5.3	EXPERIMENT NO. 5	52
5.3.1	GRID SEARCH	53
5.3.2	RESULTS	53
5.4	EXPERIMENT NO. 6	55
5.4.1	RESULTS	55
6	Conclusion	57

List of Figures

2.1	A typical Brain-Computer Interface	3
2.2	The international 10-20 system	6
2.3	Table showing various feature sets	19
2.4	Classification by SVM	24
3.1	Contour plot of left hand imagery from channel C3	30
3.2	Contour plot of left hand imagery from channel C4	30
3.3	Mesh plot of left hand imagery from channel C3	31
3.4	Mesh plot of left hand imagery from channel C4	31
3.5	Contour plot of right hand imagery from channel C3	31
3.6	Contour plot of right hand imagery from channel C4	32
3.7	Mesh plot of right hand imagery from channel C3	32
3.8	Mesh plot of right hand imagery from channel C4	32
4.1	Proposed architecture for the classification of two-class motor imagery	33
4.2	Timing protocol for MI signal extraction	34
4.3	Timing scheme for sessions 1 and 2 of the dataset	36
4.4	Timing scheme for session 3 of the dataset	37
4.5	Architecture for experiment 1	38
4.6	Coarse grid search for a single subject	39
4.7	Fine grid search for a single subject	40
4.8	Architecture for experiment 2	41
4.9	Coarse grid search for a single subject	42
4.10	Fine grid search for a single subject	43
4.11	Architecture for experiment 3	44
4.12	Coarse grid search for a single subject	45
4.13	Fine grid search for a single subject	46

List of Figures

5.1	Coarse grid search for a single subject	50
5.2	Fine grid search for a single subject	51
5.3	Coarse grid search for a single subject	53
5.4	Fine grid search for a single subject	54

List of Tables

4.1	Table for Derived Feature set	40
4.2	Table for Statistical Feature set	43
4.3	Table for Combined Feature set	45
5.1	Table for PCA applied feature vector	52
5.2	Table for PCA applied feature vector with increased number of trials	54
5.3	Table showing accuracies for different values of c , γ and PCA order	56
