

## LIST OF TABLE

Table No.	Title	Page No.
4.1	Physical Changes in the <i>Amritsagarkal</i> ( <i>Musa</i> AAA) during development	24
4.2	Changes in the level of moisture, ash, and protein of <i>Amritsagarkal</i> ( <i>Musa</i> AAA) during development	26
4.3	Changes in the level of starch, crude fibre, reducing sugar and non reducing sugar of <i>Amritsagarkal</i> ( <i>Musa</i> AAA) during development	32
4.4	Changes in the level of titrable acidity and ascorbic acid (mg/100gm) during development	37

## LIST OF FIGURES

Figure No.	Title	Page No.
4.1	Changes in fruit weight during fruit development of <i>Amritsagarkal</i> ( <i>Musa</i> AAA)	25
4.2	Changes in fruit length during fruit development of <i>Amritsagarkal</i> ( <i>Musa</i> AAA)	25
4.3	Changes in fruit diameter during fruit development of <i>Amritsagarkal</i> ( <i>Musa</i> AAA)	27
4.4	Changes in the moisture content during the fruit development of <i>Amritsagarkal</i> ( <i>Musa</i> AAA)	27
4.5	Changes in the ash content during the fruit development of <i>Amritsagarkal</i> ( <i>Musa</i> AAA)	29
4.6	Changes in the fat content during the fruit development of <i>Amritsagarkal</i> ( <i>Musa</i> AAA)	29
4.7	Changes in the protein content during the fruit development of <i>Amritsagarkal</i> ( <i>Musa</i> AAA)	31
4.8	Changes in the starch content during the fruit development of <i>Amritsagarkal</i> ( <i>Musa</i> AAA)	31
4.9	Changes in the reducing sugar content during the fruit development of <i>Amritsagarkal</i> ( <i>Musa</i> AAA)	35
4.10	Changes in the non reducing sugar content during the fruit development of <i>Amritsagarkal</i> ( <i>Musa</i> AAA)	35
4.11	Changes in the crude fibre content during the fruit development of <i>Amritsagarkal</i> ( <i>Musa</i> AAA)	36
4.12	Changes in the titrable acidity during the fruit development of <i>Amritsagarkal</i> ( <i>Musa</i> AAA)	39
4.13	Fig. 4.13.Changes in the ascorbic acid during the fruit development of <i>Amritsagarkal</i> ( <i>Musa</i> AAA)	39

## LIST OF PLATES

Plate No.	Title	Page No.
3.1	20 DAE (Days after emergence)	11
3.2	35 DAE (Days after emergence)	11
3.3	50 DAE (Days after emergence)	11
3.4	65 DAE (Days after emergence)	11
3.5	Ripening	11

# CONTENTS

CHAPTER NO.	TITLE OF THE CHAPTER	PAGE NO.
I	INTRODUCTION	1-2
II	REVIEW OF LITERATURE	3-9
III	MATERIALS METHODS	10-24
IV	RESULTS AND DISCUSSION	24-39
V	SUMMARY AND CONCLUSION	40-41
	BIBLIOGRAPHY	42-47
