## ACKNOWLEDGEMENT

I would like to thank my supervisor Associate Professor Dr. SaratSaharia. I will always be grateful to him for providing me this valuable opportunity to work under his guidance and for his constructive criticism and patience to guide me throughout my project. It has been excellent opportunity for me and I have learnt a lot from him.

Also, this project could not have been completed without support and help of many other people. Without them this experience would definitely not have been as special as gratifying as it was. So, it is my pleasure to have the opportunity to express my thanks to those who ever helped me.

Last but not the least; I cannot forget to thank my parents. I could not have been where I am without their blessings, prayer and hard-work. This dissertation is dedicated to them.
