ACKNOWLEDGMENT

I take this opportunity to express a deep sense of gratitude towards my guide, Dr. Shyamanta M. Hazarika, Professor, Department of Computer Science & Engineering, for providing excellent guidance, encouragement and inspiration throughout the project work. Without his invaluable guidance, this work would never have been a successful one.

I also wish to express my sincere appreciation to Stein L. Tomassen, Research Scientist at the Department of Computer and Information Science (IDI) at the Norwegian University of Science and Technology (NTNU), for his constant support and ideas.

I would also thank my Institution and my faculty members without whom this project would have been a distant reality.

Finally, I would like to thank my family at home for their love and support which always have been a source of my inner strength. Last but not the least; I would also like to thank all my classmates for their valuable suggestions and helpful discussions.
