Acknowledgements

*It's my great pleasure to show due regards to persons involved in bringing out successful completion of the thesis work entitled "**Detection, Tracking and Recognition of Human using Gait Analysis for Visual Surveillance**" undertaken by me as a prerequisite towards partial fulfillment for the award of M.TECH (IT) at Tezpur University.*

It would not possible for me to achieve success with my effort alone. There were a lot of people who extended their supportive hands towards me in the way of making my work a success. It is a pleasure to convey my gratitude to all of them.

First of all, I would like to express my deep sense of respect and gratitude towards my advisor and supervisor Dr. Sarat Saharia, Associate Professor, department of Computer Science and Engineering, Tezpur University, who has been the guiding force behind this Project work. I am greatly indebted to him for his constant encouragement, invaluable suggestions and support from an early stage of this research and providing me extraordinary experiences throughout the work. I consider it as my good fortune and proud to record that I had the opportunity to work with such a wonderful person.

I am especially indebted to my parents for their love, sacrifice, and support. I would like to thank for all the thoughtful and mind stimulating discussions we had, which prompted me to think beyond the obvious. Finally, I extend my gratefulness to all those who are directly or indirectly involved in this work.
