

## Declaration by the Candidate

I, **Janmejoy Sarkar**, declare that the thesis entitled '**Study of the Solar Atmosphere: Space Instrumentation and Observation**' is a record of my own work carried out under the supervision of Prof. Gazi A. Ahmed and Prof. Durgesh Tripathi during the period from September, 2020 to April, 2025. I confirm that:

- This work was done wholly or mainly while in candidature for a research degree in Doctor of Philosophy at Tezpur University where no part of this thesis has previously been submitted for a degree or any other qualification at this university or any other institution.
- Where I have quoted from the work of others, the source is always given. With the exception of such quotations, this thesis is entirely my own work. I have acknowledged all main sources of help.
- Where the thesis is based on work done by myself jointly with others, I have made clear exactly what was done by others and what I have contributed myself.

Date: 13 May, 2025

**Janmejoy Sarkar**

Place: Tezpur, Assam, India

Regn. no.: TZ200499 of 2019.

## Certificate of the Supervisor(s)

This is to certify that the thesis entitled '**Study of the Solar Atmosphere: Space Instrumentation and Observation**', submitted to the School of Sciences, Tezpur University in partial fulfillment for the award of the degree of **Doctor of Philosophy in Physics** is a record of original research work carried out by **Mr. Janmejy Sarkar** under my supervision and guidance.

All help received by him from various sources have been duly acknowledged. No part of this thesis has been submitted elsewhere for award of any other degree/diploma.

**Prof. Gazi A. Ahmed,**  
Supervisor, Professor  
Department of Physics  
School of Sciences  
Tezpur University  
Napaam - 784028, India

**Prof. Durgesh Tripathi,**  
Co-supervisor, Senior Professor  
Inter-University Centre for  
Astronomy and Astrophysics  
Pune - 411007, India

# Acknowledgments

I would like to take this opportunity to thank my doctoral advisors, Prof. Gazi Ameen Ahmed of Tezpur University (TU), Prof. Durgesh Tripathi and Prof. A. N. Ramaprakash of IUCAA, Pune, for their constant guidance and support. I am deeply indebted to them for always having faith in me throughout the development and realization of the Solar Ultraviolet Imaging Telescope (*SUIT*) on board Aditya-L1.

I would like to express my gratitude to the Inter-University Centre for Astronomy and Astrophysics (IUCAA), Pune, for funding my work on developing *SUIT* with the Junior and Senior Research Fellowships. I thank Tezpur University for providing this PhD opportunity, and the Space Astronomy Group at ISRO Satellite Integration and Testing Establishment for the laboratory and logistic support, which facilitated the evolution of this thesis. It is also essential to mention that I attended the IUCAA-NCRA Graduate School during the first year of PhD, the credits of which were accepted at Tezpur University for the completion of my coursework, helping me build a solid foundation in astronomy and astrophysics.

I would like to thank my doctoral committee member– Dr. Moon Moon Devi, and the HoDs of the Dept. of Physics, TU– Prof. Mrinal K. Das, Prof. Nidhi Bhattacharya, and Prof. Pabitra Nath, for helping me navigate through the academic and administrative aspects of my PhD. I’m extremely grateful to Dr. Kishor Baruah for helping me start astronomical instrumentation at the Tezpur University Observatory and Dr. Rupjyoti Gogoi for inspiring me to take up astrophysics as a career. Many thanks to Mr. Narayan Sarma and Mr. Umesh Patir for their help and guidance with every official document that demanded even the slightest attention. I also wish to thank Ms. Anamika Pegu, Deputy Registrar (GA), TU, and Dr. Papor Baruah, Department of Business Administration, TU, whom I have had the opportunity of getting to know outside their official roles.

I could not have undertaken this journey without the constant support of every member of the *SUIT* and Aditya-L1 teams, encompassing extraordinary minds from various organizations who eventually became resourceful teachers and good friends. My deepest gratitude to Ms. Nigar Shaji, Project Director of Aditya-L1, currently Associate Director of Projects at URSC, ISRO, who played a central role in making the Aditya-L1 mission a reality. I would like to extend my sincere thanks to Prof. Shyam Tandon, Dr. Koteswara Rao, Prof. P. Sreekumar, and Dr. Seetha Somasundaram for their detailed review, advice and constant support throughout the development and commissioning of *SUIT*. I would also like to thank Mr. Rushikesh Deogaonkar, Mr. Ravi Kesharwani, Ms. Deepa Modi, Dr. Avyarthana Ghosh, Mr. Melvin K. James, Mr.

Raghavendra T.S., Mr. Mahanthesha DMK, Mr. Mahesh Burse, Mr. Sakya Sinha, Dr. Soumya Roy, Dr. Nived V.N., Mr. Rahul Gopalakrishnan, Mr. Bhushan Joshi, and Mr. Sriram Muley of IUCAA; Dr. Sankarasubramanian K., Mr. Anurag Tyagi, Dr. Anuj Nandi, Dr. Radhakrishna V., Ms. Rwitika Chatterjee, Ms. Netra Pillai, Ms. Swapnil Singh, Mr. Abhilash Sarwade, Mr. Srikar P. Tadeipalli, Mr. Koushal Vadodariya, Mr. Manjunath Olekar, Mr. Mohammad Azar, and all other staff members at the Space Astronomy Group, URSC; Dr. Bhargavaram B.S. of LEOS-ISRO; Dr. Manoj Varma of IIA; Mr. Adithya H.N. of MCNS, MAHE; Dr. A. Raja Bayanna of USO/PRL; Mr. Ravi A. and Mr. Nashiket Parate of Aditya-L1 Project Management Office, ISRO; Dr. Abhijit Adoni of the Thermal Systems Group, ISRO; satellite integration team, environmental testing team and satellite checkout team of Aditya-L1. I would especially like to thank Dr. Sreejith Padinhatteeri, Project Scientist of *SUIT*, MCNS-MAHE, who has been my best support system ever.

Many thanks to my fellow labmates – Dr. Vishal Upendran, Mr. Linn Abraham, Mr. Deepak Kathait, Dr. Sneha Pandit, Dr. Megha A. Rao, and Mr. Biswanath Malaker at IUCAA and Dr. Kabita Deka, Dr. Nishant Shukla, Mr. Kaushik Nath, Mr. Dhanjit Talukdar, Ms. Sahnaz Shabnam, Mr. Debasish Krishnatreya, and Ms. Himakshi Bora at Tezpur University. They have exposed me to various knowledge bases and skill sets, which have helped me inculcate a wide gamut of capabilities over the years.

I am thankful to the book ‘All About Telescopes’ by Sam Brown and Edmund Scientific Co. The impressive illustrations in the book helped me start amateur astronomy in my teens and were my first practical guide to telescope making. I am also very fortunate to have accidentally come across the novel ‘First Light’ by Richard Preston about a decade ago, which nudged me further towards instrumentation. All the quotes in this thesis are some of my favorite lines from this book.

I am deeply indebted to Antara for helping me recognize my skills in instrumentation. Also, I would like to thank my close friends- Swapnil, Syed, Subham, Sayan, and Arghyadeep, my friends at IUCAA- Bikram, Partha, Tathagata, Premvijay, Sayak, Eshita, Pushpak, Manish, Rajendra, Soumil, Swarnim, Anshuman, Sourav, Prashant, Snehil, Biplab, Priyanka, Balpreet, Sudeb, Govind, Nayan, Suryansh; my friends at Tezpur University- Biprav, Bidhan, Bikash, Debasish, Hritwik, Jubaraj, Niranjana, Subham, Souvik, Sree, Neelim, Juganta, and all members of Sky Watchers’ Association of North Bengal (SWAN) for always being by my side and helping me selflessly.

Finally, I would like to thank my father for always inspiring me to look at the sky, and my mother for lifting my spirit when I believed I had lost.

— Janmejoy,  
May, 2025.

# List of Figures

1.1	Structure of the Sun . . . . .	3
1.2	Temperatures across the solar atmosphere . . . . .	3
1.3	The solar spectrum from SOLSTICE and SOLSPEC combined. . . . .	9
1.4	A CAD model of the Aditya-L1, illustrating the position of <i>SUIT</i> . . . . .	15
1.5	A schematic diagram [top] and a photograph [bottom] of the <i>SUIT</i> payload. . . . .	16
1.6	Full disk images in all eleven filters recorded by <i>SUIT</i> on May 17, 2024. . . . .	18
2.1	Schematic representation of filter characterization setup. . . . .	28
2.2	Spatial Variation of Transmission for <i>SUIT</i> narrowband filters. . . . .	29
2.3	Spatial Variation of Transmission for <i>SUIT</i> broadband and bandpass filters. . . . .	30
2.4	Out-of-band characteristics of <i>SUIT</i> narrowband filters. . . . .	33
2.5	Out-of-band characteristics of <i>SUIT</i> broadband and bandpass filters. . . . .	34
2.6	Out-of-band characteristics of <i>SUIT</i> narrowband science filter combinations. . . . .	35
2.7	Out of band characteristics of <i>SUIT</i> broadband science filter combinations. . . . .	36
2.8	Transmission profiles for various tilt angles for <i>SUIT</i> narrowband filters. . . . .	40
2.9	Exploded view of the science filter mounting system on the <i>SUIT</i> filter wheel assembly. . . . .	43
2.10	Assembled flight model of <i>SUIT</i> Filter Wheel Assembly . . . . .	43

3.1	Diagram of the setup for performing the optical alignment of <i>SUIT</i> . . . . .	50
3.2	Flight model of the Primary (left) and the secondary (right) mirror assemblies . . . . .	50
3.3	Contribution of Zernike coefficients ( $Z_{\#}$ ) to wavefront error. . .	51
3.4	Flight model of field corrector lens assembly. . . . .	51
3.5	Final wavefront map of <i>SUIT</i> after optical alignment of M1, M2 and FCLA. . . . .	52
3.6	Flow chart summarizing the sequence of activities undertaken for optical alignment and defining the optical axis of <i>SUIT</i> . . . .	53
3.7	The position of the alignment cube on the <i>SUIT</i> payload. The alignment cube sits on a cylindrical stand, next to the primary mirror (M1). . . . .	55
3.8	Schematic diagram of the optical setup used to find the <i>SUIT</i> optical axis and for measuring the angular offsets with the alignment cube axis. . . . .	56
3.9	Angular offset of the alignment cube axis with the <i>SUIT</i> axes. .	56
3.10	Schematic diagram and picture of the <i>SUIT</i> detector assembly. .	59
3.11	Isometric view (left) and actual photo (right) of the thermal filter assembly mounted on the <i>SUIT</i> optical bench . . . . .	60
4.1	The effective area curves for <i>SUIT</i> science filters. . . . .	66
4.2	Diagram [top] and schematic flowchart [bottom] for photometric calibration and spectral validation of <i>SUIT</i> showing the section view of the turbo vacuum chamber. . . . .	69
4.3	Spectral transmission profile of <i>SUIT</i> in (a) NB06 and (b) NB07 bands with solar spectrum from SOLSPEC data. . . . .	71
4.4	Images captured at various wavelengths for the NB02 filter of <i>SUIT</i> . . . . .	76
4.5	Spectral validation for various filter combinations inferred from the imaging measurements. . . . .	77
4.6	The ghost reflections of the optical fiber as seen with the NB08 filter. . . . .	78

5.1	Encircled energy plot for <i>SUIT</i> PSF measured in the lab at various locations of the CCD for the NB07 filter. . . . .	87
5.2	Line profile of 16 lines per mm pattern on USAF resolution target. The image of the target is shown here as an inset. . . . .	87
5.3	Modulation Transfer Function (MTF) curve for vertical and horizontal patterns on the USAF target. . . . .	91
5.4	Solar off pointing scheme for flat-field creation. . . . .	91
5.5	<i>SUIT</i> flat field generated from off-pointed sun images. . . . .	92
5.6	Nature of vignette at field corner. . . . .	92
5.7	Simulated encircled energy plots for different field points in the <i>SUIT</i> field of view. . . . .	95
5.8	Events during a flare trigger and localization. . . . .	95
5.9	Flat field correction of <i>SUIT</i> images. . . . .	97
5.10	Comparison of NB04 images before and after scattered light removal. . . . .	98
5.11	Comparison of NB08 images before and after ghost removal. . .	101
