List of Figures 1.

List of Tables II.

Chapter 1: Introduction

1.1 Introduction 1

1.2 Solar Energy 2

1.3 Solar Radiation 3

1.4 Solar Photovoltaic Technology 5

1.5 Type of Tracking 7

1.5.1 Mechanical or Passive Trackers. 8

1.5.2 Microprocessor based solar tracker 10

1.5.3 Electro – optically controlled base tracker 11

1.5.4 Auxiliary bifacial solar cell based 12

1.5.5 Date and time based solar tracker 14

1.6 Photovoltaic power generation 15

1.7 Maximum power point tracking and its needs 16

1.8 Background and scope of this thesis 16

1.9 Objectives 17

Chapter 2: Methods and Methodology

2.1. Tracker design.

18

2.2. Design of sun tracker

	19
2.3. Description of components used for the design of single axis sun tracker	23
2.3.1.1. Light sensors for position control	23
2.3.1.2. The Photo-resistive cell	24
2.3.1.3. Light Dependent Resistor	24
2.3.2. Diodes	27
2.3.2.1. pn Junction diodes	28
2.3.2.2. Forward bias region	28
2.3.2.3. Reverse bias region	29
2.3.2.4. IN 4007 diode	29
2.3.3. Transistor	30
2.3.3.1. Operation of transistor	31
2.3.3.2. Transistor BC547	32
2.3.4. Resistor	33
2.3.4.1. Theory of operation of resistor	33
2.3.4.3. Power dissipation of resistor	33
2.3.5. Capacitor	34
2.3.5.1. Theory of operation of transistor	34
2.3.6. DC motor	35
2.3.6.1 Detailed description of DC motor	36
2.3.7. Relay	39
2.3.7.1. Basic operation of relay	39
2.3.7.2. Types of relay	40
2.3.7.3. Solid state relay	40
2.4. Design process of electronic circuits for sun tracking system	42
2.4.1. Primary design circuit	42
2.4.1.1 Operation principle of primary circuit	42
2.4.1.2. Circuit diagram of primary circuit	43
2.4.1.3. Value of component	43
2.4.1.4. Working principle of primary circuit	44
2.4.2. Secondary Design circuit	46
2.4.2.1. Operation principle of secondary circuit	46
2.4.2.2. Circuit diagram of secondary circuit	46

2.4.2.3. Value of components	47
2.4.2.3 Working principle of secondary circuit	47

Chapter 3: Results and discussion

3.1. Calibration of LDR sensor	50
3.2. Performance of complete single axis solar tracking system	51
3.2.1. The solar insolation receives by fixed and tracking PV panel	52
3.2.2. Powered delivered by fixed PV panel and tracking PV panel	53

Chapter 4: Conclusions

4.1. Conclusion	56
4.2. Difficulties and Future work	57
