

## Table of Contents

1. Introduction.....	6
1.1. Gene Expression Data.....	6
1.1.1. Phases of Gene Expression Data analysis.....	6
1.2. Microarray and Expression Analysis.....	6
1.2.1. Pre-processing of Gene Expression Data.....	7
2. Related Works.....	9
2.1. Clustering.....	9
2.1.1. Proximity Measures used in clustering.....	9
2.2. Some well known Clustering approaches.....	10
2.2.1. Partitional Clustering.....	10
2.2.2. Hierarchical Clustering.....	11
2.2.3. Density Based Clustering.....	12
2.2.4. Graph Theoretic Approach.....	13
2.3. Cluster Validity Measures.....	14
3. Background of the Works.....	17
3.1. Quality Threshold.....	17
3.2. Advantages of QT- algorithm.....	18
3.3. Disadvantages of QT-algorithm.....	18
4. Modified QT Clustering Algorithm.....	20
4.1. Basics of modified QT clustering.....	21
4.1.1. Minimum Correlation Value.....	21
4.1.2. Overall correlation factor in a cluster.....	21
4.1.3. Detection of Embedded Clusters by the Modified QT.....	22
4.1.4. Steps in Modified QT algorithm.....	22
5. Performance Evaluation.....	25
5.1. Results.....	25
5.2. Expression Graph of the clusters.....	27
5.2.1 Expression Graph of the embedded clusters.....	31
5.3. Functional Enrichment.....	32
5.4. Comparison.....	36
6. Conclusions and Future work.....	38
References.....	39
