

Table of Contents

Chapter	Page number
List of Figures	i
List of Tables	iii
1. Introduction	1
1.1 System Description	2
1.1.1 Solar array simulator	2
1.1.2 Supercapacitor bank	3
1.1.3 MPPT controller	3
1.1.4 DC-DC converter	4
1.1.5 Voltage and current sensors	4
2. Literature Reviews	5
3. Objectives and Methodology	8
4. System Components Description	10
4.1 Supercapacitor	10
4.1.1 Electrode	11
4.1.2 Electrolyte	11
4.1.3 Dual layer technique	11
4.1.4 Supercapacitor unique features	12
4.1.5 Application of supercapacitor	12
4.1.6 Supercapacitor electrical equivalent model	13
4.2 Solar cells and its characteristics	15
4.2.1 I-V and P-V characteristics of solar cell	16
4.2.2 Effects of solar irradiance and temperature on power output	17
4.3 Maximum Power Point Tracking (MPPT)	18
4.3.1 MPPT control algorithm	19
4.3.1.1 Perturb and Observe (P&O) Method	18
4.3.1.2 Incremental Conductance Method	19
4.4 DC-DC converter	21
4.4.1 Buck converter	21
4.4.2 Boost converter	21
4.4.3 Buck-Boost converter	22
4.5 Programmable solar array simulator	22
4.6 Data logger	25

4.7 Arduino Uno Board	25
5. Simulation	27
5.1 Modelling of solar panel	27
5.2 Simulink model of MPPT	30
5.3 MATLAB/SIMULINK modelling of supercapacitor	30
5.4 Simulation result	31
6. Experimental Validation	33
6.1 Hardware design of charge controller without MPPT	33
6.2 Charging and discharging characteristics of supercapacitor	34
6.2.1 Charging characteristics	35
6.2.2 Discharging characteristics	36
6.3 Experiment of charging of supercapacitor with and without MPPT	37
6.3.1 Interfacing of Arduino with MATLAB	38
6.3.2 Hardware design of charge controller with MPPT	39
7. Experimental Results	43
7.1 Direct charging (without MPPT)	43
7.2 Experimental result of charging with MPPT	45
8. Conclusions	48
References	49

List of Figure

Figure No.	Particulars	Page No.
Fig 1.1	Overall systems architecture	2
Fig 1.2	Supercapacitor structure	3
Fig 3.1	Comparison of constant current charging and constant power charging	9
Fig 4.1	Comparisons of energy and power densities of different energy storage device	10
Fig 4.2	Various supercapacitor equivalent circuits	14
Fig 4.3	New equivalent circuit	15
Fig 4.4	Equivalent circuit of a solar cell	15
Fig 4.5	Solar cell characteristics	16
Fig 4.6	Solar cell characteristics at various irradiances	17
Fig 4.7	P&O method algorithm	19
Fig 4.8	Incremental conductance method on a P-V curve of solar module	20
Fig 4.9	Incremental conductance method	20
Fig 4.10	Buck converter	21
Fig 4.11	Boost converter	22
Fig 4.12	Buck-Boost converter	22
Fig 4.13	Solar array simulator	23
Fig 4.14	Block diagram of data logger	25
Fig 4.15	Arduino UNO board	26
Fig 5.1	Overall system developed in MATLAB/Simulink	27
Fig 5.2	Simulink modelling of Solar cell	29
Fig 5.3	I-V and P-V curve of solar cell in Simulink	30
Fig 5.4	Supercapacitor modelling	30
Fig 5.5	Supercapacitor model	31
Fig 5.6	Supercapacitor charging without MPPT (time vs voltage)	32
Fig 5.7	Charging of supercapacitor with MPPT (time vs voltage)	32
Fig 5.8	Solar panel output parameter with the variation of irradiance	32
Fig 6.1	Direct charging circuit	34
Fig 6.2	Voltage sensor	34
Fig 6.3	Current sensor	34

Fig 6.4	Snapshot of voltage and current sensor	35
Fig 6.5	Snapshot of charging circuit without MPPT	35
Fig 6.6	Voltage vs time	35
Fig 6.7	Current vs time	36
Fig 6.8	Time vs power	36
Fig 6.9	Discharge voltage vs time	37
Fig 6.10	Discharge current vs time	37
Fig 6.11	Discharge power vs time	37
Fig 6.12	Experimental setup	38
Fig 6.13	Interfacing of Arduino UNO with MATLAB	39
Fig 6.14	Schematic diagram of MPPT charging circuit	40
Fig 6.15	Supercapacitor voltage sensor	40
Fig 6.16	PV voltage sensing circuit	40
Fig 6.17	Gate driver power supply	41
Fig 6.18	Power supply of voltage and current sensors	41
Fig 6.19	Connection of analog input with Arduino UNO	41
Fig 6.20	PCB layout of charge controller with MPPT	42
Fig 6.21	Complete charge controller hardware with MPPT	42
Fig 7.1	PV current vs time	43
Fig 7.2	PV voltage vs time	43
Fig 7.3	PV power vs time	44
Fig 7.4	Supercapacitor current vs time	44
Fig 7.5	Supercapacitor voltage vs time	45
Fig 7.6	Supercapacitor power vs time	45
Fig 7.7	PV voltage vs time	46
Fig 7.8	PV current vs time	46
Fig 7.9	PV power vs time	46
Fig 7.10	Supercapacitor current vs time	47
Fig 7.11	Supercapacitor voltage vs time	47
Fig 7.12	Supercapacitor power vs time	47

List of Tables

Table No.	Particulars	Page No.
Table 4.1	Specification of solar array simulator	24
Table 4.2	Specification of Arduino Uno Board	26
Table 5.1	Parameters of KC200GT module at STC (25 °C, 1.5 AM, 1000 W/m ²)	27
Table 5.2	Model parameters of supercapacitor for two branch model	31
