

CONTENTS

Chapter I – Introduction	Page no.
1.1-Biosurfactants in the removal of non-aqueous phase liquids (NAPLs)	1
1.2-Biosurfactants in bioremediation of crude oil contaminated soil	2
1.3-Biosurfactants in Microbial Enhanced Oil Recovery (MEOR)	2
1.4-Types of biosurfactants and their origin	3
1.5-Advantages of using biosurfactants	3
1.6-Plasmids	4
1.7-Mobilisation or transformation of biosurfactant gene from mesophile to thermophile	4
Chapter II – Objectives	5
Chapter III - Review literature	6
Chapter IV - Materials and methods	
4.1-Source of microbe	8
4.2-Antibiotic sensitivity test	8
4.3-Plasmid isolation	9
4.4-Plasmid curing	11
4.5-Plasmid mobilization	12
4.5.1-Preparation of competent cells	12
4.5.2-Transformation	13
4.5.3-Checking the biosurfactant production efficiency of the transformed cells	14

CONTENTS

Chapter V – Results	Page no
5.1-Antibiotic sensitivity test	15
5.2-Surface tension	15
5.3-Plasmid isolation	18
5.4-Plasmid curing	19
5.5-Transformation:	21
Chapter VI – Discussions	22
Chapter VII – References	23
