Abstract	i-ii
Declaration	iii
Certificate	iv
Certificate of the External Examiner	v
Acknowledgement	vi-vii
Contents	ix-xiii
List of Figures	xiv-xvii
List of Tables	xviii
Nomenclature	xix-xxiii

Chapter 1: Introduction

1.1	The Neuron (Nerve cell).....	2
1.1.1	Myelinated and Non-Myelinated Neurons.....	4
1.1.2	Ion channels of neuron.....	4
1.1.3	Active and Passive properties of Neurons.....	5
1.1.4	Active and Passive Transport.....	6
1.2	Extracellular Space (ECS).....	7
1.2.1	Composition and Function of the Extracellular Space.....	8
1.2.2	Local Field Potential (LFP).....	9
1.3	Nerve Conduction velocity (NCV).....	10
1.4	Motivation.....	11
1.5	Objectives.....	12
1.6	Materials and Methods.....	13
1.7	Organization of the Thesis.....	14

Chapter 2: Literature Survey

2.1	The Electrical Equivalent Nerve model.....	16
2.2	The Cable Representation of a nerve.....	18
2.3	Extracellular Space and its related works.....	19
2.4	Nerve Conduction Velocity and its derivation	20
2.5	Summary.....	22

Chapter 3: Extracellular Conductivity and Neuronal Activity: Consequences for Nerve Signal Transmission and Neural Development

3.1	Neuronal activity and its influence on Neuronal Growth.....	23
3.1.1	Introduction.....	23
3.1.2	Myelin Capacitance and thickness of myelin layer.....	24
3.1.3	Demyelination.....	25
3.1.4	Stages of Demyelination.....	26
3.1.5	Remyelination.....	27
3.1.6	Rate of Change of Membrane Potential ($\frac{dV_m}{dt}$).....	28
3.1.7	Contribution.....	28
3.1.8	Proposed Methodology.....	29
3.1.9	Simulation Considerations.....	31
3.1.10	Results and Discussions.....	31
3.2	Extracellular Conductivity and Nerve Signal Propagation for a larger Extracellular Space.....	37
3.2.1	Introduction.....	37
3.2.2	Swelling of the Extracellular Space.....	38

3.2.3	Extracellular Space during development stage.....	39
3.2.4	Contribution.....	40
3.2.5	Proposed Methodology.....	40
3.2.6	Simulation Considerations.....	42
3.2.7	Results and Discussions.....	42
3.2.7.1	Fiber with Constant Extracellular Space and Varying Diameter.....	42
3.2.7.2	Fiber with Constant Diameter and Varying Extracellular Space.....	43
3.3	Summary and Future Remarks.....	45
	Publications.....	46

Chapter 4: Effective Nerve Signal Transmission through an Axon without Information Loss in Extracellular Space

4.1	Introduction.....	47
4.1.1	Node of Ranvier.....	49
4.1.2	Saltatory Conduction.....	50
4.2	Contribution.....	50
4.3	Proposed Methodology.....	51
4.4	Simulation Considerations.....	55
4.5	Results and Discussions.....	55
4.6	Summary and Future Remarks.....	60
	Publications.....	61

Chapter 5: Extracellular Space and its role in neuronal signal transmission for both Healthy and Diseased Nerve Fiber

5.1	Introduction.....	62
5.1.1	Rescue protein.....	64
5.2	Contribution.....	65
5.3	Proposed Methodology.....	66
5.4	Simulation Considerations.....	69
5.5	Results and Discussions.....	70
5.5.1	Effect of injury (diseases) on neuronal signal.....	71
5.5.2	Genetic Mutation of ion channels and application of Rescue protein mechanism to alter its effects.....	83
5.5.2.1	Implementation of Rescue protein mechanism.....	83
5.6	Summary and Future Remarks.....	105
	Publications.....	108

Chapter 6: Study and Modeling on Effect of Extracellular Space on Velocity profile of neuronal signal transmission

6.1	Introduction.....	110
6.2	Contribution.....	112
6.3	Proposed Methodology.....	112
6.4	Simulation Considerations.....	115
6.5	Results and Discussions.....	115
6.5.1	Velocity Profile for a Uniform Fiber with Varying	115

Extracellular Space.....	116
6.5.2 Velocity Profile for a Fiber with varying internal Diameter.....	116
6.5.3 Velocity Profile for a Fiber with varying Fiber Length.....	118
6.5.4 Velocity profile for varying internal diameter, varying length of the fiber.....	119
6.5.5 Conduction velocity with respect to the changing Extracellular Space (ECS).....	120
6.6 Summary and Future remarks.....	122
Publications.....	124
 Chapter 7: Conclusion and Future Scope	
7.1 Conclusions.....	125
7.2 Future Directions.....	130
Publications Based on This Work
