Preface

SUMMERY

CHAPTER 1 GENERAL INTRODUCTION

INTRODUCTION

MAGNETISM

SYNTHESIS OF NANOPARTICLE

Wet chemical preparation

Need for stabilization

CHARACTERIZATION TECHNIQUES

X-ray diffraction (XRD)

UV-visible spectroscopy

Scanning electron microscopy (SEM)

Fourier transform infrared spectroscopy (FTIR)

OBJECTIVES AND PLAN OF WORK

OBJECTIVES OF THE WORK

PLAN OF WORK

CHAPTER 2 EXPERIMENTAL

EXPERIMENTAL

Introduction

Materials

Instruments used

Methods of synthesis

Synthesis of different polymer Nanocomposites of
Fe/Fe-oxide

CHAPTER 3 RESULTS AND DISCUSSION

Sample preparation for different techniques

X-ray diffraction

UV-visible absorption spectroscopy

Scanning electron microscopy

FTIR spectroscopy

Magnetic nature study

I-V characteristic

CHAPTER 4 CONCLUSION AND FUTURE PLANE

REFERENCE
