

## TABLE OF CONTENTS

### CHAPTER 1

#### INTRODUCTION

1.1 <i>General Introduction to the Diatoms</i> .....	1
1.2 <i>Traditional applications of Diatomite</i> .....	1
1.3 <i>Objective of the present study</i> .....	2

### CHAPTER 2

#### REVIEW OF LITERATURE

2.1 <i>Molecular approaches in diatom study</i> .....	3
2.2 <i>Silicon transport in diatoms</i> .....	4

### CHAPTER 3

#### MATERIALS AND METHODS

3.1 <i>Silicic acid transporter protein sequences</i> .....	5
3.2 <i>Statistical analysis of protein sequences</i> .....	14
3.3 <i>Multiple sequence analysis of SITs</i> .....	14
<i>using ClustalW software</i>	
3.4 <i>Transmembrane region analysis</i> .....	14
3.5 <i>Signal Peptide analysis</i> .....	14

### CHAPTER 4

#### RESULTS AND DISCUSSION

4.1. <i>Compositional and charge distribution analysis of 29 SIT sequences (11 FL and 18 PL) from 10 diatom species using the statistical program SAPS</i> .....	16
4.2 <i>ClustalW Analysis of SIT Proteins</i> .....	18
4.3 <i>Transmembrane analysis of SITs</i> .....	24
4.4 <i>Prediction of signal peptides and their cleavage sites</i> .....	26
4.5 <i>Comparison between SITs and other transporter proteins</i> .....	28
4.6 <i>Comparison of transmembrane region analysis with other transporter proteins</i> .....	34
4.7 <i>Conclusions</i> .....	36
4.8 <i>Future Work</i> .....	37

### CHAPTER 5
