

## Table of Contents

Chapter	Topics	Page No.
<b>CHAPTER 1</b>	Introduction	1
	1.1 Data Mining Standards	1
	1.2 Types of Data in Clustering Analysis	1
	1.3 Spatial data clustering	2
	1.4 Key factors for a spatial clustering technique	2
	1.5 Motivation	3
	1.6 Aim of our work	3
<b>CHAPTER 2</b>	Background of the Work	5
	2.1 Proximity measurement for Spatial data	5
	2.2 Comparison of Proximity measures	6
	2.3 Traditional Clustering Techniques	6
	2.3.1 Hierarchical methods	7
	2.3.2 Partitional methods	7
	2.3.3 Density-based methods	10
	2.3.3.1 DBSCAN	10
	2.3.3.2 EDBSCAN	11
	2.3.3.3 VDBSCAN	11
	2.3.4 Grid-Based method	12
	2.3.5 Model-based method	12
	2.3.6 Nearest Neighbour method	13
	2.3.7 Fuzzy method	13
	2.4 Cluster validity measures	15
	2.5 Discussion	15
<b>CHAPTER 3</b>	Proposed Work (DFCT)	17
	3.1 Algorithm of DFCT	18
	3.2 Discussion	20
<b>CHAPTER 4</b>	Performance Evaluation	21
	4.1 Experimental Work Description	21
	4.2 Cluster Quality Measure	27
<b>CHAPTER 5</b>	Conclusion and Future Scope	29
	5.1 Conclusion	29
	5.2 Future Scope	29
	References	30
