<u><i>Chapter no.</i></u>	<u><i>Name of the chapter</i></u>
---------------------------	-----------------------------------

CHAPTER 1	INTRODUCTION
CHAPTER 2	REVIEW OF LITERATURE
CHAPTER 3	MATERIALS AND METHODS
CHAPTER 4	RESULTS AND DISCUSSION
<u>CHAPTER 5</u>	<u>CONCLUSION</u>

References

LIST OF TABLES

Table1:Some commercially available iron oxide based magnetic contrast agents.

Table2:All FePt sample

Table3:Edx of samplep1

Table4:Edx ofsample s1

Table 5: XRD analysis of the sample.

Table 6: FTIR peak identification from FTIR analysis.

Table 5: Data from M-H plot

LIST OF FIGURES

Fig1:reduction of MTT to formazan

Fig 2 :EDX spectra of sample p1.

Fig 3:EDX spectra of sample s1

Fig 4:UV-Visible spectra of sample p1.

Fig 5: Photoluminescence spectra of sample p1.

Fig 6: XRD of synthesized samples p1, p2, p3.

Fig7: micrograph of sample p1.

Fig8: micrograph of sample p1.

Fig 9: FTIR spectra of sample p1.

Fig 10: M-H curve of sample p1.

Fig11:Viability of lymphocytes in the presence of different concentration of sample p1 nanoparticles.

Fig. 12: Viability of lymphocytes in the presence of different concentration of sample p2 nanoparticles.

Fig 13: Viability of lymphocytes in the presence of different concentration of sample p3 nanoparticle

LIST OF ABBREVIATIONS

MRI: Magnetic Resonance Imaging.

NMRI: Nuclear Magnetic Resonance imaging.

RES: Reticuloendothelial system.

EDX: Energy Dispersive x-ray spectroscopic.

UV: Ultra Violet visible spectroscopic.

PL: Photoluminescence.

SEM: Scanning electron microscope.

XRD: X-ray diffraction.

FTIR: Fourier Transform Infrared Spectroscopy.

PBS: Phosphate Buffered Saline.

MTT: 3(4,5-dimethyl-2-yl)-2-5 diphenyl tetrazolium bromide.

DMSO: Dimethyl sulphoxide.
