	<b>Page No.</b>
ACKNOWLEDGEMENT	1
<b>Chapter 1: INTRODUCTION</b>	<b>2-17</b>
1.1-PROTEIN	2
1.2-DIFFERENT LEVEL OF PROTEIN STRUCTURES	3
1.3-INTRINSICALLY DISORDER PROTEINS (IDPs)	5
1.4-CLASSIFICATION OF IDPs	6
1.5-GENERAL CHARACTERISTICS OF IDPs	7
1.6-DIFFERENCES BETWEEN IDPs AND ORDERED PROTEIN	8
1.7-DETECTION OF IDPs	9
1.8-DIFFICULTIES IN DETECTION OF IDPs	12
1.9-BIOLOGICAL PROCESS ENRICHED IN IDPs	13
1.10-BIOLOGICAL COST OF IDPs	13
1.11-DOES STRUCTURAL DISORDER POSE A DANGER?	13
1.12-UNFOLDED PROTEIN RESPONSE	14
1.13-INTRINSICALLY DISORDER PROTEIN AND DISEASES	15
1.14-STRUCTURAL DISORDER AND NEURODEGENERATIVE DISEASE	15
1.15-DISORDER IN PATHOGENIC ORGANISM	16
1.16-RATIONAL DRUG DESIGN BASED ON PROTEIN DISORDER	17
1.17-OUR OBJECTIVE	17

<b>Chapter 2: MATERIALS AND METHODS</b>	18-26
2.1-CRITERIA OF DATA BASE SELECTION	18
2.2-CALCULATION OF PI VALUES OF IDPs	18
2.3- SEQUENCE OF THE DISORDERED REGIONS OF THE SELECTED PROTEINS	20
2.4-TABULATION OF OTHER INFORMATION OF THE SELECTED PROTEINS	24
<b>Chapter 3: RESULTS AND DISCUSSION</b>	27 -31
3.1- SEQUEUCNE LENGTH OF IDPs	27
3.2- PI VALUES OF IDPs	28
3.3- AMINO ACID COMPOSITION OF DISORDERED REGION IN IDPS	29
3.4- COMPERISON OF AMINO ACID COMPOSITION IN IDPs AND FOLDED PROTEINS	30
<b>Chapter 4: CONCLUSION</b>	32-33
REFERENCES	34-35
