<u>CHAPTER NO.</u>	<u>NAME OF THE CHAPTER</u>	<u>PAGE NO.</u>
Chapter-1	Introduction	1-11
	1.1 Immobilization	1-2
	1.2 Immobilization methods	2-4
	1.3 Immobilized enzyme	5-6
	1.4 Nanomaterial	7-8
	1.5 Aim and objective	9-11
Chapter-2	Review of literature	12-15
	2.1 Increasing activity, specific activity, antibacterial potency after immobilization.	12-13
	2.2 Biodiesel production with the help of immobilization.	12-13
	2.3 Synthesis of ethyl ferulate using immobilized enzyme.	13-14
	2.4 Production of human milk fat substitute using immobilized enzyme.	13-14
	2.5 Synthesis of highly regioselective aromatic esters using immobilized enzyme.	14-15
	2.6 Production of aroma esters using immobilized enzyme	14-15

Chapter-3	3.1 Material and methods	15-21
	3.2 instrument used	15-16
	3.3 Tributyrin emulsion	16-17
	3.4 Bacterial strain	17-18
	3.5 lipase	17-18
	3.6 Methodology	
	3.6.1 Preparation of polymer assisted silver-iron oxide nanoparticles for lipase immobilization	17-18
	3.6.2 Immobilization of lipase	18-19
	3.6.3 Biophysical characterization	19-20
	3.6.4 Hydrolytic activity measurement	20-21
	3.6.7 Determination of anti-microbial potency	20-21
Chapter-4	Result and Discussion	22-37
Chapter-5	Conclusion and the future work	38-40
		41-42

## LIST OF FIGURES AND TABLES

1. FIG.4.1.-----page no. 22
2. FIG.4.2.----- page no. 24
3. FIG.4.3.-----page no. 26
4. FIG.4.4.-----page no. 27
5. FIG.4.5.-----page no. 32
6. FIG.4.6.-----page no. 33
7. FIG.4.7.-----page no. 34
8. FIG.4.8.-----page no.36
9. TABLE.4.1.-----page no. 28
10. TABLE.4.2.-----page no. 30
11. TABLE.4.3.-----page no.36

**List of abbreviation used in the literature:**

°C	degree Celsius
Cfu	colony forming unit
Fig.	Figure
G	Gram
h	hours(s)
Ms	Saturation magnetization
Mr	Remnant magnetization
Hc	Coercivity
