

CONTENTS:

I.	INTRODUCTION TO WINDOWS PROGRAMMING-	1-2
	1. Basics of Windows programming.	
	2. Steps for creating a window.	
II.	INTRODUCTION TO DIRECTX API-	3-5
	1. Meaning of DirectX.	
	2. Component object model.	
	3. The Architecture.	
	4. Initializing Direct3D.	
III.	RENDERING IN THE SCREEN	6-25
	1. Model Representations:	
	1.1. Vertex Formats	
	1.2. Indices	
	2. The virtual Camera.	
	2.1. Building a Flexible Camera Class	
	2.2. Implementation Details: Computing the view matrix	
	2.2.1. Part1: Translation.	
	2.2.2. Part2: Rotation.	
	2.2.3. Combining both parts.	
	2.3. Pitch, Yaw, Roll.	
	3. The Transformation Pipeline	
	3.1 The World Matrix.	
	3.2 The View Matrix.	
	3.3 The Projection Matrix.	
	4. The Rendering.	
	4.1. The Rendering pipeline.	
	4.2. The Frame Buffer (Back buffer)	
	4.3. Refresh Rate.	
	4.4. The Front Buffer (Display Unit)	
	4.5. Swap chains.	
	5. Color.	
	5.1. The Color Representation.	
	5.2. Vertex Colors.	
	5.3. Shading.	
	6. Introducing Timers.	

- 6.1. TimeGetTime function.
- 6.2. The Performance Counter.
- 6.3. The CTimer Class.

IV. BASIC TERRAIN RENDERING AND APPLYING LIGHTING AND MULTILEVEL TEXTURING. 26-44

1. Heightmap

- 1.1. Creating a Heightmap.
- 1.2. Loading a RAW file.
- 1.3. Accessing and modifying the Heightmap.
- 1.4. Generating the terrain Geometry.
 - 1.4.1. Computing the vertices.
 - 1.4.2. Computing the indices-Defining the triangle.
- 1.5. "Walking" on the Terrain.

2. Lighting.

- 2.1. Light Components.
 - 2.1.1. Ambient Light.
 - 2.1.2. Diffuse Light.
 - 2.1.3. Specular light.
- 2.2. Vertex Normals.
- 2.3. Light Sources.
 - 2.3.1. Point Lights.
 - 2.3.2. Directional lights.
 - 2.3.3. Spot Lights.

3. Texturing.

- 3.1. Texturing a Terrain.
- 3.2. Generating Texture Coordinates.
- 3.3. Detail Mapping.
 - 3.3.1. Single Pass Detail Mapping.
 - 3.3.2. Multi Pass Detail Mapping.
- 3.4. The concept Sky Box.

V. MESHES. 45-54

1. Introduction.
2. Geometry Information of Mesh.
3. Subsets and the Attribute Buffer.
4. Drawing.
5. Optimizing.
6. The Attribute Table.
7. Adjacency Info.

VI.	LOADING AND RENDERING COMPLEX 3D MODELS.	55-59
	1. ID3DX Buffer.	
	2. X files	
	2.1. Loading an X file.	
	2.2. X file Materials.	
	2.3. Generating Vertex Normals.	
VII.	WORK DONE	60-66
	1. Cube Rotation.	
	2. Simple terrain.	
	3. Simple terrain with one level texturing.	
	4. Simple terrain with multilevel texturing.	
	5. Mesh loading.	
	6. 3D Army Viewer.	
VIII.	CONCLUSION AND FUTURE WORKS	67
IX.	REFERENCES	68
