Abstract	i-ii
Declaration	iii
Certificate	iv
Certificate of the External Examiner	v
Acknowledgement	vi-vii
Contents	ix-x
List of Figures	xi-xii
List of Tables	xiii
Nomenclature	xiv-xvi

Chapter 1: Introduction

1.1	Introduction	2
1.2	Motivation	5
1.3	Research Objectives	6
1.4	Thesis Organization	6
	Bibliography	8

Chapter 2: Design of multi-layer models of SPR sensor

2.1	Introduction	13
2.2	Methodology	14
2.2.1	Mathematical modelling of SPR sensor	16
2.2.2	Performance parameters of SPR sensor	17
2.2.3	Design parameters	18
2.2.3.1	RI	18
2.2.3.2	Excitation wavelength	19
2.2.3.3	Layer thickness	20
2.3	Results and Discussion	20
2.3.1	Effect of different materials and their thicknesses on the SPR performance parameters	20
2.3.1.1	Design I	20
2.3.1.2	Design II	22
2.3.1.3	Design III	26
2.3.2	Comparative study of the SPR sensor designs	29
2.3.3	Comparison with recently reported works	31
2.4	Summary	32
	Bibliography	33

Chapter 3: Fabrication of SPR biosensor and a measurement prototype to study biomolecular interaction

3.1	Introduction	39
3.2	Materials and Methodology	42
3.2.1	Materials and Reagents	43

3.2.2	SPR measurement prototype	44
3.2.3	Fabrication of multiple protein-patterned SPR biosensors for detection of H-IgG	46
3.2.3.1	Multichannel microfluidic flow cell	46
3.2.3.2	Sample preparation	47
3.2.3.3	Multiple protein-patterned biosensor fabrication	48
3.2.4	Fabrication of SPR biosensors for detection of crude snake venoms	49
3.2.4.1	Sample preparation	49
3.2.4.2	Biosensor fabrication	50
3.2.5	Key performance parameters of SPR biosensors	50
3.3	Results and Discussion	51
3.3.1	SPR response of standard samples and sensor characterization	51
3.3.2	Detection of H-IgG	52
3.3.2.1	SPR Response	52
3.3.2.2	Binding Kinetics	56
3.3.2.3	Selectivity	57
3.3.3	Detection of crude snake venoms	58
3.3.3.1	SPR Response	58
3.3.3.2	Binding Kinetics	60
3.3.3.3	Repeatability and Reproducibility	61
3.3.3.4	Stability	63
3.3.3.5	Control Experiment and Selectivity	64
3.3.3.6	Real sample analysis	65
3.4	Summary	66
	Bibliography	67

Chapter 4: Development of hydrophilic Polydimethylsiloxane (PDMS) microchannels for SPR microfluidic application

4.1	Introduction	73
4.2	Materials and Methodology	74
4.2.1	Materials	75
4.2.2	Fabrication of plasma treated multichannel microfluidic flow cell	75
4.2.3	Characterization Techniques	77
4.2.4	SPR biosensor fabrication	78
4.3	Results and Discussion	79
4.3.1	Contact Angle and Surface Energy	79
4.3.2	Material Characterization	81
4.3.3	SPR Response	83
4.4	Summary	84
	Bibliography	85

Chapter 5: Conclusions and Future Direction of Research

5.1	Conclusions	90
5.2	Future Direction of Research	93

List of Publications	94
