<i>List of Publications</i>	xvi
1 Introduction	1-14
1.1 Background of the Study	1
1.2 Review of Literature	6
1.3 Objectives	11
1.4 Outline and Organization of the Thesis	11
2 Some Properties and Application of Size-biased Poisson-Lindley Distribution	15-31
2.1 Introduction	15
2.2 Materials and Methods	17
2.3 Size-biased Poisson-Lindley distribution	17
2.4 Distributional properties of size-biased Poisson-Lindley distribution	18
2.4.1 Distribution function	19
2.4.2 Probability generating function	19
2.4.3 Factorial moment generating function	20
2.4.4 Moment generating function	20
2.4.5 Coefficient of Variation	22
2.4.6 Cumulant generating function	23
2.4.7 Harmonic mean	23
2.4.8 Survival or Reliability function	24
2.4.9 Hazard rate function	24

2.4.10	Generalized form of size-biased Poisson-Lindley distribution	24
2.5	Estimation of Parameter	25
2.5.1	Method of moments	25
2.5.2	Method based on the first two relative frequencies	26
2.6	Applications	26
2.7	Graphical representations of fitting of the distribution	29
3	On Certain Recurrence Relations Arising in Different Forms of Size-biased Poisson- Lindley Distribution	32-49
3.1	Introduction	32
3.2	Recursive or Recurrence relations of probabilities, factorial moments and cumulants	35
3.2.1	Recursive relation of probabilities	35
3.2.2	Recursive relation of factorial moment and related measures	37
3.2.3	Recursive relation of cumulants	41
3.3	Cumulative distribution function and Moment generating function	42
3.4	Estimation of Parameter	43
3.4.1	Method of moments	43
3.4.2	Method based on the first two relative frequencies	43
3.5	Fitting of distributions to data	44
4	Zero-modified Poisson-Lindley Distribution	50-66
4.1	Introduction	50
4.2	Probability mass function and Probability generating function	51
4.3	Graphical Representations	53
4.4	Distributional Properties	56
4.4.1	Expression for factorial and raw moments	56
4.4.2	Expression for Coefficients of Skewness and Kurtosis	58
4.4.3	Expression for Coefficient of Variation	59

4.5	Estimation of Parameters	62
4.5.1	Method of moments	62
4.5.2	Method based on the first two relative frequencies	62
4.6	Applications	63

5 Certain Properties of Generalized Poisson-Lindley Distribution **67-78**

5.1	Introduction	67
5.2	Probability mass function	68
5.3	Statistical Properties	69
5.3.1	Recurrence relation for probabilities	70
5.3.2	Recurrence relations for factorial moments	71
5.3.3	Recurrence relation for cumulants	72
5.3.4	Index of dispersion	73
5.3.5	Cumulative distribution function and Reliability function	73
5.4	Zero-modified version of Generalized Poisson-Lindley distribution	74
5.5	Parameter Estimation	75
5.6	Goodness of fit	76

6 Two-parameter Quasi Poisson-Lindley Distribution and Its Applications **79-96**

6.1	Introduction	79
6.2	Two-parameter quasi Poisson-Lindley distribution	80
6.3	Certain properties of quasi Poisson-Lindley distribution	81
6.3.1	Cumulative distribution function	81
6.3.2	Probabilities	81
6.3.3	Moments	82
6.3.4	Coefficients of Skewness and Kurtosis	83
6.3.5	Coefficient of Variation	84

6.4	Estimation of Parameters	87
6.4.1	Method of moments	87
6.4.2	Method of maximum likelihood	88
6.5	Zero-truncated, zero-modified and size-biased versions	89
6.5.1	Zero-truncated quasi Poisson-Lindley distribution	89
6.5.2	Zero-modified quasi Poisson-Lindley distribution	90
6.5.3	Size-biased quasi Poisson-Lindley distribution	91
6.6	Fitting of quasi Poisson-Lindley distribution and applications	93
7	A Comparative Study on Zero-truncated Poisson-Lindley And Quasi Poisson- Lindley Distributions	97-111
7.1	Introduction	97
7.2	Zero-truncated quasi Poisson-Lindley distribution	99
7.3	Graphical Representations	100
7.4	Statistical Properties	102
7.4.1	Probability generating function	103
7.4.2	Moments and related measures	104
7.5	Estimations of Parameters	107
7.6	Applications and goodness of fit	109
8	A Study on Some Properties of Poisson Size-biased Quasi Lindley Distribution	112-124
8.1	Introduction	112
8.2	Poisson size-biased quasi Lindley distribution	113
8.3	Graphical Representations	114
8.4	Statistical Properties	115
8.4.1	Probability generating function	115
8.4.2	Moment generating function	116
8.4.3	Factorial moments	117

8.4.4 Raw and Central moments	118
8.4.5 Coefficients of Skewness and Kurtosis	120
8.4.6 Coefficient of Variation	121
8.4.7 Index of dispersion	121
8.4.8 Parameters Estimation	123
8.4.8.1 Method of moments	123
8.5 Conclusion	124
 Bibliography	 125-131
 Appendix	 132-134
