|---------------------------------------------------------------------------------------------|-----------|
| <b>Abstract</b>                                                                             | <b>i</b>  |
| <b>Acknowledgement</b>                                                                      | <b>vi</b> |
| <b>List of symbols</b>                                                                      | <b>x</b>  |
| <b>1 Introduction and preliminaries</b>                                                     | <b>1</b>  |
| 1.1 Notations and results of Graph Theory . . . . .                                         | 4         |
| 1.1.1 Spectrum, (signless) Laplacian spectrum and their corresponding<br>energies . . . . . | 5         |
| 1.1.2 Various distance spectra and energies . . . . .                                       | 9         |
| 1.1.3 Common neighborhood spectrum and energy . . . . .                                     | 11        |
| 1.1.4 Topological index . . . . .                                                           | 13        |
| 1.2 Notations and results of Group Theory . . . . .                                         | 15        |
| 1.2.1 Commuting graph . . . . .                                                             | 17        |
| 1.2.2 Commuting conjugacy class graph . . . . .                                             | 20        |
| <b>2 Common neighborhood energies and their relations with Zagreb index</b>                 | <b>23</b> |
| 2.1 Definition and connection with Zagreb index . . . . .                                   | 24        |
| 2.2 CN-(signless) Laplacian spectrum and CN-(signless) Laplacian energy . .                 | 26        |
| 2.3 Relation between various energies . . . . .                                             | 34        |
| 2.4 More bounds for $LE_{CN}(\Gamma)$ and $LE_{CN}^+(\Gamma)$ . . . . .                     | 38        |

|          |                                                                                                                |            |
|----------|----------------------------------------------------------------------------------------------------------------|------------|
| <b>3</b> | <b>CNL(CNSL)-spectrum and CNL(CNSL)-energy of commuting graphs</b>                                             | <b>46</b>  |
| 3.1      | CNL(CNSL)-spectrum and CNL(CNSL)-energy . . . . .                                                              | 47         |
| 3.1.1    | Some families of AC-group . . . . .                                                                            | 47         |
| 3.1.2    | Groups whose central quotient is isomorphic to $Sz(2)$ , $\mathbb{Z}_p \times \mathbb{Z}_p$ or $D_{2m}$        | 55         |
| 3.2      | CNL(CNSL)-integral and CNL(CNSL)-hyperenergetic graphs . . . . .                                               | 63         |
| 3.3      | Comparison of various CN-energies . . . . .                                                                    | 69         |
| <b>4</b> | <b>Various CN-spectra and energies of subgraphs of CCC-graphs</b>                                              | <b>79</b>  |
| 4.1      | Groups whose central quotient is isomorphic to $\mathbb{Z}_p \times \mathbb{Z}_p$ . . . . .                    | 80         |
| 4.2      | Groups whose central quotient is isomorphic to $D_{2m}$ . . . . .                                              | 83         |
| 4.3      | Some consequences . . . . .                                                                                    | 98         |
| 4.4      | Comparing various CN-energies . . . . .                                                                        | 106        |
| <b>5</b> | <b>Various distance spectra, energies and Wiener index of the complement of <math>\Gamma_{ccc}^*(G)</math></b> | <b>113</b> |
| 5.1      | Distance spectra and Wiener index . . . . .                                                                    | 114        |
| 5.2      | Various distance energies . . . . .                                                                            | 133        |
| 5.3      | Comparing different distance energies . . . . .                                                                | 148        |
| <b>6</b> | <b>Distance Laplacian spectrum and energy of Commuting Conjugacy Class graphs</b>                              | <b>152</b> |
| 6.1      | DL-spectrum and DL-energy of CCC-graphs . . . . .                                                              | 152        |
| <b>7</b> | <b>Conclusion and problems for future research</b>                                                             | <b>178</b> |
| 7.1      | Problems for future research . . . . .                                                                         | 180        |
|          | <b>Bibliography</b>                                                                                            | <b>185</b> |
|          | <b>Index</b>                                                                                                   | <b>194</b> |
