 Synthesis	61-62
3.2.2.1 Synthesis of polyaniline	61
3.2.2.2 Synthesis of vanadium oxy-acetylacetonate	61-62
3.2.3 Characterizations	62
3.2.4 Electrochemical Analysis	62
3.3 Results and discussion	62-73
3.4 Conclusion	73
3.5 References	73-74

CHAPTER 4: Illustration of monovalent and polyvalent ion storage in vanadyl acetate

4.1 Introduction	75
4.2 Experimental Section	75-78
4.2.1 Materials	75
4.2.2 Synthesis	76
4.2.2.1 Synthesis of vanadyl acetate	76
4.2.3 Characterization	76
4.2.4 Electrochemical Analysis	76-78
4.3 Results and discussion	78-99

4.4 Conclusion	99-100
4.5 References	100-101

CHAPTER 5: A study on Al^{3+} ion storage in hydrated vanadate and aluminium doped hydrated vanadate

5.1 Introduction	102
5.2 Experimental Section	103-104
5.2.1 Materials	103
5.2.2 Synthesis	103
5.2.3 Characterization	103
5.2.4 Electrochemical Analysis	103-104
5.3 Results and discussion	104-116
5.4 Conclusion	116-117
5.4 References	117-118

CHAPTER 5: Conclusion and Future Prospects

6.1 Conclusion	119-121
6.2 Future Prospects	121
6.3 References	121-123
