List of Figures	xi
List of Tables	xii
List of Abbreviations	xiii
1 Introduction	1
1.1 General Introduction	1
1.2 Importance of river sediment study	1
1.3 Himalayan rivers	3
1.4 The Brahmaputra	3
1.5 Significance of this study	4
1.6 Objectives	6
Bibliography	8
2 Literature Review	13
2.1 General Introduction	13
2.1.1 The role of river systems in the earth system	13
2.2 Clastic sediments and their influence on rivers	15
2.3 Role of Weathering in geochemical cycle of sediments	16
2.3.1 Weathering and Carbon cycle	18
2.4 Factors controlling the water and sediment geochemistry of world rivers	20
2.5 The Himalayan rivers	23
2.6 Studies on the Brahmaputra	24
Bibliography	30

3	Materials and Methods	51
3.1	Sample collection	51
3.1.1	For suspended sediment	52
3.1.2	For overbank, floodplain and channel sediments	52
3.2	Sample processing for mineralogical and geochemical analysis	52
3.3	Grain size distribution	54
3.3.1	Carbonate leaching and organic matter removal	55
3.3.2	Pipette method	55
3.3.3	Dry sieving	56
3.3.4	Grain size parameters	56
3.4	Mineralogical analysis	58
3.5	Geochemical analysis	60
3.5.1	Sample dissolution	60
3.5.2	Preparation of B-solution by acid digestion	60
3.5.3	Preparation of A-solution for determination of silica (SiO ₂)	61
3.5.4	Microwave digestion method	62
3.5.5	Determination of Loss on Ignition (LOI)	62
3.5.6	Determination of organic carbon (OC)	63
3.5.7	ICP-AES analysis	64
3.5.8	Elemental analysis by X-ray fluorescence (XRF)	67
3.5.9	Calculation of chemical index of alteration	68
	Bibliography	69
4	Study Area	72
4.1	The Brahmaputra River	72
4.1.1	Geology	73
4.1.2	Hydrology	76
4.1.3	Sediment load	79
4.1.4	Geography and Climate	79
4.1.5	Soil type	84
4.2	Tributaries and their characteristics	85
4.2.1	Subansiri river basin	87

4.2.2	Jiabharali river basin	87
4.2.3	Pagladia river basin	89
4.2.4	Burhidihing river basin	91
4.2.5	Kopili river basin	92
4.2.6	Dikhow river basin	94
4.3	Sampling locations	96
Bibliography		98
5	Textural Characteristics of the Sediments of the Brahmaputra river and its Tributaries	102
5.1	Introduction	102
5.1.1	Textural Classification of Sediments	102
5.1.2	Grain Size Analysis	103
5.2	Results and Discussion	105
5.2.1	Textural properties of sediments	105
5.2.2	Grain size parameters	111
5.3	Conclusion	115
Bibliography		116
6	Mineralogy of the sediments of the Brahmaputra river and its Tributaries	120
6.1	Introduction	120
6.2	Results and Discussion	122
6.2.1	Mineralogical compositions of the sediments in the Brahmaputra river	122
6.2.2	Mineralogy of the sediments in the tributaries	126
6.3	Conclusions	127
Bibliography		129
7	Geochemistry of the sediments of the Brahmaputra river and its Tributaries	132
7.1	Introduction	132

7.2	Results and discussions	133
7.2.1	Sediment geochemistry	133
7.2.2	Weathering Geochemistry of Sediments	146
7.3	Conclusions	149
	Bibliography	152
8	Total Suspended Matter and Particulate Flux	157
8.1	Total Suspended Matter and Particulate Flux	157
8.1.1	Importance of qualitative and quantitative approach towards suspended load analysis	159
8.2	Results and Discussion	161
8.3	Conclusion	169
	Bibliography	170
9	Organic Carbon Variation and Distribution in the Sediments	174
9.1	Introduction	174
9.2	Processes Controlling the Fate of Terrigenous Organic Matter	175
9.3	Sedimentological control of Corg loading	175
9.4	Results	178
9.4.1	Longitudinal and lateral variation of organic carbon in the Brahmaputra	178
9.4.2	Relation between organic carbon content and % silt-clay and mean grain size in Brahmaputra	181
9.4.3	Relation between organic carbon content and SPM (suspended particulate matter) in the Brahmaputra	181
9.4.4	Variation in OC in the tributaries	184
9.4.5	Relation between organic carbon content and % silt-clay and mean grain size in tributaries	184
9.4.6	Description of statistical data	184
9.5	Discussion	189
9.5.1	Sediment dynamics along the Brahmaputra River flow-path	189
9.5.2	Silt-clay, mean grain size and TOC	191

9.5.3 SPM and TOC	191
9.5.4 Statistics	192
9.6 Conclusions	192
Bibliography	194
10 Conclusions and Future Scope	197
List of Publications	202
