

## CONTENTS

### ABSTRACT

PAGE NO.

### CHAPTER- 1

<b>1.INTRODUCTION</b>	<b>1-4</b>
1.1 What is Graphene oxide (GO) and Graphene?	1-2
1.2 Historical background	2-3
1.3 Preparation methods of graphene/graphene oxide based polymer nanocomposites	3-4
1.4 Graphene oxide and graphene based polymer composite	5
1.5 Some applications of graphene based polymer composite	5-6

### CHAPTER- 2

<b>2. REVIEW OF LITERATURE AND OBJECTIVE OF WORK</b>	<b>6-11</b>
2.1 Review of literature	6-9
2.2 Objective of work	9-10
2.3 Plan of work	10-11

### CHAPTER- 3

<b>3. EXPERIMENTAL SECTION</b>	<b>13-17</b>
3.1 Materials	13
3.2 Method for preparation of Graphene oxide(GO)/ polythiophene (PTh) and graphene/ Polythiophene composite	13
3.2.1 Preparation of GO and graphene	13-14
3.2.2 Preparation of pure polythiophene	14
3.2.3 Preparation of polythiophene/GO composite	14-15
3.2.4 Preparation of polythiophene/graphene composite	15
3.3 Characterization procedures	

3.3.1 Fourier Transform Infrared Spectroscopy analysis (FTIR analysis)	16
3.3.2 UV analysis	16
3.3.3 X-Ray Diffraction (XRD)	16
3.3.4 Scanning Electron Microscope (SEM)	16
3.3.5 Thermo gravimetric Analysis (TGA)	16-17
3.3.6 Electrical conductivity measurements	17

#### **CHAPTER- 4**

<b>4. RESULTS AND DISCUSSIONS</b>	<b>18-25</b>
4.1 FTIR analysis	18-19
4.2 UV analysis	19-20
4.3 XRD analysis	21
4.4 SEM analysis	22
4.5 TGA analysis	23-24
4.6 Electrical conductivity measurements	24-25

#### **CHAPTER- 5**

<b>5.1 CONCLUSION</b>	<b>26</b>
<b>5.2 FUTURE SCOPE</b>	<b>26</b>

<b>REFERENCES</b>	<b>27-29</b>
