

TABLE OF CONTENTS

Chapter	Title	Page no.
Chapter-1	Introduction	1
Chapter-2	Review of literature	6
2.1	Evaluation of quality change during parboiling	6
2.2	Quality evaluation of processed foods and parboiled paddy after drying by image analysis	7
2.3	Rehydration kinetics study	11
2.4	Drying studies	14
Chapter-3	Materials and Methods	16
3.1	Preliminary drying studies	16
3.2	Methodology of parboiling	16
3.2.1	Methodology of open parboiling	16
3.2.2	Methodology of pressure parboiling	17
3.2.3	Materials required for parboiling	17
3.2.4	Set up used for parboiling paddy	17
3.3	Quality evaluation of parboiled paddy	20
3.3.1	Determination of surface colour intensity of brown rice	20
3.3.2	Determination of percent chalkiness of parboiled brown rice	22
3.3.3	Determination of rehydration ratio (RR)	23
3.3.4	Determination of texture of parboiled paddy	23
3.3.5	Determination of swelling ratio and water uptake of parboiled paddy	24
3.4	Experimental design for parboiling studies	26
3.5	Response surface analysis and optimization	27
Chapter-4	Results and Discussion	29
4.1	Drying studies	29
4.1.1	Initial moisture content	29
4.1.2	Drying plots	29
4.1.3	Drying kinetics	30
4.1.4	Moisture content of brown rice	31
4.2	Surface colour, percent chalkiness and swelling kinetics of dehusked parboiled chakua paddy by image processing	31
4.2.1	L* a* b values and total colour difference(ΔE)	31
4.2.2	Colour, rehydration ratio, hardness and chalkiness values	34
4.2.3	Chalkiness percentage	36
4.2.4	Rate constant for swelling ratio (SR)	36
4.2.5	Mass gain plots	38

4.2.6	Surface Area change plots	39
4.2.7	Sensory test results	39
4.3	Textural properties of parboiled rice (komal chawal)	39
4.4	RSM plots and equations for the response surfaces of opensteaming samples	41
4.4.1	RSM plots and equations for colour of parboiled rice	41
4.4.2	RSM plots and equations for rehydration ratio (RR) of parboiled rice	42
4.4.3	RSM plots and equations for hardness of parboiled rice	44
4.4.4	RSM plots and equations for chalkiness of parboiled rice	45
4.5	Optimized results for the response surface for open steaming samples	47
4.6	Validation of the optimised results	47
4.7	Influence of pressure conditions on quality of komal chawal	48
4.7.1	RSM plots and equations for colour of pressure parboiled rice:	48
4.7.2	RSM equations for rehydration ratio (RR) of pressure parboiled rice	50
4.7.3	RSM equations for hardness of pressure parboiled rice	52
4.7.4	RSM equations for % chalkiness of pressure parboiled rice	54
Chapter-5	Summary and Conclusion	57
	References	59-61

LIST OF TABLES

Table no.	Title	Page no.
3.1	MATLAB commands used in the computer vision system (CVS) for surface colour measurement	22
3.2	MATLAB commands used in the computer vision system for surface area change study	25
4.1	Coefficients of fitted Page equation and goodness of fit of static bed and tray drying of parboiled chakua paddy at different temperature	31
4.2	List of $L^* a^* b$ and ΔE values for open steaming samples.	32
4.3	List of $L^* a^* b$ and ΔE values for pressure steaming samples.	32
4.4	Box-Behnken arrangement (open steaming samples) the experiments and the responses [colour (L a b) and rehydration ratio (RR), hardness (force in gram) and chalkiness (%)].	34
4.5	Box-Behnken arrangement (pressure steaming samples): experiments and the responses [colour (L a b) and rehydration (RR), hardness (force in gram) and chalkiness (%)] after doing RSM.	35
4.6	Values of rate constant (k) for area change during rehydration for open steaming samples	37
4.7	Table for texture parameters in various processing conditions in open steaming	40
4.8	Analysis of Variance (ANOVA) of independent variables for colour (ΔE) of parboiled rice.	41
4.9	Analysis of Variance (ANOVA) of independent variables for rehydration ratio (RR) of parboiled rice	43
4.10	Analysis of Variance (ANOVA) of independent variables for hardness of parboiled rice.	44
4.11	Analysis of Variance (ANOVA) of independent variables for % chalkiness of parboiled rice..	46
4.12	Optimized values for the various criteria taken	47
4.13	Validation results	48
4.14	Analysis of Variance (ANOVA) of independent variables for colour of pressure parboiled rice..	49
4.15	Analysis of Variance (ANOVA) of independent variables for RR of pressure parboiled rice	50
4.16	Analysis of Variance (ANOVA) of independent variables for hardness of pressure parboiled rice.	53
4.17	Analysis of Variance (ANOVA) of independent variables for % chalkiness of pressure parboiled rice.	55

LIST OF FIGURES

Fig. no.	Title	Page no.
3.1	Soaking apparatus	18
3.2	Water bath	18
3.3	Open steaming set up	18
3.4	Pressure steaming set up	18
3.5	Fluidised bed dryer	19
3.6	Hot air oven	19
3.7	Digital weighing balance	20
3.8	Hand held anemometer	20
3.9	Schematic representation of colour conversion process from RGB images to L a b values.	21
3.10	Rehydration set up	23
3.11	Texture analyzer	24
3.12	Load cell with probe	24
3.13	Set up for size measurement	26
4.1	Drying plot of parboiled chakua paddy	30
4.2	Plots of moisture ratio against drying time	31
4.3	Sample images for determination of L a b values by image analysis	33
4.4	Images for chalkiness calculation by image analysis	36
4.5	Representation of images showing a gradual change in area with increase in rehydration time.	37
4.6	RSM plots for the effect of process conditions on swelling rate constant	38
4.7	Mass gain plots	38
4.8	Surface area change plots	39
4.9	Plot of texture analysis: force(g) vs time	40
4.10	3D response surface plots for colour	42
4.11	3D response surface plots for RR	43
4.12	3D response surface plots for hardness of parboiled rice	45
4.13	3D response surface plots for % chalkiness of parboiled rice.	46
4.14	3D response surface plots for colour of pressure parboiled rice.	50
4.15	RSM plots for rehydration ratio of pressure steaming samples at different experimental conditions	52
4.16	RSM plots for hardness of pressure steaming samples at different experimental conditions	54
4.17	RSM plots for % chalkiness of pressure steaming samples at different experimental conditions	56

LIST OF ABBREVIATIONS

Abbreviation	Full name
ANOVA	Analysis of Variance
AOAC	Assosiation of Analytical Chemists
CVS	Computer Vision Systems
LPG	Liquified Petroleum Gas
MATLAB	Language of Technical Computing
MC	Moisture Content
PC	Personal Computer
RGB	Red Green Blue
RR	Rehydration Ratio
SR	Swelling Ratio
SOTP	Soaking Temperature
SOTM	Soaking Time
STPR	Steaming Pressure
STTM	Steaming Time
TPA	Texture Profile Analysis
