

## **ABBREVIATION**

- Mm ~ mili meter
- Cm ~ Centimeter
- G – Gram
- Mg – mili gram
- $\mu$ l - micro liter
- mM ~ mili molar
- F – Bacterial strain isolated from fermented fish
- KH - Bacterial strain isolated from fermented mustard (kharoli)
- RM - Bacterial strain isolated from rice beer starter culture
- D - Bacterial strain isolated from curd (dahi)
- M - Bacterial strain isolated from milk

---

# CONTENTS

## CHAPTER-1

1.1 INTRODUCTION

1.2 Methods of classification

1.3 Databases

## CHAPTER-2 Review & literature

## CHAPTER-3 Objective

## CHAPTER-4 Materials and method

4.1 MATERIALS

4.1.1 Tested indicator strains

4.1.2 Fermented food

4.2 METHODS

4.2.1 Isolation of bacteria from sample by Serial dilution

4.2.2 Screening of isolated bacteria which shows antimicrobial activity

4.2.3 Determination of zone of inhibition through well diffusion assay:

4.2.4 Supernatant treated with protease or catalase to find out whether antimicrobial agent is protein or peroxide

4.2.5 EFFECT OF pH ON ANTIMICROBIAL ACTIVITY:

4.2.6 Effect of concentration on antimicrobial activity:

4.2.7 Characterization of bacteria by

---

## **CHAPTER 5 RESULT**

5.1.1 Isolation of bacteria from curd and milk samples & antimicrobial assay

5.1.2 Seven & six bacterial strains were isolated respectively from fermented bamboo shoot & soybean respectively and checked their antimicrobial activity.

5.1.3 Nine bacterial strains isolated from rice beer starter culture & check antimicrobial activity

5.1.4 Eleven bacterial strains were isolated from fermented fish samples & measure zone of inhibition

5.1.5 23 Bacterial strains isolated from fermented mustard & measured zone of inhibition.

5.2 An antimicrobial assay after treating with 20 $\mu$ L catalase (50U/ml) and trypsin (0.6mg/ml)

5.3 An effect of concentration on antimicrobial activity

5.4 An effect of ph on antimicrobial activity

5.5 Gram staining of different bacterial strain

5.6 Biochemical test

5.7 Biochemical assay of different bacterial strain:

5.8 Estimate size of protein by SDS PAGE.
