

Tezpur University

Certificate

This is to certify that the thesis entitled “**Dielectric relaxation and electrical transport studies of polypyrrole nanostructures and swift heavy ion irradiation effects**”, submitted to the School of Sciences, Tezpur University in partial fulfillment of the requirements for the award of the Doctor of Philosophy in Physics, is a record of original research work carried out by Mr. Jayanta Hazarika under my supervision and guidance.

All help received by him from various sources have been duly acknowledged.

No part of the thesis has been submitted elsewhere for award of any other degree.

Signature of Supervisor:

(Prof. A. Kumar)

Designation: Professor

School: Sciences

Department: Physics

Date:

Place: Tezpur-784028, Assam, India

Declaration

I hereby declare that the thesis entitled “**Dielectric relaxation and electrical transport studies of polypyrrole nanostructures and swift heavy ion irradiation effects**”, submitted to the School of Sciences, Tezpur University in partial fulfillment of the requirements for the award of the Doctor of Philosophy in Physics, is a record of original research work carried out by me. Any text, figures, theories, results or designs that are not of my own devising are appropriately referenced in order to give due credit to the original author(s). All the sources of assistance have been assigned due acknowledgement. I also declare that neither this work as a whole nor a part of it has been submitted to any other university or institute for any degree, diploma, associateship, fellowship or any other similar title or recognition.

*Without the support of some
wonderful and beautiful
people,*

*My life would have been
incomplete*

*This thesis is dedicated to
Bonomali Hazarika (Deuta),
Minoti Hazarika (Ma),
beloved uncle "Saru Da" and
above all to Dr. Subrata
Hazarika (Sir), the person
who shape my life.*

*Yours constant support and
encouragement were the
prime inspiration behind
this work*

ACKNOWLEDGEMENT

In the venture of the journey towards attaining my Ph.D., this thesis has been kept on track and seen through to completion with the support and encouragement of numerous people, including my mentors, well-wishers, friends, colleagues and technical staff. It gives me immense pleasure to convey my heartfelt thanks to all those people who made this thesis possible and blessed me with their contribution in different ways.

*At the beginning, let me humbly express my heartiest gratefulness to my guide, **Prof. Ashok Kumar**, Professor, Department of Physics for his invaluable guidance, scientific perceptions, never ending patience, constant encouragement. His profound Knowledge, understanding have inspired me to pursue my doctoral research in the field of conducting polymer science. I express my deep gratitude for his insightful guidance, valuable advice, periodic constructive suggestions and extensive discussions during my work. His understanding attitude, untiring effort, constant support, encouragement and personal attention provided a safe and smooth basis for my research work. I am thankful for his devoted contribution in reviewing my writing progress, and making corrections to improve and finalize the research papers as well as the thesis. I convey to him my heartfelt thanks for believing in me and making the subject so interesting and building up the confidence in me to pursue this research.*

I would like to thank Prof. M. K. Chaudhuri, Hon'ble Vice-Chancellor, Tezpur University who have provided me the platform to work with such a nice research group. Furthermore, it is worthwhile to mention his nice responses toward the welfare of students as well as the University. He organized the university in a discipline way that helps us a lot to carry out the research works. It gives me immense joy to express my heartiest grateful to him.

I would like to offer my heartfelt thanks to Dr. Subrata Hazarika, Associate Professor, Head, Department of Physics, Assam University (Diphu Campus) for his constant support and encouragement during my PhD work. Furthermore, without his unconditional love and constant support during my M. Sc. from all possible ways, the man what I am today would be just a dream (!) for me.

Furthermore, I am thankful to Anil Hazarika, Research Scholar, Dept. of Electronics and Communication as well as my college senior who helped me to learn the Physics and Electronics in a discipline way. His deep subjective knowledge, instruction and technical skills help me to tackle many problems during my PhD works. I would also like to appreciate the constant help towards the benefit of students in all ways. At the outset, he introduced me to Prof. A. Kumar, a wonderful

scientist and paved the way to my goal. His valuable advice, untiring effort, constructive suggestions and personal attention provided a secure and smooth background.

I would like to extend my sincere thanks to Dr. D. K. Avasthi, Senior Scientist, Inter University Accelerator Centre (IUAC), New Delhi for his excellent interest, fruitful discussions and suggestions during the course of the swift heavy ion irradiation experiments that had been carried out at IUAC, New Delhi. As well, I would like to acknowledge the Inter University Accelerator Centre (IUAC), New Delhi for offering me the Junior Research Fellowship (JRF) to carry on my research work.

My utmost gratitude goes to my Doctoral committee members Dr. P. Deb, Associate Professor, Dr. Gazi A. Ahmed, Associate Professor, and Head, Department of Physics for their helpful suggestions, advice and comments. I convey my sincere gratitude to my teachers Prof. Jayanta Kumar Sarma, Prof. Nidhi Saxena Bhattacharyya, Prof. Nilakshi Das, Dr. Dambarudhar Mohanta, Dr. Kishore Baruah, Dr. P. K. Karmaakar, Dr. Mrinal Das, Dr. Pobitra Nath, Dr. Debasish Borah, Dr. Rajib Biswash and Dr. S. K. Das and the technical staff of Department of Physics for their help to carry out this work.

I would like to express my heartiest gratitude and then to the past and present members of the Materials Research Laboratory: Dr. Somik Banerjee, Dr. Madhurjya Deka, Dr. Prokash Barman, Dr. Chandrani Nath, Dr. Anup Kumar Nath, Dr. Inanendra Upadhyay, Dr. Paragjyoti Chutia, Jagat Dipendrya Ray, Rajib Borah, Arati Sarmah, Madhavi Devi and Rituraj Dutta.

My special thanks also extend to my lab senior Dr. Anup Kumar Nath who continuously helps me in giving various suggestions and handling the various equipments at the early stage of my research works. Further, I would like to appreciate my Lab-mate Inanendra and Parag with whom I had made a lot of useful discussions regarding research work. Additionally, I wish to thank Dr. Paban Chetri, Kaushik Saikia, Dr. Saurav Bhattacharjee, Samiron Hazarika, Pragyan Jyoti Gogoi and Anjalu Ramchari for making a difficult job full of fun and enjoyment along with constant inspiration to speed up my research work from time to time.

I also take the opportunity to thank the entire TU family, especially administrative staff Dr. Biren Das, registrar, and Dr. L. Borah, controller of Examination and other members. I am thankful for the Tezpur University Library for the wealth of the books and journals which I consulted for the invaluable support of literature. My sincerest thanks go to the librarian Dr. Mukesh Saikia and his team who facilitated and guided me directly or indirectly.

I will always remember my teacher Pranjal Bora (bro), Akash Deepta Thakur, Assistant Professor, Department of Physics, J. B. College, Jorhat who taught me the basic physics and also provided support in my personal life and motivated me for higher education from the College life.

Besides, I would like to acknowledge the sophisticated Analytical Instrumentation Centre (SAIC), Tezpur University and Sophisticated Analytical Instrumentation Facility (SAIF), NEHU, Shillong for providing good experimental background for research work. Further, I am also thankful to their technical staff Joston P. Nongkynrih and Anil Hazarika for their helps during sample analysis. Additionally, I would like to thank the Department of Chemical Sciences, Tezpur University in characterizing some of the samples on various aspects. I would likewise like to mention that Tezpur University providing a well facilitated as well as good research background for the students.

I would also like to pay my sincere thanks to my relatives, family members and well-wishers. I owe all my accomplishments to them who stood by me all the time throughout my research work and all my hard times. In this regards, I would like to thank my younger uncle "Saru Da", aunts, Pranati Hazarika (Mahu), brother Bikash Hazarika (Ritu Da), Prasanta Hazarika (S'on), Hemjyoti Hazarika (Mun), Aditya Hazarika (Babu) and younger sister Nayanmoni Hazarika (Vonikon), my marvelous childhood friends Partha Protim Hazarika and Sekhar Jyoti Bora for their valuable advice, support, the encouraging and inspiring words and wish which make me happy.

My special thanks go to my father, Bonomali Hazarika, himself a dedicated professional in his own field, mother, Minoti Hazarika, who is a constant source of inspiration, as a young confident lady to look up during hardships and ups and down in my life and my brother, Diganta Hazarika (Bhaiti) whose love and sacrifices have led me the way to achieve my goal. All my heartfelt gratitude goes to my lovely family.

Above all, I grateful for the immense blessing bestowed upon me by the Almighty God, which enable me to complete the work and keeping me in good health.

(Jayanta Hazarika)
