

Dedicated

To my parents, Kuladhar Bora, Rina Bora, and my brother

Debashis Bora

DECLARATION

I do hereby declare that the Thesis entitled **“STUDY ON PETROLEUM COKE AND BIOMASS CO-GASIFICATION IN DOWNDRAFT GASIFIER”** being submitted to the Department of Energy, Tezpur University, is a record of original research work carried out by me. All sources of assistance have been assigned due acknowledgement. I also declare that neither this work as a whole nor a part of it has been submitted to any other University or Institute for any other degree, diploma, or award.

Place: Tezpur

CERTIFICATE OF THE SUPERVISOR

This is to certify that the Thesis entitled “**Study on Petroleum Coke and Biomass Co-gasification in Downdraft Gasifier**”, submitted to the Department of Energy, School of Engineering, Tezpur University in partial fulfillment for the award of the degree of Doctor of Philosophy in Energy is a record of research work carried out by Ms. Adity Bora under my supervision and guidance.

All help received by her from various sources has been duly acknowledged.

No part of this Thesis has been submitted elsewhere for award of any other degree/diploma.

TEZPUR UNIVERSITY

(A Central University Established by an Act of Parliament of India)

Napaam, Tezpur – 784028, Assam, India

Ph No. : +91 3712 27 5306 (O), Fax: +91-3712 267005/6

CERTIFICATE

This is to certify that the thesis entitled "**Study on Petroleum Coke and Biomass Co-gasification in Downdraft Gasifier**" submitted by **Ms. Adity Bora** to the Department of Energy, School of Engineering, Tezpur University in partial fulfillment for the award for the degree of **Doctor of Philosophy in Energy** has been examined by us on **18th July 2025** and found to be satisfactory.

The committee recommends the award of the degree of Doctor of Philosophy.

Siddhan Mahapatra

Supervisor

Acknowledgement

I would like to express my deepest gratitude to my PhD supervisor, Professor Sadhan Mahapatra, for his unwavering support, guidance, and encouragement throughout my doctoral journey. Over the years, his profound expertise and invaluable insights have shaped my research and helped me navigate numerous challenges. His patience, constant motivation, and constructive feedback have made this work possible. I am truly fortunate to have worked under his mentorship, which has enriched my academic growth and personal development. His guidance has been instrumental in developing my skills as a researcher, and I will always cherish the time I spent working under his supervision. I would like to express my heartfelt gratitude to Professor Jay P. Gore, host supervisor at Purdue University for his invaluable guidance and insightful feedback during my time as an exchange research scholar at Zucrow Laboratories. His expertise significantly improved my research, and the opportunity to work with him was truly enriching.

I would like to express my gratitude to Prof. Rupam Kataki, Dr. Nabin Sarmah, and Dr. Pankaj Bharali for serving on my advisory committee and for their insightful feedback on my work. Their support, encouragement, and trust in my research were instrumental in the progress of my project. Additionally, I am thankful to all the faculty members of the Department of Energy at Tezpur University for their valuable assistance throughout my research. I also extend my appreciation to the non-teaching staff of the department, whose help made my academic journey much smoother.

I am deeply grateful to Dr. Rathziel Roncancio Reyes, Dr. Nabajit Dev Choudhury, and Dr. Harrison Hihu Mugai, for their unwavering support, and guidance throughout my PhD research journey. Their assistance during experiments and the countless hours they dedicated to teaching me various experimental procedures were instrumental to my research. Collaborating with them was an enriching experience, and their constant encouragement significantly contributed to my academic development. The mentorship I received from them has had a lasting impact, and I will always sincerely appreciate their guidance.

I am deeply grateful to the Science and Engineering Research Board - Overseas Visiting Doctoral Fellowship (SERB-OVDF) of the Government of India for awarding me the fellowship. This fellowship enabled my research as an exchange scholar at Purdue University, United States. It provided me with the opportunity to expand my research and gain valuable

international experience. I would also like to extend my sincere thanks to Zucrow Laboratories for providing state-of-the-art facilities, which were essential for the successful completion of my research work.

I would like to thank Chris and Brendan for their invaluable help and support during my time at Zucrow Laboratories. Their assistance was crucial in reinstalling the gasification system at ZL1, and without their support, I would not have been able to complete this task. Their dedication and generosity have profoundly impacted my research journey, making my time at Purdue both highly productive and memorable. I also sincerely appreciate the invaluable assistance Adolfo, Zack, Jack, Sreetam, and Kole provided during my time at Purdue University. Their support was significant in my research and day-to-day activities.

I want to express my heartfelt gratitude to all the members of the Biomass Gasification Laboratory for their unwavering support. I extend special thanks to Arunava, Swarna, Bikram, and Bharat for their care and encouragement throughout my research journey. I also appreciate Niran Da and Neelam's valuable research discussions and constructive feedback. Their scientific and non-scientific insights have contributed to my development as a well-rounded individual and have significantly shaped my approach to research.

I would like to express my heartfelt gratitude to my friends and sisters: Minakshi Baa, Mandira Baa, Honey Baa, Panchali, Saswati, and Trinakshee. I would like to express my heartfelt thanks to my friends Ankita P, Angshuman, Gaffer, Pallabi, Sneha, and Labayna. Your unwavering support, encouragement, and love have been a constant source of strength throughout my journey. Thank you for always being there for me through the ups and downs and countless moments of joy and inspiration. I feel truly blessed to have such wonderful friends and sisters by my side. Your friendship has made this challenging journey much more enjoyable, and I will always cherish the time we have spent together.

I am also profoundly grateful to my father, mother, and brother for their hard work, sacrifices, and unwavering belief in me. Their encouragement pushed me to become the person I am today, and without their support, this journey would not have been possible. I am deeply thankful to my sister-in-law, Ankita N, for her love, care, and constant support, which provided me with the strength to persevere.

Nomenclature

Capital letters

A	Pre-exponential factor (min^{-1})
AAEM	Alkali and alkaline earth metal
BCC	Biochar generated under CO_2
BCN	Biochar generated under N_2
DTG	Derivative Mass Loss
D_i	Devolatilization Index ($\% \text{ K}^{-3} \text{ min}^{-2}$)
E_a	Activation energy (kJ mol^{-1})
EDX	Energy Dispersive X-ray Analysis
FC	Fixed carbon
FTIR	Fourier Transform Infrared Spectroscopy
FWO	Flynn-Wall-Ozawa
HHV	Higher heating value
K_2CO_3	Potassium Carbonate
KAS	Kissinger-Akahira-Sunose
MAC	Molten Alkali Carbonate
MC	Moisture content
MW_{co}	Molecular weight of CO
MW_{char}	Molecular weight of char
R	Universal gas constant ($\text{J K}^{-1} \text{ mol}^{-1}$)
R^2	Correlation coefficient
$-R_p$	Maximum weight loss rate ($\% \text{ min}^{-1}$)
$-R_v$	Average weight loss rate ($\% \text{ min}^{-1}$)
SEM	Scanning Electron Microscopy
T	Temperature (K)
T_i	Initial temperature of DTG curve (K)
T_p	Peak temperature of DTG curve(K)
T_f	Final temperature of DTG curve(K)
TGA	Thermogravimetric Analyser
VM	Volatile matter
XRD	X-ray Diffraction
$Z(\alpha)$	Mathematical expression for the master plots method

Lowercase letters

$f(\alpha)$	Differential reaction model
$g(\alpha)$	Integral reaction model
$k(T)$	Reaction rate constant
k	Arrhenius constant
\dot{m}_{out}	Mass flow rate of the outgoing gases
t	Time (min)
y_{co}	Mass fraction of CO in the product mixtures
$\Delta T_{1/2}$	Temperature range at half of DTG curve

Greek symbols

α	Conversion fraction
β	Heating rate (K min ⁻¹)
ρ	Density (kg m ⁻³)
θ	Reaction progress factor
$\dot{\omega}_{co}$	Mass production rate of CO
