List of Figures	<i>iv</i>
List of Tables	<i>vii</i>
Nomenclature	<i>viii</i>
Abstract	<i>x</i>
CHAPTER 1 Introduction	1
1.0 Introduction	1
1.1 Biomass as sustainable energy sources for biofuel production	3
1.1.1 Biofuels	3
1.1.2 Impact of biofuel utilization	6
1.1.3 Thermal conversion processes of lignocellulosic biomass	8
1.2 Petroleum coke	13
1.3 Literature review	14
1.3.1 Thermal behaviour and kinetic study	15
1.3.2 Single particle combustion	23
1.3.3 Effect of operational parameters on co-gasification	29
1.4 Research motivation	36
1.5 Thesis layout	38
1.6 Summary	39
CHAPTER 2 Materials and methods	41
2.0 Introduction	41
2.1 Materials	41
2.1.1 Fuel samples	41
2.2 Methods	43
2.2.1 Sample characterization	43
2.2.2 Pyrolysis experiments in TGA	45
2.2.3 Pyrolysis in a fixed bed system	52
2.2.4. Single-particle combustion	54
2.2.5. CO ₂ gasification experiment	57
2.3 Summary	60

CHAPTER 3 Thermal degradation and kinetic study of <i>Bambusa tulda</i> and petcoke pyrolysis	61
3.0 Introduction	61
3.1 Results and discussion	63
3.1.1 Effect of CO ₂ and N ₂ on thermal degradation of <i>B. tulda</i>	63
3.1.2 Effect of heating rates	68
3.1.3 Kinetic analysis	71
3.1.3.1 Determination activation energy	72
3.1.3.2 Determination of kinetic model and pre-exponential factor	86
3.1.4 Effect of N ₂ and CO ₂ on B. Tulda char properties	98
3.1.4.1 Mass and energy yield	98
3.1.4.2 FTIR analysis	101
3.1.4.3 XRD analysis	102
3.1.4.4 SEM-EDX analysis	103
3.2 Summary	105
Chapter 4 Combustion characteristics of <i>Bambusa tulda</i> and petroleum coke blends	109
4.0 Introduction	109
4.1 Results and discussion	110
4.1.1 Flame behaviour study	110
4.1.2 Mass degradation of fuel samples	113
4.1.3 Volatile and char combustion	116
4.1.4 Ignition mass flux	119
4.1.5 Effect of surface area to volume ratio on combustion time	121
4.1.6 Validation using literature results	124
4.1.7 Ash characterization	132
4.2 Summary	135
Chapter 5 Influence of operational parameters on co-gasification process	139
5.0 Introduction	139
5.1 Results and discussion	141
5.1.1 Feedstock characterization	141
5.1.1.1 Elemental and mineral composition	141
5.1.1.2 Surface morphology by FESEM analysis	142

5.1.2	Effect of catalyst impregnation on bamboo char during CO ₂ gasification	144
5.1.3	Effect of temperature and pressure on K ₂ CO ₃ impregnated bamboo char gasification	145
5.1.4	Effect of blending petcoke with K ₂ CO ₃ -impregnated bamboo char	148
5.2	Summary	150
Chapter 6 Conclusions and Future Scope		153
6.1	Conclusions	153
6.1.1	Thermal degradation and kinetic study	154
6.1.2	Single particle combustion of blended samples	155
6.1.3	Co-gasification of blended fuel samples	156
6.2	Future scope	157
