

CONTENTS

Certificates.....	i- ii
Acknowledgement.....	iii
Abstract.....	iv
Chapter 1	
1.1. Introduction.....	1-26
1.2. Materials and methods.....	2-12
1.2.1. Epoxy resin.....	2-4
1.2.2. Vegetable oil.....	4-5
1.2.3. Hyperbranched polymers.....	4-11
1.2.3.1. Difference between hyperbranched polymers and dendrimers.....	5-6
1.2.3.2. Difference between hyperbranched polymer and linear polymer.....	7-8
1.2.4. Preparation techniques for hyperbranched polymers.....	8-11
1.2.4.1. Single monomer methodology.....	8
1.2.4.1.1. Step growth polycondensation of AB _x monomers.....	8-9
1.2.4.1.2. Self condensing vinyl polymerization.....	9
1.2.4.1.3. Self condensing ring opening polymerization.....	9-10
1.2.4.1.4. Proton transfer polymerization.....	10
1.2.4.2. Double monomer methodology.....	10
1.2.4.2.1. Couple monomer methodology (CMM).....	10
1.2.4.2.1.2. A ₂ +B ₃ approach.....	10-11
1.2.5. Curing characteristics.....	11-12
1.2.5.1. Cross linking reaction of epoxy resin (diglycidyl ether of bisphenol-A)	
With polyamine.....	12
1.3. Characterization techniques and methods.....	13-22
1.3.1. Spectroscopic techniques.....	13-14
1.3.1.1. NMR (nuclear magnetic resonance).....	13-14
1.3.1.2. FTIR (Fourier transform infrared spectroscopy).....	14
1.3.2. Degree of branching.....	14-15
1.3.3. Physical properties.....	16-17
1.3.3.1. Epoxy equivalent.....	16

1.3.3.2. Rheology.....	16-17
1.3.3.2.1. Rheometer.....	17
1.3.4. Thermal properties.....	17
1.3.4.1. Thermal gravimetric analysis (TGA).....	18
1.3.5. Gloss Characteristics.....	18-19
1.3.6. Mechanical properties.....	19-22
1.3.6.1. Scratch resistance.....	19
1.3.6.2. Impact strength.....	20
1.3.6.3. Tensile strength.....	20-21
1.3.6.4. Elongation at break.....	21
1.3.6.5. Adhesive strength.....	21
1.3.6.6. Toughness.....	21
1.3.6.7. Universal testing machine.....	22
1.4. Applications of hyperbranched polymer.....	22
1.5. Literature review.....	23-25
1.6. Objectives.....	25
1.7. Plan of work.....	25-26

Chapter 2

2.1. Introduction.....	27
2.2. Materials and methods.....	27-31
2.2.1. Materials.....	27
2.2.2. Methods.....	28-31
2.1.2.1. Preparation of monoglyceride.....	28
2.1.2.2. Preparation of vegetable oil based hyperbranched epoxy resin.....	29
2.1.2.2. Curing of the resin.....	30
2.1.2.3. Optimization of curing time.....	30-31
2.1.2.4. Determination of epoxy equivalent.....	31
2.3. Flow sheet of the required steps for preparation of Vegetable oil based hyperbranched epoxy resin.....	32
2.4. Scheme: Synthesis of vegetable oil based hyperbranched epoxy resin.....	33

2.5. Instruments and testing methods.....	34
---	----

Chapter 3

3.1. Introduction.....	35
3.2. Spectroscopic analysis.....	36-42
3.2.1. NMR Spectra of samples.....	36-39
3.2.1.1. Analysis of proton (¹ H) NMR.....	36-37
3.2.1.2. Analysis of 13 carbon (¹³ C) NMR.....	38
3.2.1.3. Calculation of degree of branching of hyperbranched epoxy resin.....	39
3.2.2. FTIR Spectra of samples.....	40
3.2.2.1. Analysis of FTIR of monoglyceride.....	40-41
3.2.2.2. Analysis of FTIR spectra of MG0, MG5, MG10, MG15.....	41-42
3.2.2.3. Analysis of FTIR spectra of MG15 before and after curing.....	42
3.3. Performance of properties of the resin.....	43-49
3.3.1. Physical properties.....	43
3.3.1.1. Rheology.....	44-45
3.3.2. Gloss.....	46
3.3.3. Mechanical properties.....	46-47
3.3.4. Thermal properties.....	48-49

Chapter 4

4.1. Conclusion.....	50
4.2. Future scope.....	51
References.....	52-54
